Curriculum Revisions

Fall 2023:

- Elements of inquiry learning design integrated into the curriculum to remain consistent with increased emphasis on inquiry in DESE's updated standards
- Timeframes of all units and organization of unit topics adjusted for a more even distribution of DESE's priority standards throughout the course
- Duplicated the placement of Engaging Scenarios so they appear near the beginning and the end of each unit to support backwards design of learning
- Priority standards broken down into student-centric learning targets to provide more clarity in learning for both teachers and students
- Measure of pacing adjusted to include both "weeks" and "blocks"
- Links and bookmarks added throughout to ease navigation
- Note about the importance of priority source documents in the study of history, as well as the potential for dated language found in them that would be considered derogatory, offensive, or insensitive if verbalized today

Primary Source Documents:

Note: Primary source documents are historical documents that are presented in their original form. These documents may be in the form of an image, written text, video, or audio recording. Primary source documents help students relate in a personal way to events of the past and promote a deeper understanding of history as a series of human events. Primary source documents promote student inquiry and require students to apply critical thinking and analysis skills. If primary source documents are utilized as artwork or displayed outside of classroom instruction, a written explanation providing context must be visible. While primary source documents in their original form may contain derogatory or discriminatory language, staff members should not read, recite, or otherwise verbalize derogatory or discriminatory language or statements in the classroom.

Unit 5 Engaging Scenario

Engaging Scenario (An Engaging Scenario is a culminating activity that includes the following components: situation, challenge, specific roles, audience, product or performance.)

Students will seek to answer the question “Is war sometimes inevitable?” This functions as an opening question for the start of the unit and then again as a concluding question for the end of the unit.

Students will provide supporting claims for their position at the start of the Unit and complete a “Philosophical Chairs” activity for a limited amount of time (15 minutes) to sort out which members of the class fall on either side of the question.

At the conclusion of the Unit, students will repeat the activity, this time with perhaps a longer amount of time for the “Philosophical Chairs” (25 minutes) to sort through what they’ve learned about the 20th Century Wars and how it may or may not have changed their initial position regarding the question: “Is war sometimes inevitable?”

Alternate activity: Gallery walk

Assessment Leveling Guide: A tool to use when writing assessments in order to maintain the appropriate level of rigor that matches the standard.

Big Ideas/Enduring Understandings: Foundational understandings teachers want students to be able to discover and state in their own words by the end of the unit of study. These are answers to the essential questions.

Engaging Experience: Each topic is broken into a list of engaging experiences for students. These experiences are aligned to priority and supporting standards, thus stating what students should be able to do. An example of an engaging experience is provided in the description, but a teacher has the autonomy to substitute one of their own that aligns to the level of rigor stated in the standards.

Engaging Scenario: This is a culminating activity in which students are given a role, situation, challenge, audience, and a product or performance is specified. Each unit contains an example of an engaging scenario, but a teacher has the ability to substitute with the same intent in mind.

Essential Questions: Engaging, open-ended questions that teachers can use to engage students in the learning.
