

NORTHWEST SCIENCE FAIR

Dear Northwest Parents & Students,

The Northwest Science Fair is approaching quickly! The judging will take place on the morning of Tuesday, January 14, 2014. Projects will be on display and participants will be recognized at Northwest Science Night on Wednesday, January 15, 2014.

All fourth and fifth grade students will complete a science project to show mastery of the investigation and reasoning skills they are learning in science. This year students may choose which type of presentation format to use:

- science board (this is the only project format that can be judged in our fair)
- power point presentation
- written report

All projects will be presented in the classroom, but only science boards are eligible to be judged at the Northwest Science Fair.

Fourth and fifth grade students are eligible to represent Northwest at the Austin Energy Regional Science Festival. If your project is selected as one of our school's best, you can present it at the AERSF on Saturday, February 22, 2014.

☐ I would like to participate in the Northwest Science Fair!
(I will present my project on a science board.)

☐ Please consider my project to represent our campus at the regional fair, held at the Palmer Events Center in Austin on Saturday, February 22, 2014 (project check in is at Palmer Events Center on Friday afternoon, February 21, 2014). I understand by checking this box, I am not automatically moving forward to the regional festival, but I agree to represent our campus should I be chosen. (I will present my project on a science board.)
