

Position: Student Information System Specialist	FLSA: Non-exempt
Department: Technology	Salary Grade: 24
Reports to: Director of Technology	

OVERALL OBJECTIVE AND SUMMARY

Under the supervision of the Director of Technology, the Student Information System Specialist is responsible for the maintenance and support of the district's Student Information System (SIS) program. Support duties include working directly with school staff regarding the enrollment, attendance, scheduling, grading and school setup processes. The Student Information System Specialist is also responsible for all state reporting requirements and outside agencies exports. Training and assistance duties include assisting in the technical preparation of school master schedules; providing assistance for department or site programs and projects; training school staff regarding the use of the student information system and any office productivity software as it relates to the SIS program; assist in the development of any custom forms, reports or exports for the SIS program; and perform related work as required.

ESSENTIAL DUTIES AND RESPONSIBILITIES

- Troubleshoot various technical issues related to the student information system via phone, e-mail or in person.
- Consult with in-house IT staff for issues that may need to be escalated to outside technical support representatives to resolve the issue.
- Provide one-on-one or group training to school staff on the student information system, as their job position requires, including any other software application that may be used in conjunction with the student information system.
- Compile and prepare a variety of record extracts, labels and reports related to the student information system data to be sent to the federal government, state, district and other outside agencies or departments within the school.
- Work with in-house staff and vendors on software and hardware installations, troubleshooting, administration and maintenance of equipment and software related to the student information system.
- Attend a variety of meetings with school site personnel to exchange information concerning student information system software projects, support staff, data, implementation and maintenance.
- Assist with school efforts to enhance the student information system to better serve the needs of the users and the community.
- Attend assigned conferences to provide and receive training.

- Assist in the creation of letters, memoranda, news releases, bulletins, user documentation, manuals and other advanced technical documents.
- Performs other duties as assigned that support the overall objective of the position.
