

## GUIDANCE PROGRAMS

The Board of Education believes that guidance programs are an integral part of the total instructional program. The objectives of the guidance department are to assist all students to mature in self-understanding, decision-making ability, development of values and attainment of the attitudes and skills for productive citizenship in our society. Thus, a guidance program for kindergarten through grade twelve is incorporated into the curriculum to aid students in making informed and responsible decisions in all aspects of their lives and to provide students with a positive approach to problem-solving.
