

Honors Chemistry

- Honors Chemistry is a science course intended for college-bound 10th and 11th grade students.
- Students will learn problem-solving skills, study skills, and lab skills that will better prepare them to succeed in college.
- Please note that if you plan to take Physics, College Chemistry, A.P. Biology, or Anatomy and Physiology at Sault High, you must take Honors Chemistry. Students who take regular Chemistry will not be allowed to take these advanced science courses.
- You should have a “B-” or better in both Algebra 1 and Biology to take the course.

The course includes information about atoms and molecules, elements and compounds, the periodic table, bonding, chemical reactions and equations, stoichiometry, states of matter, solutions, and an introduction to acids and bases.

- We will perform approximately 14 lab activities throughout the school year.
- More information is available at www.saultschools.org/Page/1246
