ParentAccess Roles

There are three roles that you may grant access to screens in ParentAccess:

-  GradeBook – This role typically refers to a teacher accessing ParentAccess to view it from a student perspective. However, it can apply to anyone with a GradeBook account accessing ParentAccess from that account.
-  Parent – This role refers to any parent or guardian ParentAccess account. Some screens can only be viewed by the primary contact, so even if the Parent role is selected for a particular screen, not all Parent accounts can necessarily view it (items fitting this description have a red asterisk after their description in this guide)
-  Student – This role refers to any student account. Some screens are always inaccessible to students, as they may only apply to Parent and or GradeBook roles.

Granting Access

There are three sections on the **Page Level Security** screen that match the organization of the navigation menu in ParentAccess. The check boxes for the different screens correspond with the screens found in that section on the navigation menu. Select the check boxes for the roles that should have access to the screens, then click **Save**.

View Transportation	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>

Activities			<input checked="" type="checkbox"/>

If a menu item has any subitems, each subitem controls specific functionality for the related screen. You can select a main menu item without enabling any of its subitems; for instance, you may want to give users limited or read-only access to a screen. If you enable a subitem to provide users with additional privileges, by default, the main menu item is automatically selected.
