

Facilities Committee Report

Executive Summary

- The school's facility team put in substantial work over spring break. Items included an Art Room renovation (bathroom cabinetry and sinks), DSS office sound insulation installation, carpet cleaning and floor waxing, some required HVAC repairs and periodic maintenance, various light bulb replacements, various repairs of ceiling tiles and window screens, wood chip maintenance and asphalt patches.
- The facilities team is collecting information and making a plan for this summer's work to include STEM classroom preparation and a potential reworking of the decking between building A and building B.
- The committee met with the City of Arvada again to continue to receive updates on their plans and to continue to raise our community's concerns. We will meet again before the school year is out to hopefully learn of any substantial changes to the plans. We will continue to update the community of any expected traffic delays.
- In March, the Board voted to pay off Building C. However, the district has closed the window for debt paydown. In light of that information, the Facilities Committee proposes to use the entire 5B funds to work down the facility priority list as proposed in Option A of the Updated Master Plan presenting in March. HVAC estimates have been received and the group will meet within the next week to determine a path forward with other items as well.
- The school's fire alarm system upgrade is progressing on schedule. The team will work over summer break to complete installation.

Current Members: Jeanne Coyle, Larry Niemiec, Janelle Johnson, Jim Fries, Mark Miller, Larry McGurer, Jason Wennen, Jeff Adams, Micah Gilbreath, Doug Neely and Lori Woods. Any questions or interest in the committee, contact LoriWoods@lincolnacadey.net
