

Math Community of Practice

FREE

Our Mathematics Community of Practice for Math Leaders is a dynamic forum designed to bring together mathematics educators in leadership roles to collaborate, innovate, and drive positive change in math education. This community provides a supportive space for math leaders to share expertise, engage in professional learning, and collectively tackle challenges in advancing excellence in mathematics instruction.

This year, we will be focusing on the three dimensions of systemic change as outlined in the California Mathematics Framework. The three dimensions are: an assets-based approach to instruction, active engagement through investigation and connection and cultural and personal relevance.

Audience

Mathematics educators, teachers, teachers on assignment and administrators
