

PESTICIDES AND PEST MANAGEMENT

It is the goal of the Board of Education to maintain the integrity of school buildings and grounds, protect the health and safety of students and staff and maintain a productive learning environment.

The Board recognizes that pests can pose a significant risk to health and property, and there may be significant risks inherent in using chemical pesticides in the school environment. Provisions will be made for a least toxic approach to integrated pest management (IPM) for all school buildings and grounds in accordance with the Commissioner's regulations. Integrated pest management is a systematic approach to managing pests focusing on long term prevention or suppression with minimal impact on human health, the environment and nontargeted organisms.

Notification of Pesticide Application

All district staff and parents/guardians will be notified of pesticide applications performed at any school facility. A notice will be sent at the beginning of the school year which will include:

1. Notification of periodic pesticide applications throughout school year.
2. The availability of 48-hour prior written notification of pesticide applications to parents and staff who request such notice.
3. Instructions on how to register with the school to receive this prior written notification.
4. The name and number of the school representative who can provide further information.

A separate notice will be sent to staff and parents within two days of the end of winter and spring recess and within 10 days of the end of the school year which includes the date, location and product used for each pesticide application which required prior notification and each emergency application.

The Superintendent of Schools shall ensure the dissemination of this policy and any training necessary to fully inform all staff about pesticides and pest management.
