

## **112.1 STRATEGIC PLANNING**

The School Board recognizes the value of strategic planning to continuous school improvement and District accountability. Strategic planning maintains focus on the District mission and vision as well as to direct the District's attention and resources on identified and prioritized long- and short-term goals.

The strategic planning process shall involve representation from the various District stakeholder groups – school board members, administrators, teachers, school support staff, students, parents and other community members.

It shall be the responsibility of the District Administrator to select strategic planning team members, to inform them of their role in the strategic planning process and of related operating procedures, and to ensure that the strategic planning process is carried out. An outside facilitator may be utilized at strategic planning meetings so as to allow all the team members, including the District Administrator, to actively participate in the planning discussions.

The strategic planning process is cyclical and must be driven by District-wide data.

The Board is the final authority for adopting the District's vision, mission and priority goals and objectives as set forth in the strategic plan. It shall be the responsibility of the Board to approve budget needs based on District priority goals and action plans, provide the necessary support to school district staff in carrying them out, and monitor progress on a regular basis.

Progress toward meeting the priority goals and objectives outlined in the District's strategic plan shall be reported monthly during the months of September through June at the regularly scheduled Board meetings. Minutes of these meetings will be posted to the District's website and/or through such other communication mechanism(s) as the Board may approve.
