Incoming 6th Grade Immunizations

The state of New Jersey mandates certain immunizations for all students, as detailed in N.J.A.C. 8:57-4 Immunization of Pupils in School.

All students advancing to 6th grade are required to have the following immunizations:

- Tdap (Tetanus, Diphtheria, and Pertussis" Booster shot").**
- Meningococcal (Meningococcal ACWY).**

Compliance is due before the start of school in September. Per New Jersey, **6th grade students who are not fully immunized should be excluded from school.**

Tdap and Meningococcal immunizations are given at a **child's 11 year old well-visit**. If your child already had their 11 year old well- visit, please send proof of immunization to the school. If your child has not received the immunizations, please schedule an appointment for your child to receive them as soon as possible. Once you receive proof of immunization, please forward it immediately to the school nurse prior to the first day of school.

Students whose 11th birthday falls after the start of the school year in September are required to receive the immunizations within two weeks of their birthday with proof submitted to the school once received.

Student's name/

DOB _____

Tdap (date given) _____

Meningococcal ACWY (date given) _____
