## Board Report

May 2024

### Graduation 2024

Overall, graduation was a success. We did have some lessons learned and we will address those issues for the graduating class of 2025. Although we brought in over a thousand chairs, we still didn't have quite enough seating. We may create a section of "bring your own chairs" next year. We also learned that we need to open the gates a lot sooner than we did this year. Lastly, we are pondering turning the soccer field into a food court next year (with several food trucks). The reason for this is that it's very difficult to find a place to eat before or after graduation. Our thought is to have the food trucks set up before graduation and after. If you have any suggestions for next year, I am all ears.

### Final ISAT Scores

I am pleased, but not satisfied to report that Emmett High School performed at or above the state average in ELA, Math, and Science. The final scores are below:

ELA—61% of our students scored proficient or advanced, and the state average was 59%.

Math—34% of our students scored proficient or advanced, and the state average was 31%.

Science—40% of our students scored proficient or advanced, and the state average was 40%.

### Projects at EHS

The football field and the weight room projects are well underway. The football field is slated to be completed by August 12<sup>th</sup>, and the weight room is slated to be completed sometime in July. If you haven't stopped by the school, please do because you will be amazed at the progress so far. I know Mr. Hyde has been taking a photo diary so I suspect those pictures were be shared with you tonight.
