

**Searches of  
Students—  
Reasonable  
Suspicion**

A District search of a student may occur only when the student is on District premises, or while the student is attending a school-sponsored or school-related event, either on or off school property.

Any search of a student will be conducted by an authorized District official who is of the same sex as the student and, when feasible under the circumstances, will be witnessed by at least one other official who is of the same sex as the student.

The following rules will apply when any District official searches a student:

1. Authorized District officials may search a student whenever the student consents to such a search; however, consent will not be obtained through threats or coercion.
2. In the absence of consent, a search may occur when a District official has reasonable suspicion that searching a student's person or personal item will reveal evidence of a violation of the Student Code of Conduct. For example, district officials may conduct a reasonable-suspicion based search for:
  - a. Alcohol;
  - b. A prohibited weapon;
  - c. Controlled substances or illegal drugs as defined by law;
  - d. Stolen property;
  - e. Any other item that has been or may reasonably be expected to be disruptive of school operations; or
  - f. Any other item for which possession by a student is listed as a violation of the Student Code of Conduct.
3. If the search yields contraband, authorized personnel have the authority to detain the student and to preserve any contraband seized.

**Searches of  
Vehicles—  
Reasonable  
Suspicion**

If a vehicle subject to search is locked, the student will be asked to unlock the vehicle. If the student refuses, the District will contact the student's parents. If the parents also refuse to permit the vehicle to be searched, the District may contact local law enforcement officials and turn the matter over to them.

**Parent Notification**

When feasible under the circumstances, the District will notify a student's parent or guardian if any prohibited item is found in District property assigned to a student, in a student's vehicle parked on school property, or on the student's person or personal property as a result of a search conducted in accordance with this policy.

**Disciplinary Action** Any student found to be in possession of an item prohibited in the Student Code of Code will be subject to disciplinary action in accordance with the Student Code of Conduct.

**Use of Metal Detectors**

In order to prevent and deter the presence of weapons and other contraband on campus and at school-sponsored activities, students at all secondary campuses and at school-sponsored events off campus will be subject to random, suspicionless searches using metal detectors. The District's procedures for metal detector searches are designed to ensure that searches are conducted uniformly and equitably, with minimal interference with the educational process and individual privacy rights. District officials will not select a particular individual to search except as authorized by law and District policy.

**Possible Search Methods**

The district's metal detection program may include the use of walk-through and/or handheld metal detectors and inspection of bags and personal items large enough to hold weapons or other contraband.

The District may employ any of following metal detector search methods:

1. Allowing students to enter only at specified times and only through specified entrances. All students will be screened daily as they enter the building.
2. Allowing students to enter only at specified times and only through specified entrances. All students and visitors will be screened on randomly selected days as they enter the building.
3. Screening all students arriving through a particular entrance (e.g., the north and west entrances).

In any of these methods, students may be screened in a randomized, numeric pattern (e.g., every other student or every fifth student) in order to minimize wait times and avoid the risk of bias.

If a student's bag or personal item activates the metal detector, the District personnel operating the metal detector will request that the individual make the bag or item available to be searched for weapons or other contraband. If a student's person activates the metal detector, he or she may be escorted to a more private area for a reasonable suspicion-based search in accordance with law and District policy.

Refusal to Cooperate

A student's refusal to cooperate with the District's search procedures may be grounds for immediate removal, referral to law enforcement, and/or discipline under the Student Code of Conduct, as appropriate under the circumstances.

If a visitor refuses to cooperate with the District's search procedures, authorized District personnel may ask the visitor to leave and, if the individual refuses to leave peaceably, may eject or refuse to allow the individual to enter District property in accordance with Education Code 37.105. [See GKA]

Notification

Parents and students will be notified of the District's policy on searches at the beginning of the school year. When metal detectors are being used at an entrance to a campus or off-campus school-sponsored activity, the District will post signs outside the area where metal detectors are being used to warn students and visitors that they may be required to submit to a screening for metal as a condition of entering the building or event.
