

LOGISTICS AND WAREHOUSE MANAGEMENT

Logistics refers to the movement of products or services to a designated location at an agreed upon time, cost and condition. This is a rapidly growing industry in the Central Valley and beyond. Our region is close to major transportation hubs and our local community has become the home for major distribution centers that offer employees many opportunities to move up the career ladder.

Career Pathways & Related Occupations

- Forklift Driver
- Stock Clerk
- Logistics Coordinator

The Classroom/Lab

Students will work in a real world, industry standard 10,000 square foot warehouse that will emphasize a professional environment including operations equipment (forklifts, pallet jacks, inventory and fulfillment software), safety equipment, uniforms, roles and responsibilities. Students will work with nonprofit and business partners to learn all aspects of the industry while gaining industry certifications and job opportunities.
