

# STAY CONNECTED

**PowerSchool** is our student information system and can be accessed by students and parents to see grades, attendance, and report cards (4K-12). Create a PowerSchool Parent Portal account to access your student's data.

**ParentSquare** connects with families and unifies communication all the way from the district office to the classroom teacher, and all in one place. Families always have a way to find the information they need to stay engaged.

**Schoolology** is our Learning Management System for teachers to securely share class assignments and collect student work online. Parents can see instructional resources and learning materials shared with their students.

The **MyRide K-12** app simplifies school transportation, offering real-time bus tracking for parents and students. With this app, parents can monitor arrival times, get notifications about delays, and ensure their children's safety.

**Nutrilslice** offers online menus with nutrition calculators and viewable nutrition fact labels in 50+ languages. With filters for dietary and allergy restrictions, families can use interactive menus to select healthier choices.
