### **District Profile**

The Waco Independent School District is a mid-sized district serving the many different needs of around 15,000 students throughout the city. Waco ISD was established in the late 1800s and has grown from a small classroom to twenty-four campuses across the city. Waco ISD schools offer a family-like atmosphere and small school feel for students ages three through high school.

The District is located in the City of Waco, the seat of McLennan County, Texas. Straddling Interstate Highway 35, Waco lies halfway between the Dallas/Fort Worth metroplex and Austin, the State capitol. The Waco Metropolitan Statistical Area covers 1,000 square miles, with the Waco corporate limits encompassing 85 square miles. According to the 2011 U.S. Census, the median household income in the Waco area was just \$32,149 with an average per capita income of \$19,891. The District is one of twelve school districts located in the surrounding communities. Three charter schools, more than a dozen private, and parochial schools can also be found within the city boundaries.

Governed by an elected Board of Trustees (the "Board") comprised of seven members serving three year staggered terms, elections are held every year on the first Saturday in May. The Board is charged with policy-making, supervisory functions and delegates administrative responsibilities to the superintendent.

Waco ISD offers educational programs at twenty-four sites, including two high schools, four middle schools, fifteen elementary schools, and three alternative education centers. A map of the District and detailed list of campuses is included on pages 5-6. Students in the District are allowed to attend their neighborhood school or may apply for random lottery selection to one of three magnet schools. Magnet campuses, encompassing all grade levels, provide a broad range of curriculum including technology, science, fine arts, Montessori, business, and engineering. District programs include, but are certainly not limited to, the following:

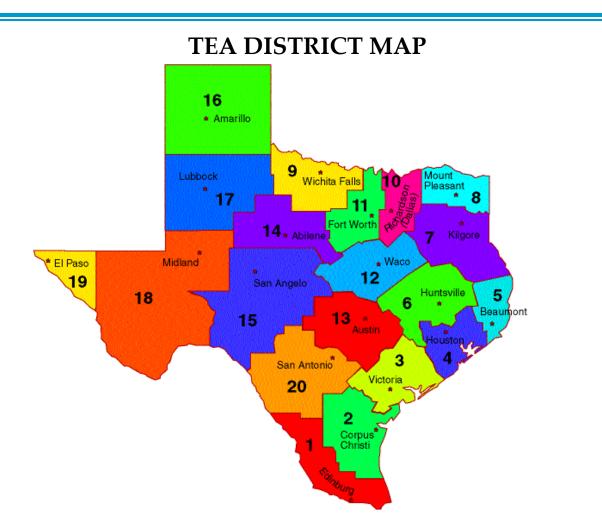

Early childhood Character education Bilingual/ESL programs State-recognized inclusion programs Advanced academic/Athens program Dropout recovery After-school programs Career and Technology Education Health and Human Services Business and Entrepreneurship Engineering and Technology Liberal Arts Articulated courses with area colleges and universities JROTC 4A Athletics Waco ISD continues to be a leader in the State with its rigorous promotion policy, requiring students in grades three through eight to pass the STARR in order to be promoted to the next grade level. The District's instructional year is 176 days. A copy of the 2017-2018 School Calendar may be found on page 10.

Waco ISD encourages life-long learners and realizes the value of professional development for teachers and administrators. The WISD Succeed program supports teachers new to the profession by pairing them with a veteran teacher who provides support, encouragement, and advice throughout the year.

The Waco ISD Sports complex is recognized around the state as a premier venue for high school sports, including football, soccer, softball, baseball and marching band competitions. The Richfield Performing Arts Center host events, which feature Waco ISD's award-winning choirs, bands, and thespians for the entire community to enjoy. Waco ISD has worked hard to build new schools and renovate existing ones

Community and business leaders strongly support the education of students in Waco. The Partners in Education program has nearly 200 businesses and organizations partnered with 24 schools. Since 1997, the WISD Education Foundation has awarded over \$1,100,000 in grants and scholarships to teachers and schools to help make special programs a reality for students.

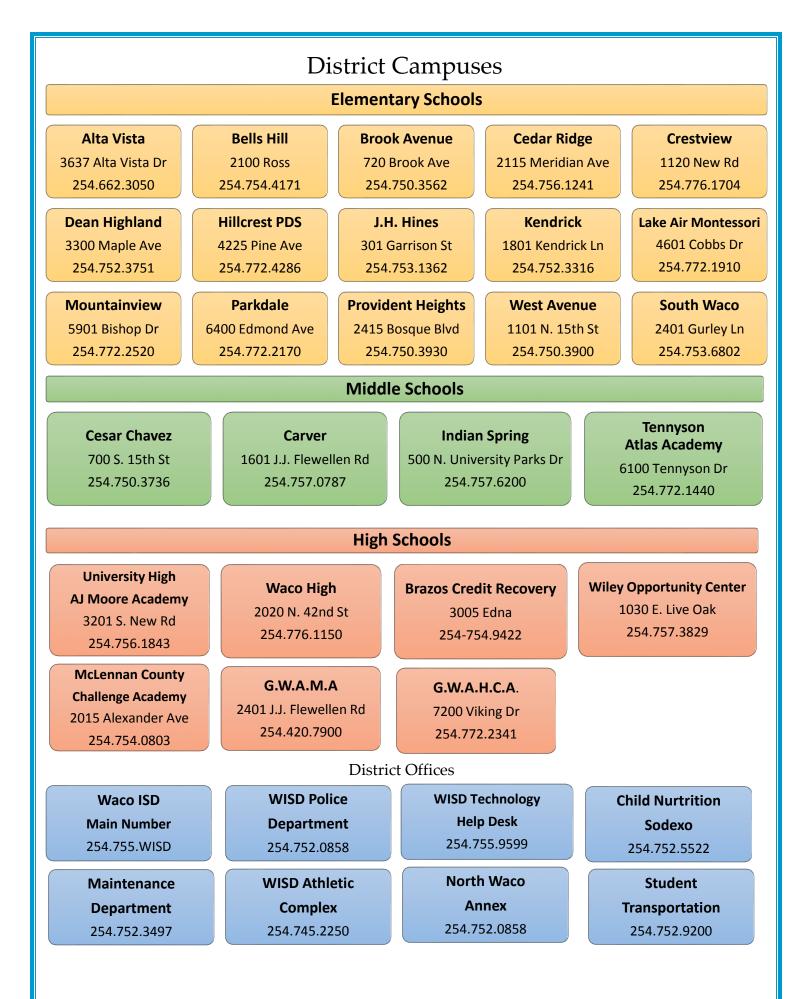

Waco's big-town amenities coupled with a small-town cost-of-living make it an attractive place to work and live. Each school in the Waco Independent School District has a unique atmosphere with programs designed to provide a quality education meeting the needs of our diverse population.

The Waco Independent School District is located in Central Texas along the Brazos River and Interstate Highway 35

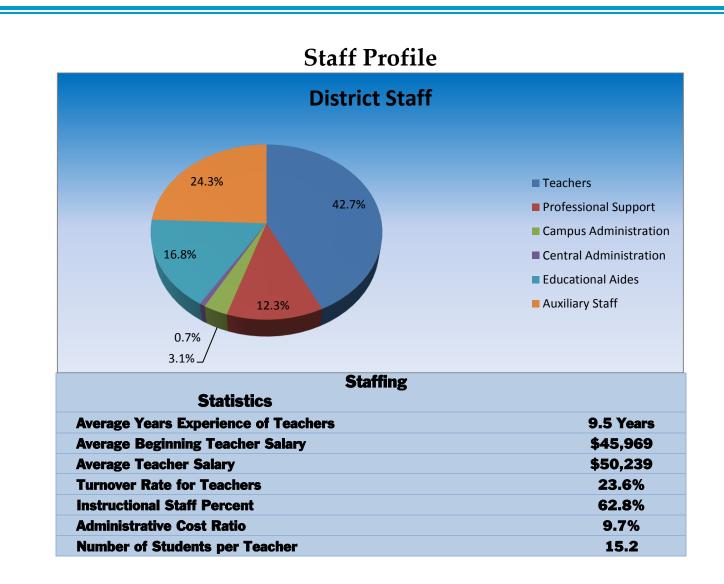

The District is located in the City of Waco, and is one of twelve school districts in McLennan County.

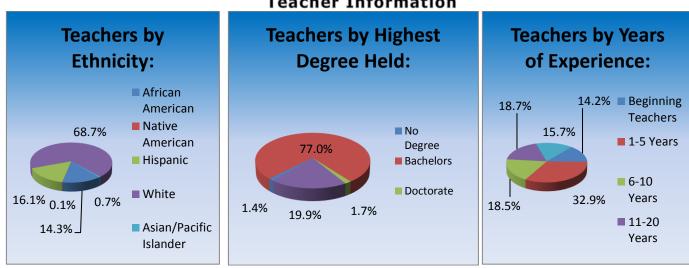

## Student Profile

The Waco Independent School District has an ethnically diverse student population with over 85% of our students considered economically disadvantaged. This creates many challenges in helping each student achieve success.

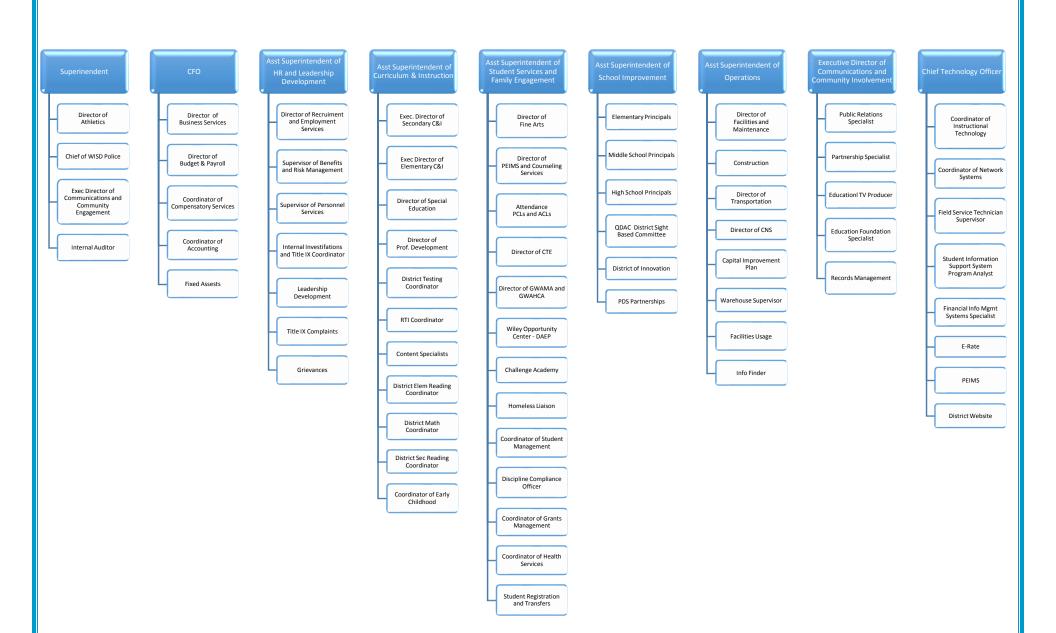

The Waco Independent School District strives to maintain a highly qualified teaching force. The average year's teaching experience, both in total and with the District, exceeds State averages and the District now boasts of nine National Board Certified Teachers.

# Budget Development Process

## THE BUDGET PROCESS

The development and implementation of the District's budget is the responsibility of the Superintendent. Legal requirements for school district budgets are formulated by the state, the Texas Education Agency, and the local district. Additionally, state and federal agencies may impose other requirements on funds; particularly grant funds, distributed through those sources.

The budget development process for the coming year begins shortly after the current year's budget has been adopted and implemented. By January, preliminary enrollment and average daily attendance projections have been made. These projections will be continuously reviewed and revised through the end of the school year.

Because of the District's reliance on state funding, the projection of average daily attendance is critical in determining the resources available to fund the proposed budget. As discussed earlier, state funding is a three-tiered formula with the state's contribution based on a District's average daily attendance (weighted for student populations identified with special needs), property values, and tax collections. Consequently, projecting future property valuations and estimating the resulting tax collections must also be done prior to computing the state revenue.

Projections are complicated by the fact that preliminary property values are not received by the District until mid to late May and the final "certified" tax roll is not received until the end of July. Further complicating these revenue projections is the re-authorization of state funding every two years. These biennial legislative sessions must be monitored closely in order to incorporate changes in the funding formulas.

Once initial revenue estimates are complete, projections of major expenditure items such as utilities, employee benefits, property and casualty insurance, tax collection, legal and audit fees, etc., are made. Current year's salaries and other expenditures are also analyzed in order to substantiate budget allocations. This preparatory work provides the administration with the financial parameters within which it must work to develop the operating budget.

Proposed budget allocations, including bases, methodologies and amounts, are subjected to a review by both administrative cabinet members and the Board of Trustees. Members of the administrative cabinet include the Superintendent, Chief Financial Officer, Assistant Superintendent of Student Services and Family Engagement, Assistant Superintendent of School Improvement, Assistant Superintendent of Curriculum and Instruction, Assistant Superintendent of Operations, Assistant Superintendent of Human Resources, Interim Executive Director of Elementary Curriculum, Interim Executive Director of Secondary Curriculum, Chief Technology Officer and Executive Director of Communications and Community Engagement. Support staff from the special programs areas may be included, as appropriate. In addition to establishing budget allocations, this committee re-evaluates existing programs, identifies new District-wide program costs, examines salary proposals and reviews and makes recommendations on requests for additional funding.

The Board of Trustees in its entirety monitors the District's financial activities and gives the administration guidance on budget issues brought to it for consideration. Upon completion of this review, budget allocation methodologies and elements are approved and budget packets are then distributed to the various campuses, departments, and program budget administrators for development.

The budget packet typically consists of an electronic copy of their non-payroll budget allocation worksheet, the organization's allocation amounts, a staff roster, and the new budget development guidelines book. Each campus principal uses his or her allocations for supplies, materials, equipment, staff development and other non-salary costs. In this decentralized process, the campus site-based decision-making teams, working under the guidance of the campus principal, participate in decisions concerning the utilization of these discretionary funds.

Non-campus budgets are developed by each department head and reviewed by the administrative committee. During this process, the committee will also review any requests for additional funds or personnel units, notifying budget administrators of its decisions.

Following the development of the organizational budgets, consolidated budgetary information is presented to the Board of Trustees. Recommendations on compensation and benefit increases, tax rates, and funding of new programs or additional requests will be presented to the Board throughout the process. When consensus is reached on the proposed budget, a public hearing is convened to allow taxpayers input on the proposed budget and tax rate. This hearing is followed by the Board's discussion and vote.

Changes to the approved budget may be accomplished through either an amendment or a transfer. State law gives the Board of Trustees the authority to amend the approved budget to cover any unforeseen expenditures. The Texas Education Agency has ruled that the budget must be amended prior to exceeding a functional expenditure category. Changes of this nature are submitted to the Board of Trustees for approval at their monthly meetings. Any changes within a functional category are processed through a budget transfer and are approved administratively.

#### **Budget Administration and Management Process**

As budgeted funds are expended, periodic monitoring of the budget should be conducted in accordance with responsibility accounting. Each level of the district's organization is responsible for monitoring those budget items for which it is responsible. The District's accounting system generates expenditure and encumbrances information on a monthly basis. To review budget performance, this information is compared with campus spending plans by principals and centralized services department heads. Administrators, with access to the District's computerized accounting system, may in fact monitor budgetary performance on a transaction-by-transaction basis.

Budget monitoring for the entire District is similarly done by district administrators. The Chief Financial Officer and other district administrators use similar expenditure and encumbrance reports to monitor the budget compliance of programs and funds. Annualized budget summaries which project the impact of current expenditures on year-end results are used in this effort.

The level and frequency of management review of the budget will vary by district. In most districts, the superintendent (or designee) reviews budget-to-actual comparisons monthly. Reporting periodic budget/actual results to the school board is customary in most districts. Monthly financial reports are presented to the Board of Trustees. The reports include statements for the General Fund, Food Service Fund and Debt Service Fund. Quarterly investment reports and athletic complex reports are also presented. If bond proceeds are available and capital projects are in progress, the administration and Board also receive a monthly construction report. While the management of the budget is the responsibility of administration, the Board members need periodic updates on budget results and must be informed of significant budgetary issues. This flow of information keeps the Board apprised of issues, which may affect the District's performance and prepares them for the next budget cycle.

Cash flow projections are critical in ensuring that the District will not experience a fiscal crisis from a cash shortage. Cash forecasts are developed for the fiscal year on a monthly basis. The forecasts consider the timing of federal and state aid payments, local property tax levies and collections, interest earnings and disbursements.

#### **BUDGET POLICIES**

#### Legal Requirements

Legal requirements for school district budgets are formulated by the state, TEA, and the local district. In addition to these requirements, individual school districts also may have their own legal requirements for budget preparation. Additional legal requirements also may be imposed by state and federal grants; however, this section deals only with *state legal mandates, TEA legal requirements and local district requirements* for basic budget development and submission.

Sections 44.002 through 44.006 of the <u>Texas Education Code</u> establish the legal basis for budget development in school districts. The following six items summarize the legal requirements from the code:

- The Superintendent is the budget officer for the district and prepares or causes the budget to be prepared. *Note: TEA recommends that an interactive approach between the Board of Trustees and the Superintendent be taken to establish the budget process and define related roles and responsibilities.*
- The district budget must be prepared by a date set by the State Board of Education, currently August 20 (June 19 if the district uses a July 1 fiscal year start date).
- The president of the Board of Trustees must call a public meeting of the Board of Trustees, giving ten days public notice in a newspaper, for the adoption of the district budget. Any taxpayer in the district may be present and participate in the meeting.
- No funds may be expended in any manner other than as provided for in the adopted budget. The Board does have the authority to amend the budget or adopt a supplementary emergency budget to cover unforeseen expenditures.
- The budget must be prepared in accordance with GAAP (Generally Accepted Accounting Principles) and state guidelines.
- The budget must be legally adopted before the adoption of the tax rate. However, if a school district has a July 1<sup>st</sup> fiscal year start date, then a school district must **not** adopt a tax rate until after the district receives the certified appraisal roll for the district required by Section 26.01, Tax Code. Additionally, a school district **must publish a revised notice and hold another public meeting before** the district **may adopt a tax rate** that exceeds the following: (1) The rate proposed in the notice prepared using the estimate; or (2) The district's rollback rate determined under Section 26.08, Tax Code, using the certified appraisal roll.

#### **Texas Education Agency Requirements**

TEA has developed additional requirements for school district budget preparation as follows:

- The budget must be adopted by the Board of Trustees, inclusive of amendments, no later than August 31 (June 30 if the district uses a July 1 fiscal year start date).
- Minutes from district board meetings will be used by TEA to record adoption of and amendments to the budget.
- Budgets for the General Fund, the Food Service Fund (whether accounted for in the General Fund, a Special Revenue Fund or Enterprise Fund) and the Debt Service Fund must be included in the official district budget (legal or fiscal year basis). These budgets must be prepared and approved at least at the fund and function levels to comply with the state's legal level of control mandates. Funds to be budgeted and reported through PEIMS, both required and optional, are shown in Exhibit 2. Note: Districts may prepare and approve budgets for other funds and/or with even greater detail at their discretion. Such local decisions may affect the need for budget amendments and financial reporting requirements.
- The officially adopted district budget, as amended, must be filed with TEA through PEIMS (Public Education Information Management System) by the date prescribed in the annual system guidelines. Revenues, other sources, other uses, and fund balances

must be reported by fund, object (at the fourth level), fiscal year, and amount. Expenditures must be reported by fund, function, object (at the second level), organization, fiscal year, program intent and amount. These requirements are discussed in further detail in the Data Collection and Reporting module.

• A school district must amend the official budget before exceeding a functional expenditure category, i.e., instruction, administration, etc., in the total district budget. The annual financial and compliance report should reflect the amended budget amounts on the schedule comparing budgeted and actual amounts. The requirement for filing the amended budget with TEA is satisfied when the school district files its Annual Financial and Compliance Report.

#### Local Requirements

In addition to state legal requirements, individual school districts may establish their own requirements for annual budget preparation. Local fiscal policies may dictate budgetary requirements which go beyond those required by the <u>Texas Education Code</u> and TEA. The Waco Independent School District has adopted the following local policies:

- The District shall operate on a fiscal year beginning September 1 and ending August 31.
- Budget planning shall be an integral part of overall program planning so that the budget effectively reflects the District's programs and activities and provides the resources to implement them. In the budget planning process, general educational goals, specific program goals, and alternatives for achieving program goals shall be considered, as well as input from the district and campus level planning and decisionmaking committees. Budget planning and evaluation are continuous processes and shall be a part of each month's activities.
- After it is presented to the Board and prior to adoption, a copy of the proposed budget shall be available upon request from the business office or Superintendent. The Superintendent or designee shall be available to answer questions arising from inspection of the budget.
- The annual public meeting to discuss the proposed budget and tax rate shall be conducted as follows:
  - The Board President shall request at the beginning of the meeting that all persons who desire to speak on the proposed budget and/or tax rate sign up on the sheet provided.
  - Prior to the beginning of the meeting, the Board may establish time limits for speakers.
  - Speakers shall confine their remarks to the appropriation of funds as contained in the proposed budget and/or the tax rate.
  - No officer or employee of the District shall be required to respond to questions from speakers at the meeting.
- The adopted budget provides authority to expend funds for the purposes indicated and in accordance with state law, Board policy, and the District's approved purchasing

procedures. The expenditure of funds shall be under the direction of the Superintendent or designee who shall ensure that funds are expended in accordance with the adopted budget.

 The budget shall be amended when a change is made increasing any one of the functional spending categories or increasing revenue object accounts and other resources.

### FINANCIAL STRUCTURE AND BASIS OF ACCOUNTING

The Board of Trustees (the Board), a seven member group, has governance responsibilities over all activities related to public elementary and secondary school education within the jurisdiction of the Waco Independent School District (the District). Because members of the Board of Trustees (the Board) are elected by the public, have the authority to make decisions, appoint administrators and managers, and significantly influence operations, and have the primary accountability for fiscal matters, the District is not included in any other governmental "reporting entity" as defined by Governmental Accounting Standards Board, Statement No. 14, "The Financial Reporting Entity." The Waco Independent School District Public Facilities Corporation is included as a blended component unit within the reporting entity, as further discussed in Note 2 below.

The accounting policies of the District substantially comply with the rules prescribed in the Texas Education Agency's (TEA) <u>Financial Accountability System Resource Guide</u> (Resource Guide). These accounting policies generally conform to generally accepted accounting principles applicable to governmental units.

1. Government-Wide and Fund Financial Statements

The government-wide financial statements (i.e., the statement of net assets and the statement of activities) report information on all of the non-fiduciary activities of the government. For the most part, the effect of interfund activity has been removed from these statements. Government activities, which normally are supported by taxes and intergovernmental revenues, are reported separately from business-type activities, which rely to a significant extent on fees and charges for support. There are no business-type activities reported for the District.

The statement of activities demonstrates the degree to which the direct expenses of a given function or segment is offset by program revenues. Direct expenses are those that are clearly identifiable with a specific function or segment. Program revenues include 1) charges to customers or applicants who purchase, use, or directly benefit from goods, services, or privileges provided by a given function or segment, and 2) grants and contributions that are restricted to meeting the operational or capital requirements of a particular function or segment. Taxes and other items not properly included among program revenues are reported instead as general revenues.

Separate financial statements are provided for governmental funds, proprietary funds, and fiduciary funds even though the latter are excluded from the government-wide financial statements. Major individual governmental funds are reported as separate columns in the fund financial statements.

#### 2. Measurement Focus, Basis of Accounting, and Financial Statement Presentation

The government-wide financial statements are reported using the economic-resources measurement focus and the accrual basis of accounting, as are the proprietary fund and fiduciary fund financial statements. Revenues are recorded when earned and expenses are recorded when a liability is incurred, regardless of the timing of related cash flows. Property taxes are recognized as revenues in the year for which they are levied. Grants and similar items are recognized as revenue as soon as all eligibility requirements imposed by the provider have been met.

Governmental fund financial statements are reported using the current financial resources measurement focus and the modified accrual basis of accounting. Revenues are recognized as soon as they are both measurable and available. Revenues are considered to be available when they are collectible within the current period or soon enough thereafter to pay liabilities of the current period. For this purpose, the District considers revenues to be available if they are collected within 60 days of the end of the current fiscal period. Expenditures generally are recorded when a liability is incurred, as under accrual accounting. However, debt service expenditures as well as expenditures related to claims and judgments, are recorded only when payment is due.

Property taxes and interest associated with the current fiscal period are considered to be susceptible to accrual and have been recognized as revenues of the current fiscal period. All other revenue items are considered to be measurable and available only when cash is received by the District.

The District reports the following major governmental funds:

• The General Fund is the District's primary operating fund. It accounts for all financial resources of the general government, except those required to be accounted for in another fund.

• The National School Lunch and Breakfast Fund is a special revenue fund used to account for resources restricted to, or designated for, child nutrition programs by the U.S. Department of Agriculture.

• The Debt Service Fund accounts for the resources accumulated and payments made for principal and interest on long-term general obligation debt of governmental funds.

Additionally, the District reports the following fund types:

• The Internal Service Fund accounts for workers' compensation insurance coverage provided to other departments of the District on a cost reimbursement basis.

• The Private-Purpose Trust Fund is used to account for resources legally held in trust for scholarships to be awarded to current and former students for post-secondary education. All resources of the fund, including any earnings on invested resources, may be used to support the activities listed in the preceding sentence.

• The Agency Fund accounts for assets held by the District in a purely custodial capacity. Since agency funds are custodial in nature (i.e. assets equal liabilities), they do not involve the measurement of operations.

Private-sector standards of accounting and financial reporting issued prior to December 1, 1989 generally are followed in both the government-wise and proprietary fund financial statements to the extent that those standards do not conflict with or contradict guidance of the Governmental Accounting Standards Board. Governments also have the option of following subsequent private-sector guidance for their internal service funds, subject to this same limitation. The District has elected not to follow subsequent private-sector guidance.

As a general rule the effect of inter-fund activity has been eliminated from the government-wide financial statements.

Proprietary funds distinguish operating revenues and expenses from non-operating items. Operating revenues and expenses generally result from providing services and producing and delivering goods in connection with a proprietary fund's principal ongoing operations. The principal operating revenues of the District's internal service fund is charged to the departments for workers compensation insurance. Operating expenses for the internal service fund include workers' compensation insurance claims, administration fees, and premiums paid to a governmental insurance risk management pool for stop-loss coverage. All revenues and expenses not meeting this definition are reported as non-operating revenues and expenses.

When both restricted and unrestricted resources are available for use, it is the District's policy to use restricted resources first, then unrestricted resources as they are needed.

#### 3. Cash and Cash Equivalents

The District's cash and cash equivalents are considered to be cash on hand, demand deposits, public funds investment pools, and short-term investments with original maturities of three months or less from the date of acquisition.

4. Investments

Investments are stated at fair value, except for money market and participating interest-earning investment contracts that mature within one year of the date of their acquisition and nonparticipating investment contracts that are stated at cost.

#### 5. <u>Receivables and Payables</u>

Activity between funds that is representative of lending/borrowing arrangements outstanding at the end of the fiscal year is referred to as either "due to/from other funds" (i.e., the current portion of inter-fund loans) or "advances to/from other funds"

(i.e., the non-current portion of inter-fund loans). All other outstanding balances between funds are reported as "due to/from other funds."

Advances between funds, as reported in the fund financial statements, are offset by a fund balance reserve account in applicable governmental funds to indicate that they are not available for appropriation and are not expendable available financial resources.

#### 6. <u>Supplies and Inventory</u>

Supplies and materials inventory is valued at average cost. The cost of inventory is recorded as an expenditure at the time individual inventory items are consumed.

#### 7. Capital Assets

Capital assets, which include land, buildings and improvements, furniture and equipment, and construction in progress, are reported in the government-wide financial statements. The District defines capital assets as assets with an initial, individual cost of more than \$5,000 and an estimated useful life in excess of two years. Such assets are recorded at historical cost or estimated historical cost if purchased or constructed. Donated capital assets are recorded at estimated fair market value at the date of donation.

The costs of normal maintenance and repairs that do not add to the value of the asset or materially extend assets lives are not capitalized.

Buildings and improvements, furniture and equipment, and vehicles are depreciated using the straight-line method over the following estimated useful lives:

<u>Assets</u>	<u>Years</u>
Buildings	50
Building Improvements	50
Furniture and Equipment	5 – 25
Vehicles	8 - 10

#### 8. <u>Compensated Absences</u>

District employees are entitled to vacation and sick leave days earned by them for services performed. Vacation days lapse at the end of each year and have not been accrued. Sick days do accumulate, but employees are not paid the benefits on termination or retirement if they are not used; consequently, the benefits have not been accrued.

#### 9. Long-Term Obligations

In the government-wide financial statements, long-term debt and other long-term obligations are reported as liabilities in the statement of net assets. Bond premiums and discounts are deferred and amortized over the life of the bonds using the effective-interest method. Bonds payable are reported net of the applicable bond premium or

discount. Bond issuance costs are reported as deferred charges and amortized over the term of the related debt.

In the fund financial statements, governmental fund types recognize bond premiums and discounts, as well as bond issuance costs, during the current period. The face amount of the debt issued is reported as other financing sources. Premiums received on debt issuances are reported as other financing sources, while discounts on debt issuances are reported as other financing uses. Issuance costs, whether or not withheld from the actual debt proceeds received, are reported as debt service expenditures.

#### 10. Fund Equity

In the fund financial statements, governmental funds report reservations of fund balance for amounts that are not available for appropriations or are legally restricted by outside parties for use for a specific purpose. Designations of fund balance represent tentative management plans that are subject to change.

#### 11. Data Control Codes

Data control codes refer to the account code structure prescribed by the TEA in the Resource Guide.

# Executive Summary

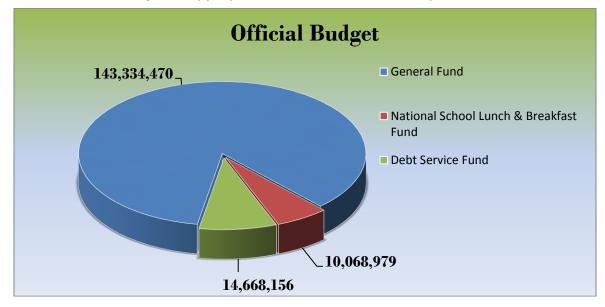

### **Executive Summary**

This document represents the Official Budget for the Waco Independent School District for the 2017-2018 fiscal year. Combined with the annual financial report, these documents are used to present the financial plan and the results of operations of the District.

Budgets for the General Fund, Food Service Fund, and Debt Service Fund must be included in the official district budget. These budgets must be prepared and approved, minimally, at the fund and function levels to comply with the state's legal level of control mandate. District's may prepare and approve budgets for other funds and/or at greater levels of detail at their discretion. Such local decisions may affect the need for budget amendments and financial reporting. Inclusion of budgets for grant programs is not required for a school district's officially adopted annual budget. The official budget is reported to the Texas Education Agency through the Public Education Information Management System (PEIMS) annually as prescribed in the system guidelines.

### The Official Budget

Under Texas Education Agency guidelines, the official budget, which funds most of the District's ongoing operations, includes budgets for the General Fund, Food Service Fund, and Debt Service Fund. Budgeted appropriations for the 2017-2018 year total \$168,071,605.

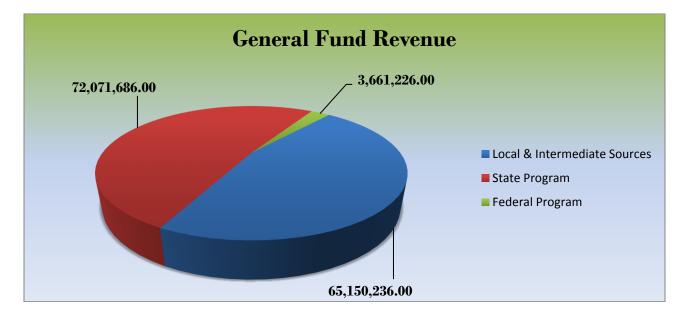

These funds are governmental fund types with budgetary control used to account for transactions resulting from on-going organizations and activities from a variety of revenue sources for which the fund balance is controlled by the District's actions. Governmental fund types utilize a modified accrual basis of accounting. Separate funds are used to maintain the integrity of specific revenue purposes, as required by law.

## **The General Fund**

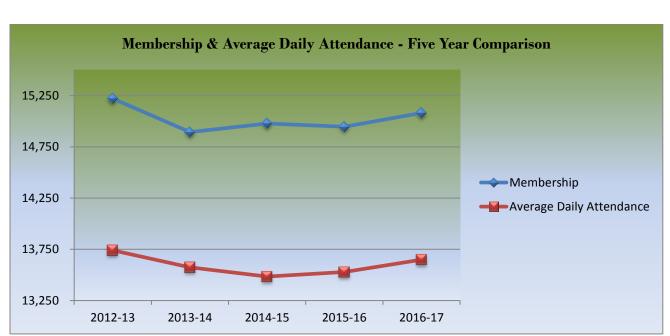

The General Fund is used to account for funds over which the District's Board of Trustees has wide discretion in their use as provided by law. The General fund includes transactions as a result of revenues from maintenance and operations taxes, investment income, state foundation entitlements and other federal programs revenue.

#### Revenues

As is typical of property-poor districts, our primary source of revenue is the State Foundation School Program and Available School Fund, which comprises about 51.16% of the General Fund's revenue. Another 46.24% comes from local and intermediate source revenue, primarily property taxes. The remaining 2.60% is generated from federal sources, such as Medicaid reimbursements and indirect cost recovery from federal grants.

The State Foundation School Program consists of three tiers of funding. Tier I revenue, which includes funding for mandated programs such as, gifted and talented education, career and technology education, services to student with disabilities, compensatory education and bilingual education is based primarily on the District's average daily attendance weighted for special populations. The 2017-18 budget is based on a projected average daily attendance of 13,669. The District's average daily attendance for 2016-17 school year was 13,528.

Tier II funding is designed to provide equalized funding for property-poor districts and yields a guaranteed funding level for districts across the state. Both Tier II and Tier III funding, which assists districts in funding existing debt and new construction of instructional facilities, depend greatly on a district's property value and local tax effort, i.e., tax collections.

As property valuations increase and State funding declines, the District becomes increasingly reliant on local sources of revenue, primarily property taxes, for financial support of its operations. The 2017-18 budget is based on a total tax rate of \$1.410000 per \$100 of property value. The 2016-17 rate will generate estimated tax collections of \$76.3 million, \$63.7 million in maintenance and operations for the General Fund with the remaining \$12.6 million servicing the District's bonded debt. The maintenance and operations rate of \$1.17000 and the product of the state compression percentage, as determined under Education Code 42.2516, multiplied by \$1.50.

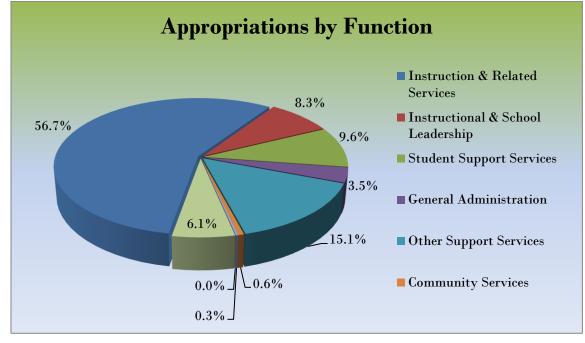

## Expenditures

Appropriation for District expenditures are categorized in several ways. As required by TEA regulation, the budget must be prepared and adopted by functional area. However, appropriations are also categorized by object of expenditure, organization, and by program intent.

#### **Expenditure by Function**

The following chart illustrates the breakdown of the General Fund budget by major functional categories. As would be expected, over half, 56.7% is appropriated for Instruction and Instructional Related Services, including classroom instruction, instructional resources and media services and curriculum and instructional staff development.

Another 9.6% has been appropriated for student support functions such as, guidance, counseling, and evaluation services, social work and attendance services, health services, student transportation and extracurricular activities. In fact, 66.3% of the General Fund budget is designated for functions with direct student impact.

Only 8.3% of the funds are budgeted for instructional and school leadership and 3.5% for general administration. Instructional and school leadership includes the cost of campus administration and centralized instructional administration. The latter costs, along with general administration, are considered in determining the District's administrative cost ratio. The District's administrative cost ratio for 2015-2016 was 9.7%, below the acceptable administrative cost ratio of 11.05% established by the Texas Education Agency for districts of comparable size.

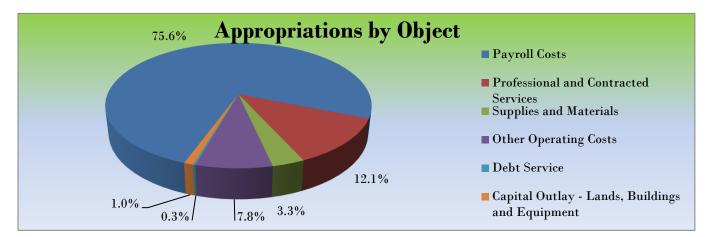

Other support services which indirectly impact students, make up 15.1% of the total budget. These services include the cost of plant maintenance and operations, including the cost of utilities, school safety and data processing services and information systems.

The remaining 7% of budgeted expenditures are allocated to ancillary services, funding the District's after school programs and other community partnerships; debt service; and intergovernmental charges. These intergovernmental charges represent transfers to other

governmental entities in support of the Juvenile Justice Alternative Education Program and a tax increment fund established under Chapter 311 of the Tax Code, in conjunction with other governmental entities in the city of Waco for the betterment of the community.

#### **Expenditure by Object**

Reviewing the District's budget by object of expenditure, we find that payroll costs, including the costs of employee benefits, make up over 75.6% of the budget. This concentration in salaries and wages is to be expected in a service-oriented organization. In addition, the District's commitment to small community schools tends to increase payroll costs, particularly in the area of campus support.

The Board approved a general compensation increase which is included in the 2017-18 proposed budgets. Employees paid on the Teacher schedule will receive an average increase of 1.1% for the 2017-18 school year. Employees paid on the Auxiliary, Clerical/Paraprofessional, and Administrative/Other Professional schedules will receive 1% increase on the appropriate midpoint.

The proposed budget also includes starting hourly rate adjustments for entry level auxiliary staff reflecting a 4.71% adjustment to the pay schedule for auxiliary staff compared to last year's entry level. The starting hourly rate for entry level auxiliary staff (Custodial and Cafeteria) will increase from \$9.55 to \$10.00. The paraprofessional, professional and administrative pay schedule also includes a slight increase compared to last year's. As beginning wages increase, the various points of each pay grade is also adjusted in order to maintain the integrity of the pay schedule.

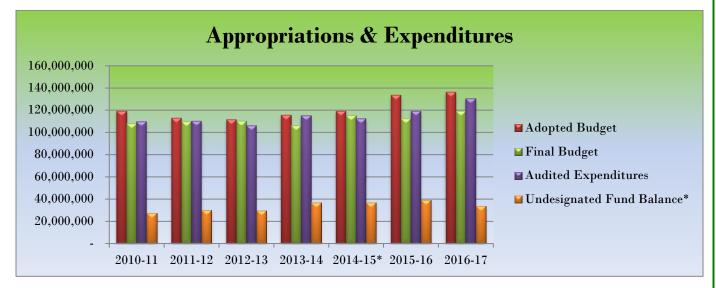

Professional and contracted services, which include utilities, telecommunication cost, legal, audit and tax collection fees, maintenance and repair services, comprise 12.1% of the budget. The remaining funds are budgeted for supplies and materials, including textbooks and testing materials, 3.3%, other operating expenditures such as travel, insurance and election cost, 7.8%, debt service payments, 0.3% capital outlay, 1.0%.

#### **Fund Balance**

Eighteen years ago, as the Waco Independent School District closed its books for fiscal year 1994-95; it found itself in a precarious position, financially. The total fund balance for the General Fund had dropped to just over \$0.5 million and all but \$49,000 of that was restricted and unavailable to fund future obligations. Since that time, the District has worked diligently to reestablish an adequate fund balance without negatively affecting instructional programs. As a result, the District anticipates a fund balance of over \$41 million to begin the 2017-2018 year, 81.14% of which is unrestricted and undesignated.

Most recently, excess fund balance has been utilized to fund numerous special projects during the school year. This planned, short-term use of the fund balance will not negatively impact the District's overall financial position.

### **Undesignated Fund Balance**

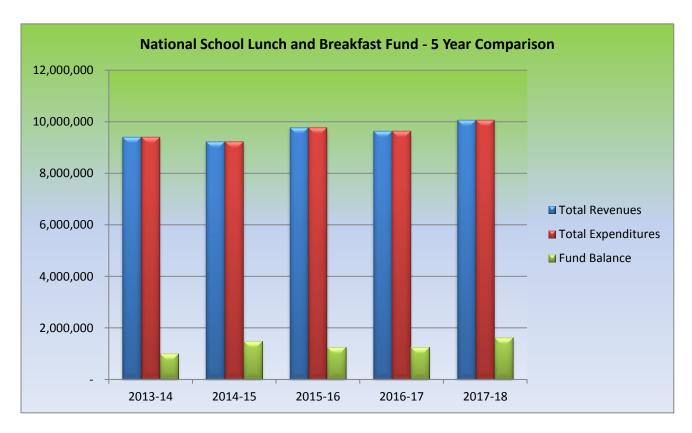

## THE NATIONAL SCHOOL LUNCH AND BREAKFAST FUND

The Texas Education Agency has set additional requirements for school district budgets. One of these requirements is that, regardless of fund type, the National School Lunch and Breakfast Fund must be included as a part of the Official Budget. Alternatively, the District may prepare and include other funds, at its discretion.

The District accounts for its food service program in a special revenue fund. Because of the District's demographics, over 90% of the program's revenues are generated through the federal government's National School Lunch and Breakfast Program.

For many years, declining participation coupled with rising costs resulted in an increasing deficit in the Child Nutrition Program. In an effort to curb this trend, the District outsourced the management of its food services. Sodexo Inc. and Affiliates that manage the program undertook major steps to promote efficiency and decrease costs in the 2002-2003 school year, their goal being to eliminate the deficit within three years. Falling just short of breaking even in 2002-03, the company refunded \$ 45,000 to the District in order to maintain the beginning fund balance. In 2005-06, the goal was reached of eliminating the deficit. It is anticipated that in 2017-18 the District will achieve a break even position, which continues this practice of efficiency and decreasing cost.

## THE DEBT SERVICE FUND

Debt service funds are established to fund a district's bonded debt payments for principal and interest. Until recently, debt was serviced totally through the Interest and Sinking (I&S) portion of the tax rate. Beginning in the 1999-2000 fiscal year, the State funding formula included a Tier III funding allotment to assist school districts with facilities acquisitions and improvements. Tier III consists of two programs, the Existing Debt Allotment (EDA) and the Instructional Facilities Allotment (IFA). These programs fund debt acquired in the acquisition of facilities and, like Tier II funding, are based on a district's average daily attendance, property values, and tax collection efforts.

With the authorization of the Existing Debt Allotment in 2001-02, the District was able to lower the debt portion of the tax rate from \$ 0.1400 to \$ 0.1253. The following year, the rate was again lowered to \$ 0.1185. In spite of the negative impact of rising property values in the past three years, the District maintained that rate through 2005-06. In 2006-07, the district raised the debt portion of the tax rate from \$ 0.1185 to \$ 0.1220 and maintained that rate for 2007-08. In 2008-09, the district raised the debt portion of the tax rate from \$ 0.1220 to \$ 0.319099. In 2009-10, the district raised the debt portion of the tax rate from \$ 0.319099 to \$ 0.3263. In 2010-11, the district lowered the debt portion of the tax rate from \$ 0.3263 to \$ 0.324750. In 2011-12, the district lowered the debt portion of the tax rate from \$ 0.324750 to \$ 0.320998. In 2012-13, the district lowered the debt portion of the tax rate from \$ 0.320998 to \$ 0.315180. In 2013-14, the district decreased the debt portion of the tax rate from \$ 0.315180 to \$ 0.31480. In 2014-15, the district decreased the debt portion of the tax rate from \$ 0.31480 to \$ 0.31324. In 2015-16, the district decreased the debt portion of the tax rate from \$ 0.31324 to \$ 0.27324. In 2016-17, the district decreased the debt portion of the tax rate from \$0.27324 to \$ 0.23000. In 2017-18 the district increased the debt portion of the tax rate from \$0.23000 to \$0.24000.

### **OTHER SPECIAL REVENUE FUNDS**

In addition to the National School Lunch and Breakfast Fund, the District's Special Revenue Funds also include a multitude of funds established to account for revenues (and their related expenditures) designated for special purposes. These funds primarily consist of entitlement grants (grants that are allotted by the Texas Education Agency on a per capita basis and designated for specific student populations) but do include a number of competitive grant awards, as well as, campus activity and donated funds.

Although not required, budgets should be established and used for all grant programs. The budget is a financial blueprint of the grant program's goals and objectives. It limits the amount and type of expenditures to those that have been approved and provides a basis for evaluating and reporting actual and budgeted amounts. This information reflects the performance of the programs.

The majority of the grants are federal grants funded through the Department of Education. Federal grants like ESEA Title I, Part A continue to fund supplemental programs that aid our students. Special Education population receives aid from IDEA B Formula and Preschool grants to meet the needs of their students. A primary source of funds for recruiting, hiring, and retaining highly qualified teachers and principals and pupil service personnel is the ESEA Title II, Part A, Teacher and Principal Training and Recruiting Fund.

The State continues to fund the State Deaf and the Regional School for the Deaf which meets the needs of the physically challenged students within the surrounding districts with which we have shared services agreements.

The District also applies and is awarded a number of competitive grants from Federal, State, and Local sources. Budgets for these grants are placed as awarded. Budgets for these other Special Revenue Funds are not included in this document as part of the Official Budget.

Account Code Element Definitions

### **Fund Codes**

### **GOVERNMENTAL FUNDS**

Governmental fund types for Texas school districts consist of four governmental fund groups (General, Special Revenue, Capital Projects and Debt Service) that account for the acquisition, use and balances of expendable financial resources and related liabilities as required by law or rule. The  $\mathcal{R}$  by a fund indicates that the fund is required for reporting purposes (PEIMS and/or Annual Financial and Compliance Report) if such funds are applicable to the school district.

### **GENERAL FUNDS**

The general fund is a governmental fund with budgetary control which is used to show transactions resulting from operations of on-going organizations and activities from a variety of revenue sources for which fund balance is controlled by and retained for the use of the local education agency. The general fund utilizes the modified accrual basis of accounting. To maintain separate revenue and expenditure accounts to assure the integrity of specific revenue purposes when required by law or rule, the general fund is to employ the classifications defined below.

#### $\mathcal{R}$ **101** FOOD SERVICE

This classification is to be used by the school district for a food service program, under certain circumstances.

The Food Service Fund is considered a part of the General Fund if it meets the following criteria:

\* No user fees are charged; i.e., students are not charged for meals, and

\* Participation in the National School Lunch Program (NSLP) is not a factor. Whether the school district participates or not, the General Fund subsidizes the Food Service Fund for all amounts required in excess of the NSLP reimbursements

The fund balance of the Food Service Fund may not exceed three months of food service operations, and such balances are to be used exclusively for allowable child nutrition program purposes. (10.553,

breakfast; 10.555, lunch) (Note: See Fund Codes 240 and 701 which are alternative methods of accounting for Food Service Funds, depending on the guidelines established by the school district.)

The Summer Feeding Program funded by the Department of Human Services (DHS) is not to be classified in this fund, but rather in the Special Revenue Fund Code 242.

#### *R* **102** ESC STATE SUPPORT (EDUCATION SERVICE CENTERS ONLY)

This classification is to be used by an education service center to account, on a project basis, for funds to provide for the general operation of the education service centers and to develop, maintain, and deliver core services for student and school district performance or other areas identified by the Commissioner of Education.

#### **103-160 RESERVED FOR FUTURE STATE DEFINITION**

These classifications are reserved for future state designation and are not to be used by the school district.

#### **161-198 LOCALLY DEFINED CLASSIFICATIONS**

These classifications are used, at the option of the school district, to further classify specific revenues and related expenditures for local requirements. For PEIMS reporting these accounts are converted to Fund 199.

#### $\mathcal{R}$ 199 GENERAL FUND

This classification must be used to account for funds in which the local governing board designates. The local governing board has wide discretion in their use as provided by law. This fund usually includes transactions as a result of revenues from local maintenance taxes, payments in lieu of taxes, foundation entitlements, State and County available and other Foundation School Program sources which are not identified on warrants for foundation entitlements. This fund classification is also used to record transactions involving the instructional facilities allotment for lease-purchase related purposes (Fund Code 699, Debt Service Fund, is used to record transactions involving the FSP instructional facilities allotment for bonded indebtedness (voter approved debt) related purposes). Any locally defined codes that are used at the local option are to be converted to Fund 199 for PEIMS reporting.

### **SPECIAL REVENUE FUNDS – FEDERAL PROGRAMS**

Special revenue funds are governmental funds used to account for the proceeds of specific revenue sources that are legally restricted to expenditures for specified purposes. This excludes expendable trusts and major capital projects. These funds utilize the modified accrual basis of accounting.

This group of funds is used to account for federally funded special revenue funds. Member districts of shared services arrangements are to use these codes to account for the member district portion of a shared services arrangement. Each federal fund has a number assigned in the Catalog of Federal Domestic Assistance (CFDA). These numbers are reflected at the end of the definition of each fund. For those funds that are administered by the Texas Commission on Alcohol and Drug Abuse (TCADA), the appropriate TCADA code is also designated.

Federal Programs that are used by school districts and education service centers not acting as a fiscal agent for a shared services arrangement are designated by Fund Codes 201 through 289. Most, but not all, of these funds must be applied for through a Standard Application System (SAS).

### **DEBT SERVICE FUNDS**

A debt service fund is a governmental fund, with budgetary control, that must be used to account for general longterm debt principal and interest for debt issues and other long-term debts for which a tax has been dedicated. A separate bank account must be kept for this fund. Principal and interest payments for operating indebtedness including warrants, notes, and short-term lease-purchase agreements, are to be made from the fund for which the debt was incurred. This fund utilizes the modified accrual basis of accounting.

#### **501-510 RESERVED FOR FUTURE STATE DEFINITION**

These fund classifications are reserved for future state designation and are not to be used by the school district.

#### **511-598 DEBT SERVICE FUNDS - LOCALLY DEFINED**

#### $\mathcal{R}$ 599 DEBT SERVICE FUNDS

School districts are encouraged to use locally defined debt service funds (Fund Codes 511-598) to provide separate accountability for each type or issue of debt and convert these accounts to Fund 599 for PEIMS reporting. This fund classification is also used to record transactions involving the FSP instructional facilities allotment for bonded indebtedness (voter approved debt) related purposes (Fund Code 199, General Fund, is used to record transactions involving the instructional facilities allotment for lease-purchase related purposes).

### **CAPITAL PROJECTS FUNDS**

A capital projects fund is a governmental fund that must be used to account, on a project basis, for projects financed by the proceeds from bond issues, or for capital projects otherwise mandated to be accounted for in this fund. The capital projects fund utilizes the modified accrual basis of accounting.

#### **601-615 RESERVED FOR FUTURE STATE DEFINITION**

#### *R* **699 CAPITAL PROJECTS FUNDS**

This fund classification is used to combine all capital projects funds for reporting. It is recommended that each capital project be recorded in a locally defined fund (Fund Codes 616 through 698) and converted to Fund 699 for PEIMS reporting.

### **PROPRIETARY FUNDS**

These types of funds are used to account for a school district's on-going organizations and activities where net income and capital maintenance are measured. All related assets, liabilities, equities, revenues, expenses, non-operating revenues and expenses, and transfers are accounted for through the fund affected. Generally accepted accounting principles that apply to similar businesses in the private sector are applicable to proprietary type funds, as net income and financial position are to be determined. These funds utilize the accrual basis of accounting.

There are two proprietary fund types, enterprise funds and internal service funds. A budget is not required to be approved by the school district's Board of Trustees for proprietary fund types except for a child nutrition program accounted for under Fund 701. Fund 701 is the only proprietary fund type to be reported to the state through PEIMS.

### **ENTERPRISE FUNDS**

An enterprise fund is a proprietary fund type accounted for on the accrual basis and not required to be budgeted. The exception is for child nutrition operations accounted for in an enterprise fund in accordance with generally accepted accounting principles for which a budget is to be submitted to the state through PEIMS. Generally accepted accounting principles of the private sector are applicable, as financial position, results of operations and cash flows are to be determined.

Expenses of an enterprise operation, including depreciation, are generally intended to be financed or recovered primarily through user charges rather than from government grants or subsidies. An example of an operation to be accounted for in the Enterprise Fund is a school district-owned concession stand that serves the general public at school sponsored events, and the primary intent of operations is to realize a profit as a result of sales. Fund Codes 701-749 are used to account for enterprise funds.

### $\mathcal{R}$ 701 ENTERPRISE FUND - NATIONAL SCHOOL BREAKFAST AND LUNCH PROGRAM (REPORT BUDGET AND ACTUAL EXPENDITURES THROUGH PEIMS)

This fund classification is to be used to account for budgeted food service operations. This fund is used when a school district intends for the food service operations to be financed from the NSLP program and user charges, rather than from general fund subsidies. Summer feeding programs funded by the Department of Human Services (DHS) are Special Revenue funds and should be accounted for in Fund 242. (10.553, breakfast; 10.555, lunch)

#### **702-710 RESERVED FOR FUTURE STATE DEFINITION**

These fund classifications are reserved for future state designation and are not to be used by the school district.

#### 711-748 ENTERPRISE FUNDS - LOCALLY DEFINED

These fund classifications are used, at the option of the school district, to account for enterprise funds not defined elsewhere. (Not Reported to PEIMS—Convert to 749 for PEIMS Payroll Reporting Only)

### $\mathcal{R}$ 749 ENTERPRISE FUNDS (ONLY REPORTED TO PAYROLL RECORD IN PEIMS)

This fund classification is used to classify enterprise funds not defined elsewhere.

### **INTERNAL SERVICE FUNDS**

Internal service funds are a proprietary fund accounted for on the accrual basis. No budget is required for internal service funds. These funds are not required to be reported in data submitted through PEIMS to TEA except the payroll data. Internal service funds apply the same generally accepted accounting principles as the Enterprise Fund.

This fund type may be used to account for the financing of goods or services provided by one organizational unit of the school district to other organizational units of the school district, or to other local education agencies or governmental units, on a cost reimbursement basis. An example of an internal service fund is a school district-operated print shop.

School districts may, at their option, utilize local detail codes to further account for internal services. According to Governmental Accounting Standards Board Statement No. 10, public entity risk pools are required to be accounted for in the Internal Service Fund. A public entity risk pool is a shared services arrangement group of governmental entities joined together to finance an exposure, liability, or risk, such as employee health care, general liability, unemployment compensation and workers' compensation. Fund Codes 751 through 799 are used to account for internal service funds.

#### $\mathcal{R}$ 751 TRANSPORTATION (NOT REPORTED TO PEIMS)

This fund classification is used to account for transactions related to transportation services provided to other organizational units of the school district or to other school districts or governmental units on a cost-reimbursement basis. (This fund is used at the option of the school district to facilitate allocation of these costs to other accounts.)

#### $\mathcal{R}$ 752 **PRINT SHOP (NOT REPORTED TO PEIMS)**

#### $\mathcal{R}$ 755 PUBLIC ENTITY RISK POOL (NOT REPORTED TO PEIMS)

This fund classification is used to account for transactions related to a public entity risk pool. Public entity risk pools are required to be accounted for in the Internal Service Fund. A public entity risk pool is a shared services arrangement group of governmental entities joined together to finance an exposure, liability, or risk, such as employee health care, general liability, unemployment compensation and workers' compensation. If a school district is fiscal agent for more than one type of risk pool, locally defined funds may be used to provide appropriate accounting.

These fund classifications are reserved for future state designation and are not to be used by the school district.

#### 770-798 INTERNAL SERVICE FUNDS - LOCALLY DEFINED (NOT REPORTED TO PEIMS)

### FIDUCIARY FUND TYPES AND SIMILAR COMPONENT UNITS

This group of funds is used to account for assets held by a school district in a trustee capacity, or as an agent for individuals, private organizations, and other governmental units. This fund type consists of pension trust funds, investment trust funds, private-purpose trust funds, and agency funds. It should be noted that substantially all Texas school districts provide benefits through the Teacher Retirement System of Texas and do not provide benefits through a local pension trust fund.

### **TRUST FUNDS**

These fiduciary funds are accounted for on the economic resources measurement focus and the accrual basis of accounting except for the recognition of certain liabilities of defined benefit pension plans and certain post-employment healthcare plans (refer to GASB 25 and 26 for guidance on recognition of these liabilities). Trust funds are not to be reported through PEIMS. Fund Codes 801 through 829 are used to account for private-purpose trust funds.

#### 810 PRIVATE-PURPOSE TRUST FUNDS - LOCALLY DEFINED (NOT REPORTED TO PEIMS)

These fiduciary funds are accounted for on the economic resources measurement focus and the accrual basis of accounting. Reporting activities focus on net assets and changes in net assets. for post-secondary education purposes. Private-purpose trust funds are not reported through PEIMS. Fund Codes 801 through 829 are used to account for private purpose trust funds.

Reporting activities focus on net assets and changes in net assets. Funds 851 through 859 are used to account for Pension and Other Employee Benefit Trust Funds.

#### 851-858 PENSIONS AND OTHER EMPLOYEE BENEFIT TRUST FUNDS - LOCALLY DEFINED

#### (NOT REPORTED TO PEIMS)

These fund classifications are to be used for locally defined pension and Other Employee Benefit trust funds.

859 PENSIONS AND OTHER EMPLOYEE BENEFIT TRUST FUNDS (NOT REPORTED TO PEIMS) This fund classification is used to account for pension and other employee benefit funds not specified elsewhere.

### **AGENCY FUNDS**

These funds are accounted for on the economic resources measurement focus and the accrual basis of accounting. These funds are held in a custodial capacity by a school district, and they consist of funds that are the property of students or others. Agency funds do not involve measurement of results of operations, and they have no fund equity, because assets are equal to liabilities.

Examples of agency funds include class funds that are the property of the students. Locally raised revenues used for general operating purposes, such as certain principal's activity accounts, are not agency funds, and are to be budgeted and accounted for in the Special Revenue Fund, or in some instances, in the General Fund. Furthermore, deferred compensation funds are to be accounted for in the agency fund if the district serves as trustee of the plan. The agency funds are not to be reported through PEIMS. Fund Codes 861 through 899 are used to account for agency funds.

### $\mathcal{R}$ 861 AGENCY FUND FOR TAX COLLECTIONS (NOT REPORTED TO PEIMS)

This fund classification is used by a school district to account, on the economic resources measurement focus and the accrual basis, for taxes that are collected on behalf of another taxing unit, including Consolidated Taxing Districts. # **Revenue Account Codes**

Revenues are defined as an increase in a school district's current financial resources. These codes are distinguished from other types of object codes as they always begin with the digit "5".

The school district's accounting records are to reflect revenues at the most detail level, as depicted in the chart of accounts (4 digits) for accounting and Public Education Information Management System (PEIMS) reporting (both budget and actual) purposes. If a school district needs to use codes in addition to the mandatory codes for managerial purposes, the optional codes provide for local use in the code structure should be used.

The  $\mathcal{R}$  by a code indicates that the code is required for reporting purposes (PEIMS and/or Annual Financial and Compliance Report) if such codes are applicable to the school district

Governmental Accounting Standards Board (GASB) Codification 1600.106 states that revenues and governmental fund financial resource increments are recognized when they are susceptible to accrual, which means they must be both measurable and available. Revenues are measurable when the amount of the revenues is subject to reasonable estimation. To be available, revenues must be subject to collection within the current period, or after the end of the period but in time to pay liabilities outstanding at the end of the current period.

Revenues recorded in the Proprietary Fund Type and similar trust funds are recognized when earned in essentially the same manner as in commercial accounting.

School districts must account for a variety of revenues, including property taxes, foundation fund entitlements, user charges and grants.

Revenue object codes are four-digit object codes, and are the sixth through ninth digits in the code structure.

At the end of the period this account is closed to Fund Balance. This control account is to be used at the option of the school district.

# **Expenditure Account Codes**

Expenditures/expenses should be classified by the major object classes according to the types of items purchased or services obtained.

An expenditure/expense account identifies the nature and object of an account, or a transaction. The school district's accounting records are to reflect expenditures/expenses at the most detail level, as depicted in the chart of accounts (4 digits) for accounting and Public Education Information Management System (PEIMS) reporting (actual data) purposes. For PEIMS budget reporting purposes, expenditures/expenses are reported to the second digit of detail (6100, 6200, etc.) If a school district needs to use codes in addition to the mandatory codes for managerial purposes, the optional codes provided for local use in the code structure should be used.

These codes are distinguished from other types of object codes as they always begin with the digit "6." The

 $\mathcal{R}$  by a code indicates that the code is required for reporting purposes (PEIMS and/or Annual Financial and Compliance Report) if such codes are applicable to the school district.

#### **EXPENDITURES (GOVERNMENTAL FUND TYPES AND EXPENDABLE TRUST FUNDS)**

Expenditures are debited in the accounting period in which a measurable fund liability is incurred, except for un-matured principal and interest on general long-term debt, prepaid items, and other long-term obligations which are recorded as a debit in the accounting period when due.

#### EXPENSES (PROPRIETARY FUND TYPE, NONEXPENDABLE TRUST AND PENSION TRUST FUNDS)

Expenses are debited in the accounting period in which they are incurred.

Expenditure/expense codes are four-digit object codes, and are the sixth through ninth digits in the code structure.

## **6000 EXPENDITURE/EXPENSE CONTROL ACCOUNTS**

These codes consist of accounts that summarize appropriated (budgeted) and actual (realized) expenditures/expenses. These are optional codes and accounts that may be used in financial accounting applications for school districts.

#### 6020 ENCUMBRANCES - CONTROL - LOCALLY DEFINED

This account code is debited for the amounts encumbered and credited for encumbrances liquidated during the fiscal year. The postings of the expenditures / expenses in the detail subsidiary ledger accounts for actual expenditures / expenses must be equal to this Expenditures / Expenses - Control Account. At the end of the fiscal year, this account is closed to the appropriate fund equity account(s)

## **6100 PAYROLL COST ACCOUNTS**

This major classification includes the gross salaries or wages and benefit costs for employee services. An employee is paid a salary or wage. Although an employee may work with more than one supervisor subsequent to, during, or after the normal employment period of hours, if the services or tasks performed are at the general direction of the school district, the amount paid to that employee is considered a payroll cost.

#### **6110-6119 TEACHERS AND OTHER PROFESSIONAL PERSONNEL**

For school districts that utilize the general or special revenue fund to account for the food service program, commodities are to be recorded in the revenue code 5923. (10.555)

• Purchased products for which you receive no USDA commodity equivalent. An example of products that a school would purchase commercially but would not receive as a USDA commodity would be condiments such as catsup and mustard. It is suggested that you base the inventory value for such items on the net purchase price for that item.

• USDA commodity products for which you purchase no commercial equivalent. Examples of USDA commodities that schools receive but usually do not purchase commercially include pouched salmon, frozen diced chicken and prune puree. TDHS will continue to provide you with the value of USDA commodities, which is based on the actual cost per pound.

• Products that you purchase as well as receive as commodities. Canned fruits and vegetables are examples of such products. You may base the value of these products on the net cost to purchase such products, on the commodity value provided by TDHS, or you could also use an average of weighted average of the two values.

# **Organization Codes**

An organization is a group of employees who are obligated to complete a specific responsibility. Usually, an organization has an identifiable leader or an individual who is accountable for the overall completion of the responsibility.

There are two distinct types of organization units: (1) a campus organization unit, which usually is a group of employees who are obligated to complete the responsibilities of the teaching of, supporting the teaching of and providing the necessary services (such as social services and health services) to a set of students; and (2) an administrative or other organization unit which is a group of people who perform a specific responsibility such as those in the superintendent's office, the school board or those who perform the business functions for the school district. An organization does not necessarily correspond with a physical location. The activity, not the location, defines the organization. For example, a high school computer science class might be taught at the central administration office, in which case, the appropriate high school organization code would be assigned.

Accurate use of organization codes is essential for payroll under function 11, Instruction. School districts are to use organization codes in all functions when a cost is clearly attributable to a specific organization. For those costs that are not clearly attributable to specific organization codes, districts will use organization codes 998 (Unallocated, at the local option) or 999 (Undistributed). Refer to Appendix 6 for a chart depicting required organization accounting by expenditure object code and function. Guidance is provided on other methods of allocating costs other than direct recording in the Cost Accounting section of this module.

## **CAMPUS ORGANIZATIONS**

A campus organization unit is usually a group of employees who are obligated to complete the responsibilities of the teaching of, supporting the teaching of and providing the necessary services (such as social services and health services) to a set of students.

Campus organization codes as defined in the Texas School Directory are to be used for all other costs clearly attributable to a specific organization. Other costs may be coded to a specific organization or school districts may utilize the TEA-provided cost allocation formula for cost charged to organization code 999 (Undistributed).

With the advent of site-based decision-making and campus accountability, it has become necessary for school districts to provide financial information at all levels of the decision making process. Specifically, a new emphasis is being placed upon providing information on the use of public resources at the campus and program to facilitate legislative budgetary decisions. An impact of the development of the financial accountability system is the reorganization of the system of certain information and collection processes and the redefinition of some of the basic data elements to ensure that campus level payroll costs are appropriately identified.

School districts are mandated to record payroll costs by campus level for educational personnel including professional and paraprofessional personnel where the cost is clearly attributable to a specific organization. The criteria to determine if the payroll costs of such personnel should be recorded to a particular campus/organization is as follows:

The individual must be dedicated to the day-to-day operations of the campus (partially or fully) and be under the direct or indirect supervision of the campus principal. Personnel that would be recorded to a campus would generally include:

- \* Classroom teachers
- \* Teacher aides
- \* Classroom assistants
- \* Librarians Principals
- \* Counselors
- \* Social workers

However, the above is not an all-inclusive list of personnel.

Payroll costs of substitute teachers may be coded to a campus or to the Undistributed Organization Unit (999). On-Behalf Teacher Retirement Payments may be coded to a campus or to the Undistributed Organization Unit (999).

Use the campus numbers defined in the Texas School Directory for the school district. As new campuses are opened, TEA is to be notified and a new campus number will be assigned.

# R 750ORGANIZATION UNITS - INDIRECT COSTS IN FUNCTION 41 (GENERAL<br/>ADMINISTRATION), INCLUDING BUSINESS OFFICE/ PERSONNEL/ PAYROLL/<br/>HUMAN RESOURCES/PURCHASING

Use this organization code for all expenditures related to costs attributed to business office, personnel, payroll, human resources and purchasing functions in General Administration (Function 41) of the school district.

These costs are considered indirect costs when calculating the indirect cost rates. School districts may, at the local option, use codes 726-749 to account for these areas separately.

Those data processing charges that relate to administrative applications and are classified in Function 53 (Data Processing) should use this organization unit as well. See the Calculation of Indirect Cost Rate section for further guidance.

#### *R***751** FISCAL AGENT SHARED SERVICES ARRANGEMENTS

#### *R* **998** UNALLOCATED ORGANIZATION UNIT

This organization unit may be used, at the option of the school district, for any costs which the district does not wish to be allocated according to the formula developed by TEA, i.e., costs that should not be allocated to various campus organizations and program intents based upon instructional FTEs.

Such costs may be charged to a specific program intent; however, if they are charged to the Undistributed Program Intent Code (99), they will not be allocated. Since these costs will not be distributed to campus organizations or program intents, they will not be considered in monitoring compliance for indirect costs, maintenance of effort, and comparability requirements, unless charged to a specific Enhanced Program Intent Code.

#### *R* **999** UNDISTRIBUTED ORGANIZATION UNIT

Use this organization code for any undistributed costs, i.e., costs that are not a campus or summer school or an administrative unit (Function 41).

## **Program Intent Codes**

These codes are used to account for the cost of instruction and other services that are directed toward a particular need of a specific set of students. The intent (the student group toward which the instructional or other service is directed) determines the program intent code, not the demographic makeup of the students served. In the case of state programs, state law may determine the intent and the permissible use of allotments. For state programs, the limitations on the amount of allotments that may be used for indirect costs will need to be considered. Districts are encouraged to monitor expenditures to assure that the limitation on indirect costs is observed, and steps should be taken if necessary to meet these requirements. For additional guidance in the areas of direct and indirect costs, please consult the State Board of Education rules. Consistent with legislative intent, it is the policy of TEA to provide maximum flexibility to school districts will be afforded the opportunity to address any issues which may arise. School districts should consider the implications of some federal requirements (e.g., maintenance of effort and comparability) when determining local policies on the minimum level of coding expenditures.

TEA provides software in PEIMS EDIT+ containing a formula to allocate costs recorded in Program Intent Code 99, Undistributed, according to instructional FTEs (as reported in PEIMS) assigned to Basic and Enhanced Program Intent Codes. The formula-based allocation will be used for state and federal compliance monitoring purposes, such as monitoring indirect costs, maintenance of effort and comparability requirements. Compliance with indirect cost requirements in state law will be monitored by TEA using allocated cost information in PEIMS. This information will include costs assigned to specific program intent codes and those costs which are allocated by the formula to specific program intent codes for functions specified in State Board of Education rules relating to indirect costs. The allocation process is a report type of template and does not change transaction information within the general ledger system. The allocation process uses payroll and staff data for instructional FTEs, as recorded under function 11, Instruction, as a basis to allocate costs. Accordingly, full use of specific program intent codes in function 11 is essential for the optimum functionality of the allocation process. Shared Services Arrangements cost information which is submitted on a special PEIMS record will also be included in the compliance monitoring calculations. The total costs which will be considered for compliance monitoring purposes are represented by the following formula.

Expenditures coded by the school district to specific Enhanced PICs + Allocations of expenditures + to Enhanced PICs from the Undistributed PIC (99) based upon instructional FTEs

Expenditures associated with a school district as a member of a shared services arrangement which are coded to specific Enhanced PICs

 Total expenditures used for monitoring purposes such as maintenance of effort, comparability and compliance with State Board of Education rules on indirect costs

## **1X BASIC SERVICES**

A Basic or Enhanced Program Intent Code is to be charged with costs directly attributable to it. In some cases, this may require the allocation of costs among several program intent codes. However, the allocation of costs should be performed only when, in the judgment of school district management, there would be a material effect on the financial records of either an individual transaction or the total amount of a certain type of transaction. Consideration should also be given to the effort involved in gathering the information necessary to perform the allocation compared to the benefit derived from the allocation of costs.

If a school district elects not to allocate costs to Basic or Enhanced Program Intent Codes or the Athletics and Related Activities Program Intent Code, the Undistributed Program Intent Code 99 is to be used.

#### *R***11** BASIC EDUCATIONAL SERVICES

## **2X ENHANCED SERVICES**

A Basic or Enhanced Program Intent Code is to be charged with costs directly attributable to it. In some cases, this may require the allocation of costs among several program intent codes. However, the allocation of costs should be performed only when, in the judgment of school district management, there would be a material effect on the financial records of either an individual transaction or the total amount of a certain type of transaction. Consideration should also be given to the effort involved in gathering the information necessary to perform the allocation compared to the benefit derived from the allocation of costs.

# R 30TITLE I, PART A SCHOOLWIDE ACTIVITIES RELATED TO STATE<br/>COMPENSATORY EDUCATION (SCE) AND OTHER COSTS ON CAMPUSES WITH<br/>40% OR MORE EDUCATIONALLY DISADVANTAGE STUDENTS

The SCE costs incurred to supplement federal awards for use on Title I, Part A schoolwide campuses with at least 40% educationally disadvantaged students (including fund code 211,) in the amount of the SCE allotment used to supplement federal awards. This program intent code is also used in the Special Revenue Fund for fiscal budgets approved in notice of grant awards (NOGA) for schoolwide federal projects benefiting Title I, Part A schoolwide campuses with at least 40% educationally disadvantaged students.

State law provides flexibility with the use of SCE funds on Title I, Part A campuses at which at least 40% of the students are educationally disadvantaged. SCE funds used to support a Title I, Part A program must be part of the campus budget and all SCE expenditures must be tracked back to the SCE fund code, and all generally accepted accounting principles must be followed. As with Title I funds, SCE funds used to upgrade the educational program must also meet the same guidelines required of NCLB in that SCE funds may only be used to incorporate instructional strategies that scientifically-based research has shown are effective with teaching low-achieving students.

SCE funds may be used on a Title I, Part A Schoolwide campus to upgrade the educational program where the actual poverty percentage of the campus is 40% or greater as long as the SCE funds allocated to the campus are supplemental to the costs of the regular education program. To determine a campus' poverty percentage, school districts will use the same auditable poverty data used for Title I, Part A for identifying Title I campuses in the NCLB Consolidated Application for Federal Funding, located on the Title I Campus Selection Schedule. The use of these funds must be described and evaluated in the schoolwide campus improvement plan.

Although activities conducted with SCE funds may be used to support the Title I program, the campus must continue to receive its fair share of state and local funds for conducting the regular education program, and the intent and purpose of the SCE Program must still be met.

Program Intent Code 30 Costs to Include:	Program Intent Code 30 Costs to Exclude (with Correct Program Intent Code):
<ul> <li>SCE costs incurred to implement the following eight components of a Title I, Part A schoolwide program:</li> <li>(1) A comprehensive needs <ul> <li>assessment of the entire school, including the needs of any migratory children in attendance. This assessment is based on information about the achievement of children in relation to the Texas state Academic Standards (TAKS). It should identify gaps between the current status of the school and its vision of where it wants to be, relative to key indicators or focus areas. Data obtained from the needs assessment provide the foundation for the goals of the comprehensive schoolwide plan</li> </ul> </li> <li>(2) Schoolwide reform strategies that: provide opportunities for all children to meet the state's academic standards, particularly low- achieving children. The schoolwide plan also should address how the school will determine if student needs have been met.</li> </ul>	<ul> <li>SCE costs incurred relating to:</li> <li>* Basic and supplemental services a AEPs and DAEPs</li> <li>* SCE costs incurred to provide supplemental services in support Title I, Part A targeted assistance program. #### $\mathcal{R}$ 31 HIGH SCHOOL ALLOTMENT (EFFECTIVE FISCAL YEAR 2009/10

This program intent code is to be used to account for the \$275 per high school student to prepare students to go on to higher education, encourage students to take advanced academic course work, increase the rigor of academic course work, align secondary and postsecondary curriculum and support promising high school completion and success initiatives in grades 6 through 12. If the district meets certain college readiness and completion rate standards, there are less restrictions on how the funds are spent – see TEC 39.234.

This amount is not paid separately, but is combined with other Foundation School Program funds. The breakdown of the amount is provided on the Summary of Finance for journal entry purposes.

See the <u>High School Allotment</u> section of the HB1 implementation page for general information and a link to TAC 61 for rules on high school allotment.

The PIC is to be used beginning in fiscal year 2009/10 with fund 199 to align with the movement to Tier I funding; however, before that time it may be coded to fund 428 to record any remaining fund balance at the end of fiscal year 2008/09.
