

FOOD SERVICE MANAGEMENT

The Board of Education upon the recommendation of the Superintendent of Schools shall conduct a school food service program either by district employees or by a contracted food service company. The Board shall therefore provide adequate facilities, resources and personnel for the provision of food services for all elementary and secondary students in the district schools. The goal shall be to maintain a quality food program which offers the students nutritious and appealing foods.

If the Board of Education elects to contract for food service management with a private company, the requirements of Education Law for competitive bidding shall be followed.
