Week 2 of Summer Fun

Grade 6

Enjoy these optional learning activities this week!	
ELA	 Activity Description American Revolution Virtual Field Trip + Bingo Activity Directions Learn more about the American Revolution by taking a virtual field trip to the Museum of the American Revolution. Complete the bingo card activity during the field trip to see how many ideas/objects/people you can listen for! Virtual Field Trip Scavenger Hunt
Math	 Activity Description Field Day Fiasco: Students will use their reasoning skills to get students to the correct activity for field day. Directions Complete the Logic Puzzle by reading each set of directions carefully. Make sure to check your work. There is an answer key provided to check your work. Link Field Day Fiasco - Week 2
Social Studies	 Activity Description The American Battlefield Trust has broken down the Revolutionary War era into easily digestible sections. Students can choose courses ranging from one day to one week. Revolutionary War Battlefield Virtual Field Trip - <u>Yorktown Battlefield</u> Discover the Yorktown battlefield of the American Revolutionary War in 360° with this interactive virtual tour - featuring clickable tour points, photographs, and much more. Includes overview, history, and biographies of key players for the last big battle that won independence for the United States of America.
Science	 Activity <u>Hands-On Clocks</u> Description Keeping track of time has always been something man has strived to do. From using the moon or the position of the sun in the sky to the building of machines

	to keep track of the passage of time, time has always intrigued us. The activities that are presented below are intended to be hands-on. The videos posted in each activity show you the supplies and steps necessary to build many different types of clocks. Make sure you have parental permission before making any of the clocks. Most of all have fun getting your hands dirty!
	Activity One: Water Clocks: In this activity you have the opportunity to make a water clock. The Water clock is one that I have actually made and have had great success with. I used cocktail straws because they have a smaller hole. The video shows using wire casing to make the straw holes smaller, but I did not have to do this. I also used small Gatorade bottles because they have nice big lids, but that is not necessary. If you are going to try making the second clock, get parents to give permission. There is a cordless drill and hot glue gun used to make the clock. Have Fun! Links: Water Clock
	Activity Two: <u>Building a Sundial</u> : In this activity you get to build a Sundial to keep track of time using the sun and shadows. Remember to face North when using. An extension to building the Sundial in the video is to go outside with a blank one. Take your phone and mark where the shadow cast on the Sundial by the Gnomon is at different hours throughout the day. Link: <u>Sundial</u> Use in next lesson
	Activity Three: <u>The Hourglass</u> : In this activity you see how sand can be used to keep track of time. This build requires some tools. Make sure you get parent permission before trying it. Link: <u>Hourglass</u>
Special Area	Library Activity Description • Library Activity Description • Borrow free ebooks & audiobooks from Butler Public Library and Carnegie Library Directions • Watch the directions here: • Borrowing E Books Links Borrow Books from Butler Public Library Borrow Books from Carnegie Public Library
