

2024-2025 Supply List

The below items are suggested for 7-12 students. None of the below items are required as we will always ensure our students have what they need to be successful. These supplies are suggested based on what our students will use on a daily basis as well as what they might use periodically throughout the year.

1. A Folder for each class or a Trapper Keeper
 - All students are different in how they stay organized. Please communicate with your child to see what works best for them. Organization is a common struggle for many 7-12 students, especially middle school students.
2. Spiral Notebooks
3. Book Covers
 - Fines can be assessed for damaged books so protecting them is highly encouraged. Brown paper bags from the grocery store work great!
4. Calculator (TI-34 to ensure consistency within our math curriculum)
 - Every math room will have TI-34 calculators so students will always have what they need. However, because they will be using this make/model for the next 6 years it might be worth consideration.
5. Pens / Pencils (Students should avoid Red for regular classwork)
6. Daily Planner
 - As mentioned above, organization can sometimes be a struggle. A daily planner is not for everybody, but it's a good conversation to have with your child to see if it might be something they will utilize.

Suggested supplies for junior high students (additional):

The below items will always be on hand and can be checked-out from the teacher, but if your child would like their own, these items will be used periodically in some classes.

1. Colored Pencils
2. Glue Sticks
3. Scissors
4. Highlighters
