

Facilities Committee Report

Executive Summary

- The school's fire alarm system install has commenced and is due to complete before students return in the fall.
- We met with the neighbor to further discuss spring water restoration to his site. He verbally agreed to our plan during a walk-thru of the property. We are in the process of further documenting that plan and our meeting notes for both parties to sign. We have a contractor lined up to execute as soon as approved by both parties. Restoration work is planned to be completed before students return in the fall.
- Vanir is continuing to work the prioritization of work along with the collection of estimates for the work listed in our facilities priority list for the Jeffco 5B funds. The district has recently shared new requirements with charters that all contractors bill the district directly and that they be listed on district pre-approved contractor/vendor lists. This might change some bids for our projects as vendors have varying pricing structures based on their customers (single charters vs. whole districts). Vanir is working to understand the process and to continue to collect/package our projects appropriately. We are targeting a few of the items in the 2019-20 school year with the majority of the major projects completing in 2020. We are working on a draft Memo of Understanding to present our projects and their expected costs to the district for approval before moving forward with any contracts.
- No new updates from the City of Arvada but we are on their calendar to meet later this summer again.

Next Meeting TBD

Current Members: Jeanne Coyle, Larry Niemiec, Janelle Johnson, Jim Fries, Mark Miller, Jason Wennen, Jeff Adams, Micah Gilbreath, Doug Neely and Lori Woods. Any questions or interest in the committee, contact LoriWoods@lincolnacadey.net
