

Pt's weight, dosage, allergies, and specific contraindications to treatment are subject to change and must be verified by the licensed nurse on site prior to administration. The standing orders listed are based on the child being in an otherwise normal state of health aside from the minor ailment for which the order applies. As the prescriber is not on site to provide a physical assessment to determine the appropriateness to activate a particular order, this is deferred to the judgment of the licensed nurse physically present with the child. OTC creams, lotions, gels, sprays, lozenges and other preparation ingredients vary and individual products cannot be validated by prescriber.

TISHOMINGO COUNTY SCHOOL DISTRICT
STANDING ORDERS
SCHOOL HEALTH 2024-2025
