Chemistry Summer Assignment

For this assignment, you will be collecting weather and observation data. You can pick any week in summer.

1. Data

Day	Date	Temperature (F)	Cloudiness	Other observations
Monday				
Tuesday				
Wednesday				
Thursday				
Friday				
Saturday				
Sunday				

2. Give your best guess on why these weather changes trend the way they do.

3. How does this weather data compare with other weeks in the summer?

4. What was the average temperature for New Jersey this summer?

5. What activities did you do the week where you collected data? Did the weather make things better or worse?

6. What is something that you're excited to learn about in chemistry this coming school year?
