

# College Chemistry

- This is an LSSU course offered at Sault High. You will be concurrently enrolled in College Chemistry at Sault High and General Chemistry 1, CHEM 115, at LSSU.
- LSSU credit is transferrable to other colleges and universities.
- You must have a “B” or better in both Algebra 1 and Honors Chemistry to take the course. Prior or concurrent enrollment in Algebra 2 is also required.
- You must also meet LSSU’s admissions requirements (see your high school counselor).
- The course includes information about chemical reactions, acid-base chemistry, stoichiometry, gases, heat transfer, atomic structure, periodic table concepts, bonding, and molecular structure.

We will spend three days at LSSU performing labs in addition to the labs we perform at sault high.

- At the end of the course, all students will take the American chemical society first term general chemistry exam as the final exam. No one is exempt.
- More information is available at [www.saultschools.org/Page/6316](http://www.saultschools.org/Page/6316)
