Students**

SUICIDE PREVENTION AND INTERVENTION

The Regional School District 10 Board of Education (the “Board”) recognizes that suicide is a complex issue and that schools are not mental health treatment centers. The Region 10 Public Schools (the “District”) cannot be expected to thoroughly evaluate and eliminate suicidal risk. Nevertheless, school personnel may become aware of specific factual circumstances in which a student has communicated a suicidal intent or other specific circumstances in which a student is at risk for suicide. In such cases, the Board is committed to respond in a supportive manner, both aggressively and immediately, to a student who has attempted, has threatened, or who communicates that they are considering attempting suicide.

Any Board exhibited suicidal ideation must immediately report this information to the building principal or designee, who will, in turn, notify appropriate Student Services staff and the designated Crisis Intervention Team with administrative assistance, will contact the student's family and/or appropriate resources outside and within the school system as permitted by law. The Board further directs the school staff to refer students who come to their attention as being at risk of attempting suicide for professional assessment and treatment services outside of the school. Information concerning a student's suicide attempt, threat or risk will be shared with others to the degree necessary to protect that student and others.

In recognition of the need for youth suicide prevention procedures, the Board directs the Superintendent or designee to adopt and maintain administrative regulations addressing youth suicide prevention.

Training will be provided for teachers, other school staff, and students regarding the prevention of and response to youth suicide.
