Assistant Principals

Mr. John M. Saras, Ms. Denise Wells, and Mr. Brandon Whitfield

Edited 2-2024, Board Reviewed 2-2024

Dear Highlanders,

The best approach to finalizing a student's schedule is through a cooperative effort of the student, family, teachers, and school counselor. Wise course selection also requires that students observe the graduation requirements. By carefully selecting courses, students will make good choices for their futures, both at Baldwin High School and beyond.

Students are strongly encouraged to take Honors, CHS, and AP courses, especially if they plan to attend a 2- or 4-year college or university. Honors-level courses provide more rigor through reading, writing, labs, and projects. They move at a faster pace and require additional time outside of school. AP and CHS courses are taught at the collegiate level; these courses are more rigorous than regular- and honors-level courses. Taking rigorous courses in high school not only better prepares students for post-secondary courses, but also increases the likelihood of success in the trades and military settings.

In order to determine which AP courses could be appropriate, students may refer to their PSAT score reports. These reports recommend AP courses based on performance on the PSATs. Students should also work with their school counselor and talk to their teachers about selecting appropriate courses.

It is very important that students and families consider the student's overall schedule and time constraints. On average, students should afford one hour per CHS/Honors/AP class for homework/reading/studying per night. Taking too many CHS/Honors/AP courses can have a negative impact on a student's mental health. While it is important to challenge oneself with rigorous courses, it is also important to have balance in one's life. Time management, de-stressing activities, and built-in downtime are examples of actions that can be taken to reduce stress.

All of our courses and descriptions are organized by department. Please read the descriptions carefully before selecting courses.

Students will be scheduling using Skyward. School Counselors will assist students in social studies classrooms entering course requests. Parents will be notified via Skylert as to what courses students have selected.

While we make every effort to provide for students' interests in a particular content area, we acknowledge that there can be no guarantee that students will be able to schedule every elective or course that they would like. We remain committed to helping students as much as possible while providing students with opportunities to match their interests.

Let's look forward to a great 2024-2025 Academic Year!

ACADEMIC STRUCTURE

Grading Scale

| Baldwin High School | |
|---------------------|--|
| A | 90% - 100% |
| B | 80% - 89% |
| C | 70% - 79% |
| D | 60% - 69% |
| F | 0% - 59% |
| P | Pass |
| I | This will become an F if not made up within two weeks. |

Grade Point Average

Class rank is based upon the compilation of all course grades earned from Grades 9-12. For transfer students, the evaluation received at the former school, as well as grades earned at Baldwin High School, are considered. GPA is calculated by the four quarter grades for each course, not the final averaged grade.

| Grade | Non-Weighted | Honors Weighted | AP/CHS Weighted |
|----------|--------------|-----------------|-----------------|
| A | 4 | 4.5 | 5 |
| B | 3 | 3.5 | 4 |
| C | 2 | 2.5 | 3 |
| D | 1 | 1.0 | 1 |
| F | 0 | 0.0 | 0 |

Credit Deficiencies

A credit deficiency, which occurs when a course is failed, may be resolved by repeating the course the following year or by attending an approved summer school or online credit recovery program. It is the responsibility of the student to reschedule and cover any costs associated with credit deficiencies. Remediation course information is available through the School Counseling Office.

Upperclassmen who fail a required course or who lack sufficient credits for graduation may attend an accredited summer school program, enroll in a program to earn a diploma, take the GED (General Educational Development) test, or return to Baldwin High School as a full time student the following semester. Seniors who fail a course needed for graduation are required to complete any credit remediation by October of the year in which they graduate. These students will meet with their school counselor to discuss their options. The Commonwealth Secondary School Diploma (CSSD) may be achieved by passing the GED test, certifying that the holder has achieved an acceptable educational level.

Students who wish to eliminate deficiencies by taking a credit recovery course must have approval from their counselor in advance in order to be awarded credit.

GRADUATION REQUIREMENTS

ESSENTIAL CREDIT REQUIREMENTS FOR GRADUATION

| | |
|--|-------------|
| English | 4.0 |
| Social Studies | 3.5 |
| Science | 3.0 |
| Mathematics | 3.0 |
| Physical Education | 1.0 |
| Health | 0.5 |
| Introduction to Computer Science | 0.5 |
| Electives | 8.5 |
| Total Credits | 24.0 |
| *Other Requirements: <ul style="list-style-type: none"> • PA State CEW Requirements • One of five PA Keystone Pathways • Graduation Project and Exit Interview | |

PA STATE CEW REQUIREMENTS FOR GRADUATION

The Career Education and Work Standards, Chapter 4 of Title 22, are part of the State Board of Education's regulations of required education for all students in Pennsylvania. The Career Education and Work Standards address four areas of knowledge:

- Career Awareness and Preparation
- Career Acquisition (Getting a Job)
- Career Retention and Advancement
- Entrepreneurship

Baldwin High School students will meet their CEW requirements by completing these activities each year using Xello career software. Students may access Xello lessons through the Counseling Canvas page for their graduating class.

| | |
|---|---|
| Grade 9 Exploring Career Factors Work Values Workplace skills and attitudes | Grade 10 Career Backup Plans Careers and Lifestyle Costs Entrepreneurial Skills |
| Grade 11 Job Interviews Defining Success | |

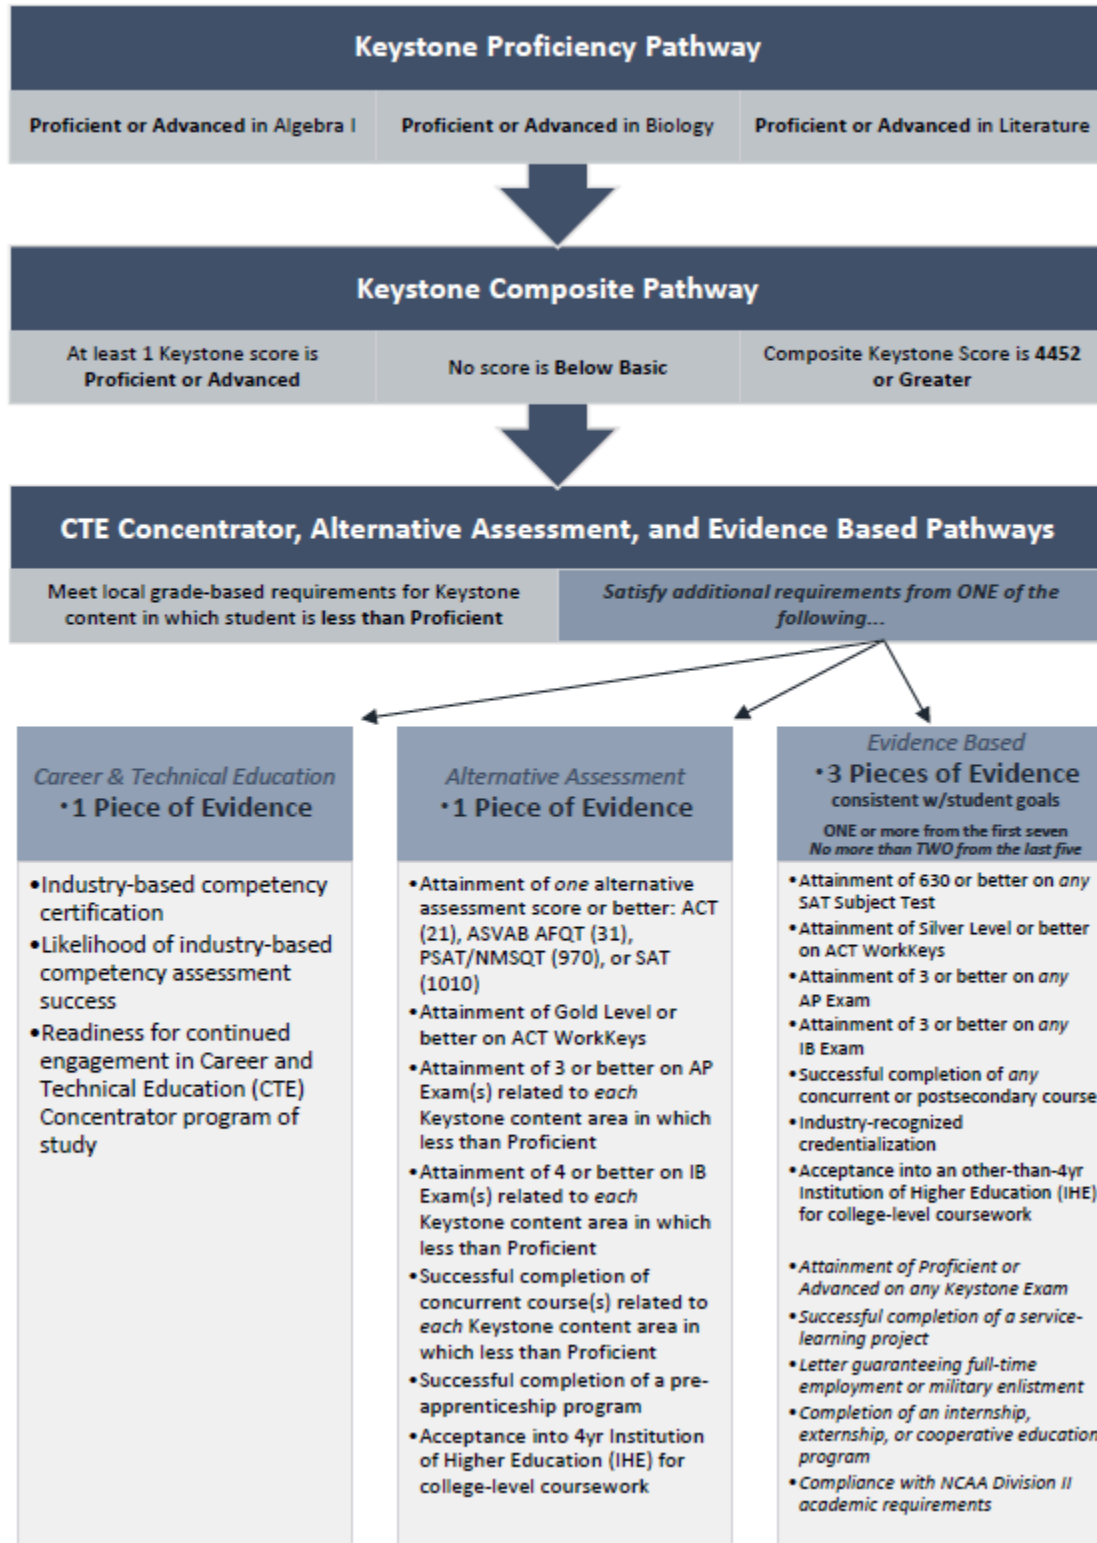

GRADUATION PROJECT REQUIREMENT

The Graduation Project will be integrated into the Society and Careers, AP Government, CHS European History, and AP Economics curricula. Students will be required to complete an exit interview near the end of the school year.

Act 158 Graduation Requirements for the Commonwealth

In accordance with Pennsylvania’s Act 158, students will have to illustrate their college and career readiness prior to graduating from BHS. The simplest way to meet these requirements is to earn proficient or advanced scores on all three Keystone Exams. Students who are unable to achieve proficiency will need to collect evidence to exhibit readiness through an alternative pathway.

Act 158 Pathway Graphic

Schedule Changes

Students are given the opportunity to carefully consider course selections for the upcoming academic year. Teachers are a critical part of this process through recommendations and advising on appropriately challenging course placements for each student. Additionally, our school counselors will meet with students in group and/or individual settings to discuss and review the course selection process, arena scheduling, and student course choices, as they relate to graduation requirements and individual career interests and exploration.

Students must realize that not all course requests will be available. Though every effort will be made to ensure accuracy in responding to each student's requests, we recognize that students might be scheduled into classes that they do not wish to take. To that end, please refer to the schedule change procedures that follow.

The add/drop period extends for two weeks (or ten school days) following the commencement of the academic year for year-long courses and for the same period following the commencement of the spring semester for spring semester courses.

During the add/drop period, a student can add or drop classes without evidence of such changes appearing on the student's transcript.

Following the add/drop period, a student must withdraw from a course. The choice to withdraw from a course will appear on a student's transcript and will include any quarterly grades earned in the course. The withdrawal will also indicate a pass or fail, depending on the current grade in the course.

Students who have schedule change requests should email their counselors prior to leaving for Summer Break.

No schedule changes will occur during Summer Break.

Remember that school counselors are members of the High School faculty and, as such, are also on break during this time and are not expected to respond to email regularly. Schedule change inquiries or requests will be reviewed when faculty return to school and through the end of the add/drop period.

Administrators will not respond to or process schedule change requests.

BALDWIN HIGH SCHOOL COUNSELING DEPARTMENT

Website: <https://www.bwschools.net/baldwin-high-school/services/guidance-services>

Provides information on available resources and services delivered by our School Counselors. This website is a valuable resource which allows the BHS Counseling Department to continuously communicate with Baldwin students, families, and the community. Some features of the website include:

- ❖ Counselor's contact information
- ❖ Important documents
- ❖ Information on standardized testing (PSAT, SAT, ACT, AP, Keystones)
- ❖ Graduation requirements
- ❖ Grade 12 Information - applications, transcripts, post-secondary school representatives
- ❖ Scholarships
- ❖ Grades 9-12 Presentations
- ❖ Financial Aid
- ❖ Work Permits
- ❖ Tech Help Link

Canvas Hub Pages: Features information on events happening at Baldwin High School and resources available at the counseling office, college and career fairs, scholarship information, open house events at colleges and universities, community events, and job announcements.

What is Xello?

Xello (previously known as Career Cruising) is the Computerized Career Planning Program that Baldwin-Whitehall School District uses to help students explore careers, set career goals, and plan coursework at the high school. Career clusters provide students information about their interests, experiences, and abilities, as well as related information about occupations, education and training programs, and financial aid.

Please view this video to see a glimpse of what Xello offers:

<https://www.youtube.com/watch?v=nCkoUMCXNjl&authuser=0>

Please view this video to understand your Xello Module:

https://www.youtube.com/watch?v=II_5GsuubYs&authuser=0

How to use Xello

Students should go to their Counseling Canvas Dashboards and locate the Xello Module. Students log into Xello with their Skyward login and password. The students will work independently on lessons during homeroom or on their own time.

INDUSTRIAL MANUFACTURING TECHNICIAN PRE-APPRENTICESHIP

BHS Catalyst Connections

Baldwin High School's Industrial Manufacturing Technician Pre-Apprenticeship is a partnership with *Catalyst Connections* that helps high school students begin a pathway to a career in manufacturing, high tech robotics, Artificial Intelligence, and other highly in demand professions. Due to rapidly changing manufacturing technologies, entry-level workers require higher skills than before, and employers are struggling to recruit and retain these types of workers for positions. Currently, Baldwin has 2 state registered Pre-Apprenticeship programs: IMT Pre-Apprenticeship and Advanced IMT Pre-Apprenticeship. These two programs directly connect to one another and allow students to receive 7 industry recognized certifications after completion. These national certifications are stackable, recognized by industries, and can lead to active recruitment directly after high school in multiple career pathways. The program offers self-paced modules, hands-on activities, career coaching, networking, and a guaranteed job interview upon completion of the two online certifications. Learn more at https://rise.articulate.com/share/velUwourq4j1psl28vs_S_kp1Ew_IzL5#/.

EARNING COLLEGE CREDIT WHILE IN HIGH SCHOOL

CCAC EARLY COLLEGE PROGRAM OPPORTUNITY FOR INCOMING FRESHMAN

The CCAC Early College Program is a unique opportunity for our incoming 9th grade high school students (Class of 2028) to begin taking college courses during the school year for free. This program is designed for students that want to become successful leaders inside and outside the classroom, gain college readiness experience, and have the opportunity to earn college credits in one of three pathways: **Accounting, Business Management, or Computer Information Technology** while in high school.

All courses are taught by CCAC faculty. A stipend for good grades is possible with the completion of the classes at the approval and at the discretion of the CCAC program director. Upon completion of the program, students will earn a certificate in their selected pathway. At the college level, credits earned can be used towards completing an Associates Degree from CCAC or. credits may also be transferred to a four year institution upon high school graduation as CCAC is an accredited institution with dozens of articulation agreements. Participation in this program allows students to build a resume that enhances their college and job applications, can ease the transition from high school to college, and allows students to earn transferable college credit at no cost to the student or family. The program is funded through a grant in partnership with BNY and CCAC.

Interested students begin the application process starting in spring of their 8th grade year. After acceptance into the program, during 9th grade, all students will participate in an orientation that will introduce them to the goals of the program, potential career paths, what college is like, and what benchmarks they must achieve to complete the program. Throughout the enrollment in the program, students will have access to wrap-around CCAC support services, including advising, tutoring, and counseling. Students can not enter the program after the initial application process as an incoming freshman. This is a dual enrollment program with limited spots available; interested incoming freshman students should contact their school counselor to enroll in the application process in the spring of 8th grade. The sequence of courses for the Early College Program is listed on the next page.

ADVANCED PLACEMENT (AP) COURSES

Advanced Placement (AP) courses are college/university level courses that follow the College Board's AP syllabi and prepare students for the AP Examinations given in May of each year. AP courses are instructed at a fast pace and afford students a weighted GPA. Students are expected to use a significant amount of time outside of class to complete coursework. Most AP courses have mandatory summer assignments. Learn more about AP Courses at this website: <https://parents.collegeboard.org/college-board-programs/advanced-placement-program>

- English Language and Composition
- English Literature and Composition
- World History - Modern
- United States History

COLLEGE IN HIGH SCHOOL (CHS) COURSES

The College in High School (CHS) program offers qualified high school students the opportunity to earn college credits during their regular school day. Students must pay for credits at the beginning of the school year and request an official transcript from the college or university. These credits may transfer to the college or university that the student attends after graduation. Whether full course reciprocity is offered, though, is a decision made by individual schools, departments, and advisors. It is the responsibility of the student to check with the college/university in which (s)he will be enrolling to determine if College in High School credit is accepted. Students are responsible for all tuition and/or other costs associated with enrollment in the courses if they want to earn college credits.

| BHS COURSE | COLLEGE/UNIVERSITY COURSE NAME & NUMBER | |
|---|---|---|
| 114 CHS/AP English Language and Composition 1 credit | Seton Hill University - 3 credits SEL 105 Composition and Culture (Part A) | |

DUAL ENROLLMENT

Baldwin High School partners with several local colleges to allow students to take courses which may be of interest to them that are not offered at the high school. In the past, we have partnered with schools such as Community College of Allegheny County, University of Pittsburgh, Mt. Aloysius College, Point Park University, and others. Dual enrollment courses do not count toward graduation credits and are not included in the GPA. A notation of the course, college, and grade earned is made in the Activities section of the high school transcript. When seniors apply to college, a copy of their dual enrollment college transcript may be sent with the high school transcript upon request. The following conditions apply:

- must have School District approval
- must have parent/guardian permission
- placement test may be required by the college
- students and families are responsible for all expenses, including tuition, fees, books, and transcript
- students and families are responsible for transportation to and from the college
- interested students should meet with their school counselor for more information
- Students may also find college courses on their own and bring to their counselor for approval

WORK RELEASE

Pennsylvania's economic future depends on having a well-educated, diversified and skilled workforce. Work Release is a course designed for senior students seeking career exploration opportunities, to increase their knowledge, skills, and abilities for further education, improve general employment skills, and "real world" work experience within a professional, productive, and structured work setting.

Students must meet the qualifications listed below:

1. Students must be in good standing, have good school attendance, have enough credits for senior standing and have proof of employment in order to apply for the course.
2. Students & parents are required to attend an orientation session to complete a release form allowing students to participate, to leave the school building and for parents to provide liability coverage for student transportation to & from work. The school will assume no responsibility for transportation, safety, employment problems or appropriate insurance.
3. Students must apply and maintain a PA Work Permit up until 18th birthday.
4. Students would be responsible for locating and securing a work site. Students must document how this work assists in acquiring work related skills in order to be accepted into the program.
5. Students must attend school for 5 periods a day (minimum).
6. Students must maintain a satisfactory school record each nine weeks (must be passing all courses) with good attendance in order to remain in the program.
7. Students must abide by the work schedule agreed upon by the student, employer and school.
8. Students must not terminate employment during any given semester without the approval of employer, parent/guardian and school.
9. Should the student be terminated from employment by the employer, the student will be granted a 2 week grace period to apply, find and secure new employment. Should new employment not occur, students will report to in person class daily in order to refine resume, help in locating new positions, and practicing interviewing skills, etc. until new employment is secured.

This course will be run 90% asynchronous and will contain weekly assignments along with required posting of required documentation. All course materials would be posted to Canvas and weekly due dates will be attached.

- i. Students are required to complete coursework including:
 1. Posting weekly work schedules with manager contact information
 2. Posting of Bi Weekly work stubs
 3. Documentation of career, education & work standards being met each week through weekly course assignments & journal. Each week would focus on a particular workplace theme (from PA CEW's), such as job knowledge & skills, work results, communication, time management, negotiations, problem solving, Equal Employment Opportunities, proper business etiquette, work safety etc.

The 10% portion of the course would include:

- ii. Orientation into the program at the beginning of the school year for students
- iii. Orientation meeting into the program for parents
- iv. Quarterly check ins as class meetings to discuss employment and experiences as a group
- v. End of year meeting as a final to the program and exit from the program
- vi. Teacher would be available for office hours (in person or online) during course meeting times or by appointment during normal working hours

The course would be offered as a Pass/Fail grade, with the credits to correspond to periods of release (1 period of release = 1 elective credit (minimum 5 hours of work a week). Maximum credit that could be earned yearly would be 2 elective credits for 2 periods (minimum 10 hours of work a week)). Credits would be earned following PA Career Education & Work Standards.

KEYSTONE REWARD STUDY HALL

Seniors who scored at the “Proficient” or “Advanced” level on their Keystone Exams in Literature, Algebra I, and Biology are extended the opportunity to arrive to school after period 1 and be released from school after period 7 if they have a study hall during period 1 or period 8. Qualifying students, with parent permission, will have a schedule change made to reflect a “Keystone Reward” class in the appropriate period. Once again, this opportunity is available only to qualifying seniors having a study hall during period 1 or period 8. This privilege may be revoked by the administration at any time.

Students who have a composite score greater than 4452 are also eligible. If you’re unsure about your eligibility, contact your School Counselor.

FUNCTIONAL ENGLISH
Course Number: 091
Prerequisite: Teacher Recommendation

Credit/Term: 1.0/year
Grade Level: 9-12

Description: This course is an English language curriculum that is specifically designed to teach practical and functional literacy skills to students with diverse learning needs. The primary goal is to equip students with the essential language skills necessary for effective communication and independent living. The content and approach of a functional English course include comprehension, literacy, writing skills, communication skills, functional vocabulary, and life skills such as understanding and following instructions, making requests, and participating in basic conversations related to daily activities. The goal of our functional English course is to empower students with the language skills they need to participate more fully in their communities and lead more independent lives. The curriculum often places a strong emphasis on practical application, relevance to daily experiences, and the unique needs of each learner in a special education classroom.

**FOUNDATIONS OF ENGLISH
LANGUAGE ARTS**
Course Number: 100e
Prerequisite: Teacher Recommendation
****NCAA Approved Course***

Credit/Term: 1.0/year
Grade Level: 9-12

Description: The course is designed to help students develop essential reading and literacy skills. This comprehensive course is specifically designed for students who are reading below grade level and aims to accelerate their reading growth, increase comprehension, and improve overall literacy proficiency. The course covers various key components of literacy, including phonics, fluency, vocabulary development, comprehension strategies, and critical thinking skills. Students engage in explicit instruction to enhance their decoding abilities, fluency rates, and word recognition skills. They learn and apply effective strategies for understanding and analyzing text, including making predictions, summarizing, making connections, and drawing inferences.

ENGLISH 9
Course Number: 102
Prerequisite: None
****NCAA Approved Course***

Credit/Term: 1.0/year
Grade Level: 9

Description: In this course, students will analyze and apply literary elements in short stories, epics, novels, poetry, and nonfiction selections through reading, writing, oral presentation, and basic research. The development of composition skills is integrated with the study of literature and focuses on the various types of paragraphs. Students follow the steps of the writing process as they write both single and multi- paragraph essays. Students will be expected to work on more than one project at a time as well as read some literary selections independently. Co-taught sections of this course are available to all students as needed and recommended.

HONORS ENGLISH 9
Course Number: 103
Prerequisite: None
****NCAA Approved Course***

Credit/Term: 1.0/year
Grade Level: 9

Description: Students who have achieved success in analyzing literature and writing essays should choose this course. Students will sharpen their ability to determine meaning in complex literature and to construct persuasive arguments in analytical essays. Students read and discuss contemporary and classical short stories, novels, poetry, drama, an epic, and nonfiction. They think critically about the author's purpose and the text's overall meaning, and they learn how to express those thoughts in essays that incorporate quotes from the texts. Research and public speaking skills are taught, and students will read several literary selections independently.

ENGLISH 10
Course Number: 107
Prerequisite: English 9
****NCAA Approved Course***

Credit/Term: 1.0/year
Grade Level: 10

Description: This course is designed to provide a focused study of reading, writing, speaking, and listening. The English 10 course incorporates a study of fiction through analysis of short stories, novels, dramas, and poems. The study of nonfiction utilizes a variety of reading strategies and examines documents, essays, and memoirs. Units of study will involve a close investigation of elements of literature, and elements of composition through the development of multi-paragraph essays and application of the steps of the writing process. At the end of this course, students will take the Keystone Literature Exam. Co-taught sections of this course are available to all students as needed and recommended.

HONORS ENGLISH 10
Course Number: 108
Summer work may be required
Prerequisite (recommended but not required): Honors English 9
****NCAA Approved Course***

Credit/Term: 1.0/year
Grade Level: 10

Description: College-bound students who have mastered the basics in literature, composition, and required skills and who work independently at an accelerated pace should select this course. Interpretation and criticism of short stories, novels, dramas, poetry, and nonfiction are emphasized in both discussions and activities. In addition, students read numerous literary selections independently. Students compose single and multi-paragraph essays integrated with the study of literature while using the writing process. A formal research project is also required as well as formal speech presentations. Students will be expected to work on more than one assignment at a time. This course is designed to prepare students for the 11th and 12th Grade AP or CHS English Courses. At the end of this course, students will take the Keystone Literature Exam.

GRADE 11/12 ENGLISH OPTIONS:

Students may take two semester-courses or one full-year course per year to satisfy the Grade 11 or 12 English credit requirements.

Electives do not count toward the Grade 11 or 12 requirements.

ENGLISH 11**Course Number: 111****Prerequisite: English 10******NCAA Approved Course*****Credit/Term: 1.0/year****Grade Level: 11/12**

Description: This American literature-based course provides students with experience in critical analysis of selections from stories, novels, dramas, poetry, and nonfiction. This course is designed to provide a focused study of reading, writing, speaking, and listening. Units of study involve a close investigation of literary elements, English usage, and thematic connections. Students apply the steps of the writing process to develop multi-paragraph essays, narratives, and creative writing assignments integrated with the study of literature. Co-taught sections of this course are available to all students as needed and recommended.

As with all of the English 11/12 courses, students will study related vocabulary, prepare and present speeches/presentations, explore research topics, and respond orally and in writing to the ideas presented, read, and discussed in this course.

PHILOSOPHY AND HUMANITIES**Course Number: 170****Prerequisite: English 10/11******NCAA Approved Course*****Credit/Term: .50 sem./Fall****Grade Level: 11/12****Fulfills .5 English Credit**

Description: How is “right” and “wrong” decided? Can you trust your senses, or are you being deceived? Is there such a thing as free will, or is everything predetermined? Are there any absolutes, or is everything relative? These questions, found in daily dilemmas, political debates, talk shows, and religious debates have been around for centuries. By examining classical philosophers, futuristic stories and novels, as well as contemporary media and current events, students will engage in a semester-long pursuit of possible answers to these questions. With an emphasis on discussion and debate, students will not only respond critically, but challenge themselves to reconsider the “why” behind their own lives. Readings may include the works of Aristotle, Plato, Sartre, and Nietzsche, Kant, current events, short stories, and contemporary film studies, as well as the novels *Brave New World*, and *Do Androids Dream of Electric Sheep*.

As with all of the English 11/12 courses, students will study related vocabulary, prepare and present speeches/presentations, explore research topics, and respond orally and in writing to the ideas presented, read, and discussed in this course.

SPORTS LITERATURE AND CULTURE**Course Number: 171****Prerequisite: English 10/11**

- *Pending NCAA Approval*

Credit/Term: .50 sem./Spring**Grade Level: 11/12****Fulfills .5 English Credit**

Description: For over a century, our culture has been infatuated with sports. Whether it is the quest for victory, the attempt to establish a dynasty or the success of the underdog, sports have kept millions of Americans on the edge of their seats. Sports Literature and Culture is a one-semester course designed for students who have a desire to explore literature through settings and themes that relate to sports. In this course, students will explore literature and film related to various sports, both widely popular and less prevalent, to examine how sports influence and reflect the culture of a given society. Students will analyze themes related to heroes, culture and values, controversies, and moments of glory by reading modern sports novels, poems, and nonfiction pieces.

As with all of the English 11/12 courses, students will study related vocabulary, prepare and present speeches/presentations, explore research topics, and respond orally and in writing to the ideas presented, read, and discussed in this course.

LITERATURE OF SELF-DISCOVERY Course**Number: 173****Prerequisite: English 10/11*****NCAA Approved Course****Credit/Term: .50 sem./Fall****Grade Level: 11/12****Fulfills .5 English Credit**

Description: Literature helps us discover the best parts of ourselves and the things we would rather avoid. It lets us escape from our lives and find ourselves. This course will utilize American and World Literature to help students figure out their place in this ever evolving society. Through reading, writing, and responding to various classic and contemporary works of literature, students will unearth and refine personal values, beliefs, ethics, and style.

As with all of the English 11/12 courses, students will study related vocabulary, prepare and present speeches/presentations, explore research topics, and respond orally and in writing to the ideas presented, read, and discussed in this course.

DIVERGENT LITERATURE**Course Number: 174****Prerequisite: English 10/11*****NCAA Approved Course****Credit/Term: .50/sem./Spring****Grade Level: 11/12****Fulfills .5 English Credit**

Description: “What sets you apart can sometimes feel like a burden and it’s not. And a lot of the time, it’s what makes you great.” — Emma Stone
This quote suggests we all have different issues that sometimes make us feel like an outsider, but our journey is figuring out how to use that to be the best version of ourselves. This literature course focuses on the difficulties that many people deal with on a daily basis, all while trying to fit into societal norms. Issues such as race, gender, relationships, and family will all be explored through various pieces of fiction, poetry, and nonfiction. Students will combine their own unique experiences with that of the characters and events in the literature selected for this course. Emphasis will be placed on connecting to contemporary literature.

As with all of the English 11/12 courses, students will study related vocabulary, prepare and present speeches/presentations, explore research topics, and respond orally and in writing to the ideas presented, read, and discussed in this course.

SCIENCE FICTION AND FANTASY**Course Number: 175****Prerequisite: English 10/11*****NCAA Approved Course****Credit/Term: .50/sem./Spring****Grade Level: 11/12****Fulfills .5 English Credit**

Description: What explains our fascination with the future? A quick look at the top grossing films and novels over the past decades reveal that both science-fiction and fantasy continue to draw mass audiences. Some stories imagine a dystopian nightmare, while some simply present old problems in a new century. This course is designed to explore not only the entertainment value in these science-fiction and fantasy works, but the deeper truths they reveal about modern life. With an emphasis on research, media, and current events, this class will explore fantasy and science-fiction in multiple forms. Readings will range in genres from “classic” sci-fi (H.G. Wells’ *Time Machine* and *War of the Worlds*/ Lewis Carroll’s *Alice in Wonderland* and *Through the Looking Glass*) to fantasy options (J.R.R. Tolkien’s *The Lord of the Rings/The Hobbit*, J.K. Rowling’s *Harry Potter*, Phillip Pullman’s *Golden Compass*), to Cinematic Sci-Fi (Michael Crichton’s *Jurassic Park* and *Andromeda Strain*, Arthur C. Clarke’s *2001: A Space Odyssey*, and Suzanne Collins’ *Hunger Games*) as well as Ray Bradbury short stories (*The Martian Chronicles*), and Ernest Cline’s *Ready Player One*.

As with all of the English 11/12 courses, students will study related vocabulary, prepare and present speeches/presentations, explore research topics, and respond orally and in writing to the ideas presented, read, and discussed in this course.

HORROR AND SUSPENSE**Course Number: 176****Prerequisite: English 10/11*****NCAA Approved Course****Credit/Term: .50/sem./Fall****Grade Level: 11/ 12****Fulfills .5 English Credit**

Description: What are you afraid of? What makes a novel a true page-turner? What keeps your eyes glued to the screen? These questions and more form the basis of **Horror and Suspense**, a course dedicated to exploring all things mysterious, spooky, thrilling, and bizarre. With an emphasis on choice, creativity, and modern media, this course will take a look at how authors and directors continue to scare and deceive us...while keeping us coming back for more. From classics like *Dracula* and *The Strange Case of Dr. Jekyll and Mr. Hyde* to more modern tales like *Psycho* and *Silence of the Lambs*, as well as the mystery novels like *Death On The Nile* and *The ABC Murders*, this course has something for everyone. Readings may include works and short stories from authors such as H.P. Lovecraft, Agatha Christie, Stephen King, Edgar Allen Poe, and Richard Matheson as well as more contemporary film studies.

As with all of the English 11/12 courses, students will study related vocabulary, prepare and present speeches/presentations, explore research topics, and respond orally and in writing to the ideas presented, read, and discussed in this course.

MODERN STORYTELLING**Course Number: 119****Prerequisite: English 10/11**

- *Pending NCAA Approval*

Credit/Term: 0.5/sem./Fall**Grade Level: 11/12****Fulfills English Credit**

Description: This course offers a combination of modern/young adult novels combined with classic/canon literature. It asks the questions: Who makes the decisions about what becomes “classic” and do we get a voice? Are the texts we are reading in the classroom representative of the diverse streams of culture, history, and language that compose today’s increasingly global society? What do these books say about whose voices are valued and whose are not? In recent years, the concept of the literary canon and its use in the classroom has been debated; with modern education leaning more towards voice and choice--and society drastically changing the way we approach diversity and identity--we are left asking ourselves: is the canon still relevant? Students will examine classic/canon texts (such as *The Great Gatsby* and *Of Mice And Men*) from a new perspective, as well as discover modern texts (including *All-American Boys* and *Looking for Alaska*) from diverse authors that expose universal themes. With an emphasis on literary analysis and research, students will respond critically to literary texts, challenge themselves to look beyond their own perspectives, and ultimately complete a research/proposal project examining the relevance of the literary canon.

As with all of the English 11/12 courses, students will study related vocabulary, prepare and present speeches/presentations, explore research topics, and respond orally and in writing to the ideas presented, read, and discussed in this course.

ENGLISH FOR YOUNG ADULTS**Course Number: 125****Prerequisite: English 10/11**

- *Pending NCAA Approval*

Credit/Term: .50/sem./Spring**Grade Level: 11/12****Fulfills English Credit**

Description: We want students to be creative + critical thinkers. This course encourages a mindset of self-direction and student ownership, and it begins by empowering students with voice and choice. This course offers students the opportunity to engage in inquiry that matters to them, while exposing them to modern/young adult literature including novels and poetry. Students will engage with an area or topic of great interest to drive their learning in this course using a student-driven inquiry project. Additionally, students will explore an independent novel study, modern poetry analysis, and multimedia explorations. The overall goal of this course is to ultimately provide students with the foundational ability to think critically, ask deeper questions, use their voices, and give them a platform for their own learning.

As with all of the English 11/12 courses, students will study related vocabulary, prepare and present speeches/presentations, explore research topics, and respond orally and in writing to the ideas presented, read, and discussed in this course.

CHS ARGUMENT AND DEBATE
Course Number: 122
Prerequisite: English 10 or H English 10

Credit/Term: .50/sem.
Grade Level: 11/12
Fulfills English Credit

Pending Board Approval

Description: Unleash the power of your words and explore the art of persuasive communication. This interactive course is designed for students who are eager to sharpen their critical thinking skills and express their opinions by engaging in debates that will both challenge and inspire. Throughout the course, students will learn about and participate in various debate styles while developing their ability to formulate, defend, and refute arguments. Students who excel in the course will have the opportunity to represent Baldwin High School at a public forum hosted at Pitt University debating with other students who are enrolled in this course throughout the region. Students who pass this course and pay the required fees are able to earn three credits from Pitt University that may be transferred to other universities.

As with all of the English 11/12 courses, students will study related vocabulary, prepare and present speeches/presentations, explore research topics, and respond orally and in writing to the ideas presented, read, and discussed in this course.

CHS/AP ENGLISH LANGUAGE AND COMPOSITION
Course Number: 114
Prerequisite: CHS Lit/Phil, CHS Lit/Comp, Honors English 10
Or English 10/11 with recommendation
****Summer Work Required****
AP Exam: Optional exam at the end of the course.
***NCAA Approved Course**

Credit/Term: 1.0/year
Grade Level: 11/12

Pending Board Approval

Description: The CHS/AP English Language and Composition course allows students to become skilled readers of complex prose and to become sophisticated writers who can compose for a variety of purposes. The design of this course applies to the student who appreciates an intellectual challenge, demonstrates independent initiative, and shows a mastery in multi-tasking. A wide breadth of prose texts from numerous historical periods, disciplines, and rhetorical contexts is studied, not only for the purpose of exploring content, but also for the purpose of exploring a writer's purpose, audience expectations, and use of stylistic and rhetorical devices. Based on these examples, students will write in expository, analytical, and argumentative styles. Utilizing the writing process, students will be required to complete several drafts and proceed through stages of rigorous revision aided by peers and the instructor. Students may choose to take the AP English Language and Composition Exam offered by the College Board in May and earn college credits with a qualifying score.

This course is the equivalent of SEL 105 Composition and Culture (Part A) at Seton Hill University. Students who pass this course and pay the required fees are able to earn up to three credits from Seton Hill University that may be transferred to other universities.

CHS/AP ENGLISH LITERATURE AND COMPOSITION**Course Number: 118****Prerequisite: AP English Lang, Honors English 10
or English 10/11 with recommendation****College Credits: Fee for credits****AP Exam: Optional exam at the end of the course*****NCAA Approved Course****Credit/Term: 1.0/year****Grade Level: 11/12****Fulfills English Credit**

Description: Whether pursuing a career in the humanities, the sciences, business, or technology, the ability to read, write, and communicate effectively will create a foundation for success. The CHS/AP English Literature and Composition course develops these skills in a fun yet challenging way as students discuss and defend their interpretations of both classic and modern texts ranging from poetry and short stories to dramas and novels.

Students who pass this course and pay the required fees are able to earn six or three credits from Mt. Aloysius College that may be transferred to other universities. As another option, students may choose to take the AP Exam in May and earn college credits with a qualifying score.

CHS LITERATURE & PHILOSOPHY**Course Number: 123****Prerequisite: AP English Lang, Honors English 10,
or English 10/11 with recommendation****College Credits: Fee for credits*****NCAA Approved Course****Credit/Term: 1.0/year****Grade Level: 11/12****Fulfills English Credit**

Description: What is justice? What does it mean to act morally? Is the future decided by fate, or free will? These questions are just the beginning of a trip down the rabbit hole of philosophical thinking. By examining modern thinkers, classical philosophers, literary works, as well as contemporary media and current events, students will engage in a year-long pursuit of possible answers to these and many other questions. With an emphasis on discussion, debate, and critical analysis, students will not only respond to existing arguments, but challenge themselves to reconsider the “why” behind their own lives. The course will also include flexible learning environments, cross-curricular projects, real world applications, and multi-course concepts. It is English meets Social Studies like you have never seen before. Readings include the works of Aristotle, Plato, Sartre, and Nietzsche, current events, short stories, and contemporary film studies, as well as the novels like modern *No Exit*, and *Brave New World*, and classics like *The Stranger*, *The Republic* and *Crime and Punishment*.

This course is the equivalent of both PHL 101 Introduction to Philosophy and ENG 110 Rhetoric I at Mt. Aloysius College. Students who pass this course and pay the required fees are able to earn up to six credits from Mt. Aloysius College that may be transferred to other universities.

As with all of the English courses, students will study related vocabulary, prepare and present speeches/presentations, explore research topics, and respond orally and in writing to the ideas presented, read, and discussed in this course.

ENGLISH AS A SECOND LANGUAGE (ESL) COURSES

ESL SUPPORT (LEVEL 1-2)

Course Number: 151

Prerequisite: Teacher Recommendation

Credit/Term: 1.0/year

Grade Level: 9-12

Description: ESL Support provides Work and Academic Readiness Levels 1-2 to support English learners as they work to meet the Academic Standards for Career Education and Work, as well as the Pennsylvania English Language Proficiency Standards. This course provides Levels 1-2 ELs with language strategies and college & career readiness by integrating vocabulary, grammar, reading & writing, listening & speaking, as well as critical thinking and collaboration throughout the duration of the course

Students will explore and develop their understanding of independent reading skills to advance workplace and academic readiness with differentiated instruction to meet the needs of each individual student's literacy growth. Special attention will be given to vocabulary focus, language function, grammar, reading strategies, as well as the writing process.

ESL ELA LEVEL 1-2

Course Number: 161

Prerequisite: Teacher Recommendation

Credit/Term: 1.0/year

Grade Level: 9-12

Description: ESL English Language Arts develops Levels 1-2 students' ability to comprehend, appreciate, and respond to different types of written and visual texts for a variety of audiences and social contexts to cultivate cognitive academic language proficiency in the four language domains. Oral and literacy strategies integrate listening, speaking, reading, and writing at increasing levels of accuracy and fluency. Literature selections include a variety of genres and enable students to analyze and make connections among various texts. The students will continue to develop their English language proficiency with steadily increasing degrees of rigor at the appropriate levels of the Pennsylvania English Language Proficiency Standards, as well as the PA Academic Standards for English Language Arts.

Students will explore and develop their understanding of the essential questions:
Who Am I? What Makes Us Wise? What Makes Us the Same? What Makes Us Different? What Does It Take to Survive? How Important is it to Fit in? What is Most Important in Life?
Special attention will be given to vocabulary focus, language function, grammar, reading strategies, as well as the writing process.

ESL ELA LEVEL 3**Course Number: 163****Prerequisite: Teacher Recommendation****Credit/Term: 1.0/year****Grade Level: 9-12**

Description: ESL English Language Arts develops Levels 2-3 students' ability to comprehend, appreciate, and respond to different types of written and visual texts for a variety of audiences and social contexts to cultivate cognitive academic language proficiency in the four language domains. Oral and literacy strategies integrate listening, speaking, reading, and writing at increasing levels of accuracy and fluency. Literature selections include a variety of genres and enable students to analyze and make connections among various texts. The students will continue to develop their English language proficiency with steadily increasing degrees of rigor at the appropriate levels of the Pennsylvania English Language Proficiency Standards, as well as the PA Academic Standards for English Language Arts.

Students will explore and develop their understanding of the essential questions:
What Influences How You Act?, How Do Families Affect Us?, Do We Find or Create Our True Selves? How Much Should People Help Each Other? Do People Get What They Deserve?
What Rights and Responsibilities Should Teens Have?
Special attention will be given to vocabulary focus, language function, grammar, reading strategies, as well as the writing process.

ESL FRESHMAN SEMINAR**Course Number: 152****Prerequisite: Teacher Recommendation****Credit/Term: 1.0/year****Grade Level: 9**

Description: ESL Seminar is tailored to developing and expanding English learners seeking to excel in academic settings and academic language, as they work to meet the Academic Standards for Career Education and Work and the PA Academic Standards for English Language Arts. The course integrates material relevant to grade level content area courses, ensuring that they can engage with complex academic texts, participate in classroom discussions, deliver presentations, and write effectively. Special attention is given to academic and career readiness by integrating vocabulary, grammar, reading & writing, listening & speaking, as well as critical thinking and collaboration throughout the duration of the course. The students will continue to develop their English language proficiency with steadily increasing degrees of rigor at the appropriate levels of the Pennsylvania English Language Proficiency Standards.

The course objectives for supporting English learners encompass a broad spectrum of language skills, cultural awareness, and practical application. These objectives aim to enhance English language proficiency, vocabulary, language function, and grammar, as well as reading strategies and the writing process. The goals include preparing learners for academic and everyday communication, self-directed learning, and assessment. Encouraging critical thinking, problem-solving, and fostering a respectful, inclusive environment are also vital components of such courses, adapted to the specific needs and goals of the learners all while promoting cultural sensitivity and understanding.

ESL SOPHOMORE SEMINAR**Course Number: 154****Prerequisite: Teacher Recommendation****Credit/Term: 1.0/year****Grade Level: 10**

Description: ESL Seminar is tailored to developing and expanding English learners seeking to excel in academic settings and academic language, as they work to meet the Academic Standards for Career Education and Work and the PA Academic Standards for English Language Arts. The course integrates material relevant to grade level content area courses, ensuring that they can engage with complex academic texts, participate in classroom discussions, deliver presentations, and write effectively. Special attention is given to academic and career readiness by integrating vocabulary, grammar, reading & writing, listening & speaking, as well as critical thinking and collaboration throughout the duration of the course. ENGLISH ELECTIVES

CREATIVE WRITING
Course Number: 126
Prerequisite: None
****NCAA Approved Course***

Credit/Term: .50/sem.
Grade Level: 9-12

Description: There are many ways to tell a story, from simply typing a Google doc to turning a script into a podcast, creating Google Slides “books” for preschool students, and making stop-motion animation movies. This is an elective class for students who like to create their own stories, plays, personal reflections, or poems. Students will learn how to write more effective dialogue and create more realistic settings. They draft and revise their work in class.

PUBLIC SPEAKING
Course Number: 127
Prerequisite: None
****NCAA Approved Course***

Credit/Term: .50/sem.
Grade Level: 9-12

Description: This elective provides opportunities and practice for students who wish to develop oral communication with emphasis on activities that will help them in everyday speaking situations. Impromptu speeches, extemporaneous talks, and formal speaking assignments help to improve poise, self-confidence, and voice projection. Specialized forms of public address assignments require selection of a topic, audience consideration, speech composition, and effective physical delivery.

INTRODUCTION TO JOURNALISM
Course Number: 130
Prerequisite: None

Credit/Term: .50/sem.
Grade Level: 9-12

Description: This is an elective class for students who have experienced success in essay writing in English class and who eventually want to work for the school newspaper, The Purbalite. In this prerequisite course for the Newspaper class, students will learn how to write news, sports and feature stories, as well as reviews of movies, TV shows, music, and video games. Students also will write opinion columns, create video stories, and record podcasts.

NEWSPAPER: ONE SEMESTER OR FULL YEAR
Course Number: 132(Year); Grade Level 10-12 or
133(Sem); Grade Level 9-12
Prerequisites: Introduction to Journalism

Credit/Term: 1.0/year or
Credit/Term: .50/sem.

Description: After taking the Introduction to Journalism class, students can take either full-year Newspaper (132) or one-semester Newspaper (133). Students in these classes publish the online student newspaper, The Purbalite. This involves writing and editing stories, reviews, and columns; taking photos; recording podcasts, and creating video stories. Students also maintain the newspaper’s social media sites and create the senior farewell print issue in the spring. Because students continually work on new projects, these electives can be taken more than once, with students receiving credit each time. Students applying for an editor position must take the full-year version of the course.

MINI-THON: MAKING IT HAPPEN!**Course Number: 134****Prerequisite: None*****NCAA Approved Course****Credit/Term: 1.0/year****Grade Level: 10-12**

Description: This full year project-based course allows students to participate in a variety of activities showing how literacy applies to real life. It allows students the opportunity to learn about philanthropic organizations while making meaningful, charitable donations and developing their research skills focused on social media platforms and event management. Students will build upon their communication skills, making connections not only with their peers but community members and businesses. Students are required to plan and participate in fundraisers and the annual Mini-THON event. These events will take place during and after school. Students will also use skills developed in class to obtain corporate sponsorship(s) for BHS Mini-THON.

MINI-THON: MAKING IT HAPPEN! 2**Course Number: 135****Prerequisite: MINI-THON: MAKING IT HAPPEN!****Credit/Term: 1.0/year****Grade Level: 10-12**

Description: This full year project-based course allows students to further develop and hone skills introduced in Mini-THON: Making It Happen! Students in this course will work on planning and executing the Mini-THON event, while also taking on a leadership role teaching their peers in the Mini-THON: Making It Happen! course about the philanthropic organization Four Diamonds. This course offers a unique opportunity for students to build upon their team building skills, while also gaining hands-on experience working with their peers and members of the school community. Furthermore, students will develop networking skills which are essential for a successful future. Students will develop a deeper understanding and appreciation for philanthropy through creating, organizing, and participating in Mini-THON activities. A prerequisite for this course is required. (Students should have taken the Mini-THON, Making It Happen! course and have attended at least one overnight Mini-THON event.)

THEATRE**Course Number: 137****Prerequisite: None****Credit/Term: .50/sem.****Grade Level: 9-12**

Description: This course allows students to participate in various activities that improve performance techniques and build an understanding of theatrical performances. Students will develop their skills in the areas of ensemble collaboration, memorization, characterization, imagination, and production. This course gives both new and experienced actors opportunities to enhance interpretation of character and performance skills. Students will acquire the necessary stage presence and technique to perform in front of larger audiences as well as work collaboratively with others in all creative endeavors. This elective can be taken more than once for credit. Students enrolled in this course will be required to participate in two performance-based assessments: the Fall Play and Theatre Showcase. Participation in the Fall Play can be either on-stage (i.e. acting as a character) or backstage (i.e. in a directorial, stage crew, or technical role), but all students will perform on-stage in the Theatre Showcase.

MODERN MEDIA LITERACY**Course Number: 180****Prerequisite: None****Credit/Term: .50/sem.****Grade Level: 10-12**

Description: This introductory course will provide students with the tools and analytical skills to decipher and question the accuracy of modern media. Students will learn the difference between propaganda, news, opinion, entertainment and advertising. Students will utilize social media to seek out accurate information, embellishments and outright falsehoods. Concepts of the First Amendment will be intertwined throughout the course to provide a basis of protected speech and the necessity for an accurately informed electorate. The culminating project will require students to research and develop a campaign of disinformation, understand their targeted audience and how best to create the sense of realism, and evaluate and explain the possible consequences of their disinformation.

**This course also appears as a Social Studies elective.*

INTRODUCTION TO LINGUISTICS AND LANGUAGE**Course Number: 128****Prerequisite: None****Credit/Term: .50/sem.****Grade Level: 10-12**

Description: This course studies the science, psychology, and history behind language. Students will explore the basics of phonetics, morphology, syntax, semantics, historical linguistics, sociolinguistics, language acquisition, and the application of language to artificial intelligence. Instruction will primarily focus on how each of these aspects influence the English language with occasional comparisons to other world languages. Critical thinking and self-reflection will be paramount as students define and understand the characteristics and importance of language, as well as how meaning is constructed, how languages evolve, and motivational influences on language use and choice. Students will also learn about language creation through a book-club-style novel study. The final project will allow students to further investigate linguistic topics such as second language acquisition, language contact, historical linguistics, neurolinguistics, and computational linguistics.

FUNCTIONAL SOCIAL STUDIES**Course Number: 092****Prerequisite: Teacher Recommendation****Credit/Term: 1.0/year****Grade Level: 9-12**

Description: This course offers a tailored curriculum meeting the specific needs of students with diverse learning challenges in science and social studies. The goal is to provide functional knowledge and skills directly applicable to daily lives, promoting independence, self-advocacy, and navigating the world. The curriculum focuses on life skills such as understanding civic responsibilities, personal finance, and community engagement, fostering cultural awareness and understanding different societies. Students connect course concepts to their communities, encouraging active participation and a sense of belonging in a special education setting.

US HISTORY AND GOVERNMENT**Course Number: 202****Prerequisite: None******NCAA Approved Course*****Credit/Term: 1.0/year****Grade Level: 9**

Description: Through the study of post-Civil War America through the beginning of the 20th century, students will evaluate how patterns from the past are present in our world today. By using inquiry-based learning experiences, students will consider conflict and cooperation, as well as continuity and change, through the lenses of social, political, economic, and cultural concerns. The skills and knowledge gained during this course will allow students to understand their position in modern America and help to shape their future role as citizens. Students will develop skills such as note taking, organization, study skills, presenting, reading and writing.

HONORS US HISTORY AND GOVERNMENT**Course Number: 204****Prerequisite: None******NCAA Approved Course*****Credit/Term: 1.0/year****Grade Level: 9**

Description: This course will focus on continuity and change over time while preparing students well for the skills and knowledge important in future Advanced Placement Social Studies courses. Students will examine conflict and cooperation throughout history through the study of Post-Civil War America through the beginning of the 20th century. The skills and knowledge gained during this course will allow students to understand their positions in modern America and help to shape their future roles as citizens. Students will develop advanced skills such as formulating their own ideas about government and history, advanced written expression, and higher level reading skills. Students should be highly skilled in reading, writing, and speaking. This course serves as preparation for future Advanced Placement social studies courses.

WORLD HISTORY**Course Number: 205****Prerequisite: US History and Government or Honors US History and Government******NCAA Approved Course*****Credit/Term: 1.0/year****Grade Level: 10**

Description: This year-long course requires students to analyze global interconnectedness from 1450 CE to the present. Students will connect patterns of continuity and change, contributions of individuals and groups, conflict and cooperation in social, political, and economic trends. Students will use their knowledge of the past to influence decisions which affect the future and will exhibit historical thinking skills through document analysis, inquiry-based learning, and geographic themes. Global citizenship and digital literacy will be significant topics in this course.

AP WORLD HISTORY: MODERN**Course Number: 206****Prerequisite: US History and Government or Honors US History and Government*****Summer work may be required*****AP Exam: Optional exam at the end of the course.******NCAA Approved Course*****Credit/Term: 1.0/year****Grade Level: 10**

Description: AP World History: Modern is designed to be the equivalent of a semester introductory college or university world history course. In AP World History: Modern students investigate significant events, individuals, developments, and processes in historical periods from approximately 1200 CE to the present. Students develop and use the same skills, practices, and methods employed by historians: analyzing primary and secondary sources; making historical comparisons; utilizing reasoning about contextualization, causation, and continuity and change over time; and developing historical arguments. The course provides five themes that students explore throughout the course in order to make connections among historical developments in different times and places: interaction between humans and the environment; development and interaction of cultures; state building, expansion, and conflict; creation, expansion, and interaction of economic systems; and development and transformation of social structures. Students should be strong independent readers, analytical thinkers, and concise writers if considering this course. Only students with accelerated reading comprehension, analysis, and writing abilities who are motivated and self-directed should take this course. This course has been shown to increase readiness for college.

MODERN UNITED STATES HISTORY**Course Number: 209****Prerequisite: World History or AP World History******NCAA Approved Course*****Credit/Term: 1.0/year****Grade Level: 11**

Description: Through exploration of topics from World War I to the present day, students enrolled in this class will understand America's role in the world and impacts of foreign and domestic policies that influence other world governments. Through an inquiry-based curriculum, students will understand the impacts of changing social, economic, political technological development and ecological considerations on United States and world affairs. Students will consider their own roles in these transformations, and how they can impact the future of our country. Issues of citizenship and acting as active and diligent voters will be considered.

AP UNITED STATES HISTORY**Course Number: 211****Prerequisite: World History or
AP World History*****Summer work may be required*****AP Exam: Optional exam at the end of the course.******NCAA Approved Course*****Credit/Term: 1.0/year****Grade Level: 11-12**

Description: AP U.S. History is designed to be the equivalent of an introductory college or university U.S. history course. In AP U.S. History students investigate significant events, individuals, developments, and processes in nine historical periods from approximately 1491 to the present. Students develop and use the same skills, practices, and methods employed by historians: analyzing primary and secondary sources; making historical comparisons; utilizing reasoning about contextualization, causation, and continuity and change over time; and developing historical arguments. The course also provides seven themes that students explore throughout the course in order to make connections among historical developments in different times and places: American and national identity; migration and settlement; politics and power; work, exchange, and technology; America in the world; geography and the environment; and culture and society. Students should be strong independent readers, analytical thinkers, and concise writers if considering this course.

CHS PERSONAL FINANCE & ECONOMICS**Course Number: 213****Prerequisite: Modern United States History or
AP United States History****College Credits: Fee for credits****Credit/Term: .50/sem****Grade Level: 12**

Description: This class is equivalent to ARTSC 0112 Right Start to College 2 course at the University of Pittsburgh. The course is focused on college selection/major/career exploration and planning related aspects of financial literacy. Topics covered include transferable skills, student loans, personal finance, creation of successful college applications and financial aid documents and student loan payments. Other skills highlighted include creation of a personal brand, interviewing strategies, conducting a social media audit, presentation skills, networking strategies, and college readiness. Throughout the semester, the Resume, Cover Letter, Career Research Report, Career Interest Survey, and Budget Project components of the Senior Graduation Project will be addressed. At the completion of the course, students can earn one credit from the University of Pittsburgh by registering and paying the requisite tuition and enrollment fees as required by the University.

**PERSONAL FINANCE & ECONOMICS:
MILITARY, TRADES, EMPLOYMENT
FOCUS**

**Credit/Term: .50/sem
Grade Level: 12**

Course Number: 212

**Prerequisite: Modern United States
History or AP United States History**

Description: This semester course is designed to aid students who are seeking employment, entering the trades or the military upon graduation. The course will focus on soft & transferable skills to the workplace, managing a budget, future earning potential, career certifications, creating career documents including resumes, applying for positions and items needed to enter the trades/military/workplace effectively after high school. Highlighted skills include demonstrating an understanding of individual choices that directly influence occupational goals, managing financial investments from a paycheck, insurance elections, credit, mortgages, interviewing, networking, conducting a social media audit, conflict resolution, contract negotiation and team building. Practice entrance exams for craft employment will be reviewed & given. Throughout the semester, the Resume, Cover Letter, Career Research Report, Aptitude & Career Interest Surveys, and Budget Project components of the Senior Graduation Project will be addressed. This course will provide a foundational understanding for making informed personal decisions leading to adulthood in the very near future.

**PERSONAL FINANCE & ECONOMICS with PARTNER UP
PITTSBURGH - COLLEGE & CAREER
READINESS**

**Credit/Term:
1.0/year
Grade Level: 12**

Course Number: 215

**Prerequisite: Modern United States History or AP
United States History**

Description: This full year course is designed in conjunction with PartnerUp Pittsburgh for high school seniors who are undecided regarding their career and/or educational path. This course is recommended for students interested in gaining experience, information and skills that will be valuable to them regardless of where they head after graduation are a good fit for this course. The PartnerUp initiative is a career-readiness program that prepares young talent for full time careers in a field of interest (with many opportunities for advancement). Students may begin directly after high school with a Pittsburgh employer who guarantees tuition reimbursement/assistance, payment, and possibly full benefits as the student works. This is beneficial not only to students, but to the employers who are looking to fill employment gaps with new talent. At the completion of the course, students who have met the requirements, attend Super Match Day to interview, to accept a potential employment offer, and to gain full time professional paid experience as a student. This may result in accelerated career growth with an established Pittsburgh employer as they earn a degree with tuition assistance. Employers include AHN, PNC, People's Natural Gas, Giant Eagle and Comcast among others. Students must apply and be accepted into the program in order to participate. This is an excellent opportunity for students to connect with some of Pittsburgh's top employers while getting your college education paid for. Find more information at:

<https://www.pnc.com/en/about-pnc/topics/pnc-pov/community/partner-up-program.html>

Throughout the course the Resume, Cover Letter, Career Research Report, Aptitude & Career Interest Surveys, and Budget Project components of the Senior Graduation Project will be addressed.

Seniors must have enough credits to have senior standing, be on track to graduate in June, have a high attendance rate and maintain at least a 2.5 GPA or higher in order to participate in this program.

AP UNITED STATES GOVERNMENT AND POLITICS**Course Number: 219****Prerequisite: Modern United States History or AP United States History*****Summer work may be required*****AP Exam: Optional exam at the end of the course.******NCAA Approved Course*****Credit/Term: 1.0/year****Grade Level: 12**

Description: AP Government encompasses the intensive study of the majority of political systems in existence today. The course will require primary source readings, regular debates on important governmental issues, and an application of course knowledge for the purpose of analyzing significant political activities in the modern world. Any student who is passionate about politics and government is welcome to attend this class. Throughout the course of the year, the Resume, Cover Letter, Career Research Reports, Career Interest Survey, and Budget Project components of the Senior Graduation Project will be addressed.

AP ECONOMICS (MICRO and MACRO)**Course Number: 221****Prerequisite: None*****Summer work may be required*****AP Exam: Optional exam at the end of the course.******NCAA Approved Course*****Credit/Term: 1.0/year****Grade Level: 11-12**

Description: This course is recommended for students who are considering a career in business, law, politics, marketing finance or economics. Through computer-based tutorials, classroom discussion, and internet and library-based research students connect the day-to-day economic events that shape our local and global environment with economic theory. Microeconomics assists in understanding the nature and function of types of firms and the role the government plays in promoting greater efficiency and equity. Macroeconomics looks at the economic system as a whole, investigating such concepts as economic growth, monetary policy, and national income and price determination. Throughout the course of the year, the Resume, Cover Letter, Career Research Reports, Career Interest Survey, and Budget Project components of the Senior Graduation Project will be addressed with seniors.

CHS EUROPEAN HISTORY**Course Number: 241****Prerequisite: AP US History or Modern US History****College Credits: Fee for credits******NCAA Approved Course*****Credit/Term: 1.0/year****Grade Level: 12**

Description: What are the true origins of the modern Western world? This course will examine European History from the time of the Renaissance through the end of the Cold War. As an extension of 10th and 11th grade Advanced Placement history offerings, CHS European History will allow students to take a deeper and more personalized look at historical issues that shape our modern world. Further, through a unique block-scheduled pairing with CHS Literature & Philosophy, the course will allow for a unique investigation into the philosophical underpinnings of historical events and ideas. Additionally, the pairing of these two courses will include flexible learning environments, cross-curricular projects, real-world applications, and multi-course concepts. Social Studies meets English like you have never seen before. Topics of study will include the Renaissance, the Reformation, the Age of Exploration, the rise of Absolutism, the Scientific Revolution, the Enlightenment, the French Revolution, the rise of Conservatism and Nationalism, the Industrial Revolution, the World War, the Cold War, and the rise of Globalism. Primary and secondary sources will be considered, and previously learned historical thinking skills such as causation, periodization, comparison, change over time, contextualization, and argumentation will be further developed. College credit for this class may be purchased through Mt Aloysius College. Throughout the course of the year, the Resume, Cover Letter, Career Research Reports, Career Interest Survey, and Budget Project components of the Senior Graduation Project will be addressed. This course is the equivalent of HS102 World Civilizations Since 1500 at Mt. Aloysius College. At the completion of the course, students may earn college credits by registering and paying the requisite tuition and enrollment fees as required by the college.

SOCIAL STUDIES ELECTIVES

PSYCHOLOGY

Course Number: 216

Prerequisite: None

****NCAA Approved Course***

Credit/Term: .50/sem.

Grade Level: 10-12

Description: This course is designed as an introduction to the study of human behavior. Students will explore topics that include human growth and development, psychological methods, information processing, memory, and consciousness. Students are expected to be skilled in note taking, reading comprehension, presenting, and writing.

PSYCHOLOGY OF PERSONALITY

Course Number: 217

Prerequisite: None

****NCAA Approved Course***

Credit/Term: .50/sem.

Grade Level: 10-12

Description: Psychology of Personality provides students with the tools to explore the development of self. Various psychologists' theories of personality development are discussed. Mental and emotional health issues, abnormal personalities, and human interaction are among the areas of study. Students are expected to be skilled in note taking, reading comprehension, presenting, and writing.

INTRODUCTION TO SOCIOLOGY

Course Number: 218

Prerequisite: None

****NCAA Approved Course***

Credit/Term: .50/sem.

Grade Level: 10-12

Description: Sociology deals with the study of interpersonal relationships within society. Through examination of group interactions, students develop an awareness of conflict within contemporary society and are given an opportunity to voice possible solutions to these conflicts. Topics and material that may be considered controversial in nature include the study of peer, family, educational, criminal, religious, and racial groups.

LEADERSHIP

Course Number: 240

Prerequisite: None

Credit/Term: .50/sem.

Grade Level: 10-12

Description: Leadership is designed for students to explore what it means to be a leader in their personal lives, schools, and communities while looking to historical examples of leaders as models of behavior and action. Students will examine various historical leaders and analyze their qualities while working to model them in their own experiences. They will also be expected to read, write, and speak effectively as leaders. As a cumulative activity, students will complete a leadership project incorporating historical leadership examples and their own strengths to a real world situation.

MODERN MEDIA LITERACY
Course Number: 180
Prerequisite: None

Credit/Term: .50/sem.
Grade Level: 10-12

Description: This introductory course will provide students with the tools and analytical skills to decipher and question the accuracy of modern media. Students will learn the difference between propaganda, news, opinion, entertainment and advertising. Students will utilize social media to seek out accurate information, embellishments and outright falsehoods. Concepts of the First Amendment will be intertwined throughout the course to provide a basis of protected speech and the necessity for an accurately informed electorate. The culminating project will require students to research and develop a campaign of disinformation, understand their targeted audience and how best to create the sense of realism, and evaluate and explain the possible consequences of their disinformation.

**This course is also offered as an English elective.*

JOURNEY ACROSS BORDERS:
History of Immigration in the US and
Pittsburgh
Course Number: 230
Prerequisite: None

Credit/Term: .50/sem.
Grade Level: 10-12

Description: This course explores the rich history of immigration in the United States and specifically the Baldwin Whitehall community. This course provides students with a comprehensive understanding of the historical and contemporary dimensions of immigration in the United States and its impact on the local area. Through a combination of engaging activities and thought-provoking discussions, students will gain a deeper appreciation for the diverse threads woven into the fabric of the Baldwin Whitehall School District.

SPORTS AND POPULAR CULTURE
Course Number: 231
Prerequisite: None

Credit/Term: .50/sem.
Grade Level: 10-12

Description: This course examines the relationship between sports and popular culture and their impact on American society from 1900 to the present day. Students will explore the development of sports as a cultural phenomenon and its profound impact on societal values, identity, and entertainment. Delving into the historical context, the course also traces the evolution of popular culture alongside key moments in U.S. history. This course invites students to use their passions for high-interest topics in sports and popular culture to build a better understanding of American history but to also hone their critical thinking and writing skills essential for academic and personal success.

WORK STUDY
Course Number: 250
Prerequisite: None

Credit/Term: minimum of 1 credit,
maximum of 2 credits
Grade Level: 12

Pending Board Approval

Description: Work study is a course designed for senior students seeking career exploration opportunities, to increase their knowledge, skills, and abilities for further education, improve general employment skills, and “real world” work experience within a professional, productive and structured work setting. Please see page 92 of this document for the program requirements.

MATHEMATICS ELECTIVES

CHS/AP Statistics
 CHS Statistics
 Discrete Math
 Financial Algebra
 Financial Literacy

FUNCTIONAL MATH
Course Number: 093
Prerequisite: Teacher Recommendation

Credit/Term: 1.0/year
Grade Level: 9-12

Description: This course is designed to impart practical and functional mathematical skills to students with diverse learning needs. Emphasis is placed on fostering independent living and daily functioning. Content includes concepts directly applicable to real-life situations, such as money management, measurement and units, time management, basic arithmetic operations, and problem-solving. The goal is to ensure students acquire the mathematical skills necessary for a more independent and functional life, with curriculum tailored to meet individual needs and abilities in a special education setting.

FOUNDATIONS OF MATH/PRE-ALGEBRA
Course Number: 02049
Prerequisite: Teacher Recommendation

Credit/Term: 1.0/year
Grade Level: 9-10

Description: In Foundations of Math, students will (1) develop fluency with basic math skills that include addition, subtraction, multiplication and division, will (2) find answers using multi-step addition, subtraction, multiplication and division skills, will (3) will compute problems using decimals, fractions and integers, and will (4) apply basic math skills to solve real world math problems. Students will receive whole group instruction as well as individual instruction based on student need. ALEKS, a computer based mathematics program, will be used as a supplementary instruction tool as well as assessment tool to measure student success. In most cases, calculators will not be used in this class.

ALGEBRA I
Course Number: 305
****NCAA Approved Course***

Credit/Term: 1.0/year
Grade Level: 9

Description: This course develops skills and concepts necessary for students to succeed in subsequent math and science courses and is aligned to Algebra I Keystone Anchors. This course begins with a review of order of operations, evaluating expressions, solving one-step and multi-step equations, and functions. Students will progress to new topics that will include coordinate geometry, systems of linear equations and inequalities, exponents, polynomials, data analysis and probability. Students will explore application problems that focus on developing problem solving skills. At the end of this course, students will take the Keystone Algebra 1 Exam. Co-taught sections of this course are available to all students as needed and recommended.

GEOMETRY
Course Number: 312
Prerequisite: Algebra I
****NCAA Approved Course***

Credit/Term: 1.0/year
Grade Level: 9-10

Description: Geometry is designed to interest students in the study and application of geometry to art, nature, industry, and engineering. The usefulness of geometry as an aid to basic reasoning is promoted. Inductive reasoning is used throughout the course to enable the student to arrive at conjectures through investigation. Co-taught sections of this course are available to all students as needed and recommended.

HONORS GEOMETRY
Course Number: 313
Prerequisite: Algebra I
Summer work is required
****NCAA Approved Course***

Credit/Term: 1.0/year
Grade Level: 9-10

Description: Honors Geometry is recommended for students who have successfully completed Algebra I with a 90% average or better. Honors Geometry is a fast paced, high-level course offering a deeper comprehension of geometry concepts. The study of geometry and algebra is merged, and the course provides a valuable experience with real numbers. Inductive reasoning is used throughout the course to enable the students to arrive at conjectures through investigation.

ALGEBRA II
Course Number: 322
Prerequisite: Algebra I
****NCAA Approved Course***

Credit/Term: 1.0/year
Grade Level: 10-12

Description: The concepts studied in Algebra II develop deeper comprehension of algebraic structure. New symbolism, concepts, and topics are introduced to expand student understanding and knowledge and to provide problem-solving techniques for solutions of more complex equations.

HONORS ALGEBRA II
Course Number: 323
Prerequisite: Algebra I
Summer work is required
****NCAA Approved Course***

Credit/Term: 1.0/year
Grade Level: 9-11

Description: Honors Algebra II is recommended for students who have successfully completed Algebra I with a 90% average or better. Honors Algebra II is a fast paced, high-level course where a deeper comprehension of algebraic concepts is provided. Similar to Algebra II, new symbolism, concepts, and topics are introduced to expand student understanding and knowledge and to provide problem-solving techniques for solutions of more complex equations. In addition, enrichment activities challenge students to expand analytical skills. The use of a graphing calculator is required. This course is a college preparatory course for careers related to mathematics and science.

COLLEGE ALGEBRA AND TRIGONOMETRY
Course Number: 333
Prerequisite: Algebra II
****NCAA Approved Course***

Credit/Term: 1.0/year
Grade Level: 11-12

Description: This course expands upon the concepts learned from Algebra II and emphasizes the analysis of the graph. Logarithmic and exponential functions will also be introduced. Trigonometry topics include trigonometric functions, proof of trigonometric identities, and applications of triangles. Additionally SAT and ACT preparation is focused in the first nine week period. The use of the graphing calculator is required.

AP PRE-CALCULUS
Course Number: 334
Prerequisite: Honors Algebra II or Algebra II
Summer work is required
****NCAA Approved Course***

Credit/Term: 1.0/year
Grade Level: 10-12

Description: This honors level course consists of a study of trigonometry and pre-calculus mathematics. Trigonometry topics include trigonometric functions and their inverses, proof of trigonometric identities, trigonometric equations, applications to triangles, and graphing trigonometric functions. Pre-Calculus includes a study of important concepts of calculus with an emphasis on graphical analysis. Students will study domain, range, and extreme of functions along with logarithmic/exponential functions, introduction to limits, and derivatives. Additionally, enrichment activities challenge students to expand analytical skills. Successful completion of this course prepares students for Calculus. The use of a graphing calculator is required.

HONORS CALCULUS
Course Number 340
Prerequisite: Honors Trigonometry and Pre-Calculus or College Algebra/Trigonometry
Summer work is required
****NCAA Approved Course***

Credit/Term: 1.0/year
Grade Level: 11-12

Description: Calculus develops a high degree of mathematics sophistication in the analysis and understanding of abstract concepts and symbols. Topics covered in this course include functions and graphs, limits, derivatives, trigonometric functions, application of the derivative, integral, applications of the integral, and exponential and logarithmic functions. The use of a graphing calculator is required and this course focuses applications of calculus.

AP CALCULUS AB
Course Number: 341
Prerequisite: Honors Trigonometry and Pre-Calculus
Summer work is required
AP Exam: Optional exam at the end of the course.
****NCAA Approved Course***

Credit/Term: 1.0/year
Grade Level: 11-12

Description: Calculus develops a high degree of mathematics sophistication in the analysis and understanding of abstract concepts and symbols. This course consists of an intensive study of limits, differentiation, and integration of algebraic, trigonometric, exponential, and logarithmic functions will comprise the major part of the course. Enrichment activities place greater emphasis on the properties of elementary functions and fundamental theorems. The use of a graphing calculator is required. This course is designed for those students who plan to attend a college or university and major in mathematics, mathematically related science, or engineering.

AP CALCULUS BC
Course Number: 342
Prerequisite: AP Calculus AB
Summer work is required
AP Exam: Optional exam at the end of the course.
****NCAA Approved Course***

Credit/Term: 1.0/year
Grade Level: 11-12

Description: This college-level course is designed for those 12th grade students who have successfully completed AP Calculus AB and have a very strong mathematical background. Topics include differentiation, integration, series, and polar/parametric equations. The use of a graphing calculator is required. This course is designed for students who plan to attend a college or university and major in a mathematically related field such as Science or Engineering.

MATH ELECTIVES

CHS/AP STATISTICS

Course Number: 351

Prerequisite: Algebra II

Summer work is required

AP Exam: Optional exam at the end of the course

College Credits: Fee for credits

****NCAA Approved Course***

Credit/Term: 1.0/year

Grade Level: 11-12

Description: CHS/AP Statistics is comparable to introductory statistics courses for Science, Mathematics, and Engineering majors in colleges and universities and meets the University of Pittsburgh's STAT 1000 course credit requirements. The four main topics covered are data production, data analysis, probability, and statistical inference.

Ideas such as random sampling, distinguishing between populations and samples, graphical displays, central tendency, standard deviation, binomial and geometric probabilities, confidence intervals, linear regressions, and analysis of variance, support the four main ideas. Students will also be preparing, throughout the course, to take the AP Exam. As another option, at the completion of the course, students can earn four college math credits from the University of Pittsburgh by registering and paying the requisite tuition and enrollment fees as required by the University. CHS/AP Statistics is strongly recommended for students attending four-year colleges and universities since most college majors require a statistics course. The use of a graphing calculator is required.

CHS STATISTICS

Course Number: 356

Prerequisite: Algebra II

Summer work is required

College credits: Fee for credits

****NCAA Approved Course***

Credit/Term: 1.0/year

Grade Level: 11-12

Description: This course is equivalent to 0200 Basic Applied Statistics course at the University of Pittsburgh. This course teaches methods and terminologies of descriptive and inferential statistics. Students who complete this course will be able to conduct their own analyses of standard one-sample or two-sample data sets, follow statistical reasoning, and read statistical reports with understanding.

Introductory topics in linear regression, analysis of variance, and contingency table analysis also will be covered. At the completion of the course, students can earn four college math credits from the University of Pittsburgh by registering and paying the requisite tuition and enrollment fees as required by the University. CHS Statistics is strongly recommended for students attending a 2 or 4 year post-secondary educational institution since most majors require a statistics course.

FINANCIAL ALGEBRA

Course Number: 326

Prerequisite: Algebra I

****NCAA Approved Course***

Credit/Term: 1.0/year

Grade Level: 12

Description: In this course, students explore algebraic thinking patterns and functions in a financial context. The course is an application-based learning approach incorporating Algebra I, Algebra II, and Geometry topics. The course also encourages students to be actively involved in applying mathematical ideas to their everyday lives. The course will focus on the stock market, modeling a business, banking, consumer credit, automobile ownership, employment basics, income taxes, independent living, and planning for retirement.

FINANCIAL LITERACY
Course Number: 324
Prerequisite: Algebra I

Credit/Term: 1.0/year
Grade Level: 11-12

Description: Financial Literacy is a course that gives students a head-start on their future by learning how to manage money and to consider the important financial decisions that young people make that have long-term consequences in the future. This course reinforces skills such as communication, mathematics, reading, research, and writing. Students of all backgrounds gain an understanding and appreciation of ethical money management. Topics studied include saving, budgeting, credit, debt, consumer awareness, financial planning, insurance, taxes, and giving.

DISCRETE MATH
Course Number: 325
Prerequisite: Algebra II

Credit/Term: 1.0/year
Grade Level: 11-12

Description: Discrete Math is designed to bridge the gap between theoretical mathematics and real-world applications. It emphasizes the practical relevance of mathematical concepts in various aspects of modern society. The course covers fundamental mathematical principles such as applications in management science, statistics, social choice, game theory, size and growth, probability models, set theory, and combinatorics.

| Grade 12 | Earth & Space Science | AP Biology Honors Organic Chemistry | AP Chemistry AP Physics 2 AP Environmental Science Honors Anatomy & Physiology Honors Organic Chemistry AP Biology Honors Exercise/Sports Physiology |

SCIENCE ELECTIVES:

Honors Anatomy & Physiology*
 Honors Exercise/Sports Physiology
 AP Biology*
 Honors Organic Chemistry
 AP Chemistry*
 AP Physics 2*
 Earth & Space Science
 AP Environmental Science*

* or (L) in the course title indicates a lab class. Lab periods are 1 additional period per week, scheduled with a study hall for the other 4 periods a week.

The Science Department recommends exposure in high school to content in the three primary sciences: Biology, Chemistry, and Physics. Multiple levels of each of these courses are offered to accommodate students. The chart above illustrates three possible pathways. Science electives can be taken in addition to core courses. Biology is a state requirement for all students.

INTEGRATED SCIENCE
Course Number: 400
Prerequisite: None
***NCAA Approved Course**

Credit/Germ: 1.0/year
Grade Level: 9

Description: This course is designed for ninth grade students who need to reinforce and build upon the basic science skills necessary for success in subsequent science courses and are not yet ready for Biology. Course topics include creating and analyzing graphs and diagrams, reading comprehension in scientific writing, and essential concepts and skills in the three major sciences. Students enrolled in this course would move on to take Biology and the accompanying keystone exam in their tenth grade year. Teacher recommendation is required to select this course.

FUNCTIONAL SCIENCE
Course Number: 093
Prerequisite: Recommendation

Credit/Germ: 1.0/year
Grade Level: 9-12

Description: This course offers a tailored curriculum meeting the specific needs of students with diverse learning challenges in science and social studies. The goal is to provide functional knowledge and skills directly applicable to daily lives, promoting independence, self-advocacy, and navigating the world. The curriculum focuses on real-world applications of scientific concepts, including health and nutrition, environmental awareness, and personal safety in a special education setting.

BIOLOGY
Course Number: 402
Prerequisite: None
***NCAA Approved Course**

Credit/Term: 1.0/year
Grade Level: 9

Description: This college and career preparatory biology course offers advanced skills and problem-solving techniques. Verbal skills, experimentation, and note taking are used to develop biological concepts of biochemistry, cell structures, genetics, evolution, and ecology. This course leads to a sequence of general science courses that include Chemistry and Physics. At the end of this course, students will take the Keystone Biology Exam.

HONORS BIOLOGY (L)
Course Number: 403
Prerequisite: None; *summer work is required*
***NCAA Approved Course**

Credit/Term: 1.0/year
Grade Level: 9

Description: A study of biochemistry, cell structure, genetics, evolution, and ecology are explored in this honors-level science class. Critical reading, critical writing, and verbal communication skills are needed to be successful in this course. Students utilize online resources and laboratory sessions to reinforce classroom lectures and discussions. Honors Biology is designed to be an introductory course for college-bound students intending to major in science or a related field and is a prerequisite to AP Biology. At the end of this course, students will take the Keystone Biology Exam.

APPLIED CHEMISTRY
Course Number: 410
Prerequisite: Biology
****NCAA Approved Course***

Credit/Term: 1.0/year
Grade Level: 10-11

Description: This course introduces students to basic chemistry concepts through society-oriented topics. Topics include water quality, air quality, energy, resources, consumer goods, and career exploration. This course will focus more on the concepts of chemistry than the mathematical analysis of those concepts. Students will also learn by experiencing concepts first hand through activities. This course is intended for non-science oriented students who may or may not be planning college careers, and is not an appropriate choice for those going on to most physics courses, organic chemistry, or AP chemistry.

CHEMISTRY
Course Number: 411
Prerequisite: Biology, Algebra I
****NCAA Approved Course***

Credit/Term: 1.0/year
Grade Level: 10

Description: Chemistry provides an in-depth study of substances and their properties. The course is highly descriptive with moderate mathematical applications and is appropriate for students who desire a fundamental knowledge of chemical principles. The concepts are presented through classroom discussions, laboratory investigation, and individual or group projects. This course is designed primarily for students who have successfully completed both Biology and Algebra I and are not planning to pursue the sciences or related fields beyond high school.

HONORS CHEMISTRY (L)
Course Number: 412
Prerequisite: Biology or Honors Biology, Algebra I;
Summer work is required
****NCAA Approved Course***

Credit/Term: 1.0/year
Grade Level: 10

Description: Honors Chemistry provides an in-depth study of chemistry. Students develop the skills of critical thinking, inquiry, problem solving, and laboratory techniques. It includes the study of atomic structure, physical and chemical properties, quantitative investigation of chemical reactions, thermodynamics, kinetics, and other chemical principles. This course is highly mathematical and is recommended for those students who have aspirations of entering the sciences or related disciplines such as engineering, medicine, nursing, mathematics, and computer science.

APPLIED PHYSICS
Course Number: 420
Prerequisite: Applied Chemistry, Algebra I
****NCAA Approved Course***

Credit/Term: 1.0/year
Grade Level: 11

Description: This course is designed to convey an understanding and appreciation for the concepts and principles of physics by highlighting them within our everyday experiences. The course will utilize real-world examples to explain physical concepts. This course is intended for non-science oriented students who may or may not be planning college careers, and is not an appropriate choice for those going on to AP Physics 2.

PHYSICS**Course Number: 421****Prerequisite: Chemistry****Co-requisite: Algebra II******NCAA Approved Course*****Credit/Term: 1.0/year****Grade Level: 11-12**

Description: In this course, students will examine the topics of mechanics, including motion, forces and energy. Students learn physics through conceptual thinking, mathematical problem solving, and laboratory investigations. This course is appropriate for any college-bound student who has successfully completed the Chemistry 411 course and is currently enrolled in Algebra II or higher but is not planning to pursue the more mathematical sciences or related fields beyond high school.

AP PHYSICS 1 (L)**Course Number: 422****Prerequisite: Honors Chemistry and Honors Algebra II****Co-requisite: Honors Trigonometry and Pre-Calculus;*****Summer work is required******AP Exam: Optional exam at end of the course*******NCAA Approved Course*****Credit/Term: 1.0/year****Grade Level: 11-12**

Description: This course is offered for serious, college-bound students preparing themselves to enter the sciences or scientific fields such as engineering, research, or medicine. It is also recommended for those who intend to study law or other professions where problem solving and critical thinking are necessary. It covers the fundamental topics of kinematics, dynamics, circular motion, gravitation, energy, momentum and rotational mechanics. It requires a deep conceptual understanding of these topics, as well as challenging mathematical problem solving using algebra, geometry, and trigonometry.

AP PHYSICS C: MECHANICS (L)**Course Number: 425****Prerequisites: Honors Chemistry and
Honors Trigonometry and Pre-Calculus****Co-Requisite: AP Calculus AB*****Summer work is required******AP Exam: Optional exam at the end of the course*******NCAA Approved Course*****Credit/Term: 1.0/year****Grade Level: 11-12**

Description: This course is a calculus based college-level physics course that covers the topic of mechanics to a great depth of understanding and mathematical application. It adheres to the required syllabus by The College Board, which includes kinematics, Newtonian mechanics, work, energy, power and rotational mechanics. Therefore, it is equivalent to the first-semester calculus based college physics course required by any engineering or physical science major. Since there is a significant amount of material that needs to be covered by the AP test date in early May, it should only be taken by students who are well prepared in both math and science.

SCIENCE ELECTIVES

HONORS ANATOMY AND PHYSIOLOGY (L)

Course Number: 404

Prerequisite: Biology or Honors Biology;

Recommended: Chemistry

Summer work is required

****NCAA Approved Course***

Credit/Term: 1.0/year

Grade Level: 10-12

Description: Students enrolled in this course will study human anatomy, physiology, histology, and selected systems of the human body. Students will utilize virtual simulations, the internet, and laboratory sessions to reinforce class lectures and discussions. The dissection of a representative vertebrate will be used to compare and contrast the anatomy of the preserved specimens to those of a human. The terminology utilized will be very helpful to those students selecting careers in the medical professions including nursing, medical technology, and other health-related careers.

AP BIOLOGY (L)

Course Number: 406

Prerequisite: Honors Biology & Chemistry;

Recommended: Physics

Summer work is required

AP Exam: Optional exam at the end of the course

****NCAA Approved Course***

Credit/Term: 1.0/year

Grade Level: 11-12

Description: This course is the equivalent of a first level college biology sequence taken by biology majors. The AP Biology course closely adheres to the course outline suggested by The College Board. Activities include twelve laboratory exercises and a rigorous reading schedule. An introductory college text is used for the course. It is recommended that the student be self-motivated and goal-oriented.

AP ENVIRONMENTAL SCIENCE (L)

Course Number: 407

Prerequisite: Biology or H Biology, Algebra 1

Summer work is required

Pre-/Co-requisite: Chemistry or H Chemistry

AP Exam: Optional exam at end of the course

****NCAA Approved Course***

Credit/Term: 1.0/year

Grade Level: 10-12

Description: The AP Environmental Science course is designed to be the equivalent of an introductory college course in environmental science, through which students engage with the scientific principles, concepts, and methodologies required to understand the interrelationships within the natural world. The course requires that students identify and analyze natural and human-made environmental problems, evaluate the relative risks associated with these problems, and examine alternative solutions for resolving or preventing them. In addition, students examine environmental laws and regulations with a focus on the 3 pillars of sustainability: social, economical, and environmental.

AP CHEMISTRY (L)
Course Number: 415
Prerequisite: Honors Chemistry;
Recommended: Physics
Summer work is required
AP Exam: Optional exam at the end of the course
****NCAA Approved Course***

Credit/Term: 1.0/year
Grade Level: 11-12

Description: Students in this course should attain a depth of understanding of the fundamentals of substances and their properties and how they undergo change and develop a reasonable competence in dealing with chemical problems. The course should contribute to the students' ability to think clearly and to express their ideas orally and in writing, with clarity and logic. The AP Chemistry course is designed to be the equivalent of the general chemistry sequence usually taken during the first college year. This course is highly recommended for those students who are planning to pursue any university science major such as biology, chemistry, physics, engineering, aerospace technology, medicine, nursing, or pharmacy. Please visit the AP College Board website to learn more about the course requirements, the AP Chemistry exam, required AP Chemistry laboratories, and level of difficulty.

HONORS ORGANIC CHEMISTRY
Course Number: 416
Prerequisite: Chemistry or Honors Chemistry;
Recommended: Physics
****NCAA Approved Course***

Credit/Term: 1.0/year
Grade Level: 11-12

Description: Organic chemistry is a discipline within chemistry that involves the scientific study of the structure, properties, composition, reactions, and preparation of chemical compounds consisting of carbon. Students who are considering a career in medicine, engineering, science, genetics, and many other science-based disciplines may be required to study organic chemistry at the university level. Plastics, cosmetics, food preservation, fossil fuels, genetic engineering, and thousands of other benefits today are a result of our understanding of carbon-based substances.

AP PHYSICS 2 (L)
Course Number: 423
Prerequisite: AP Physics 1 or AP Physics C;
Summer work is required
AP Exam: Optional exam at the end of the course
****NCAA Approved Course***

Credit/Term: 1.0/year
Grade Level: 12

Description: This course is offered for college-bound seniors who have completed an in-depth study of mechanics, by taking AP Physics 1 or AP Physics C in their junior year, and would now like to further their understanding of the world around them by studying the topics of electricity & magnetism; light waves, including geometric optics; thermodynamics; and atomic & nuclear physics. It requires a deep conceptual understanding of these topics, as well as challenging mathematical problem solving using algebra, geometry, and trigonometry.

EARTH AND SPACE SCIENCE**Course Number: 433****Corequisite: None******NCAA Approved Course*****Credit/Term: 1.0/year****Grade Level: 11-12**

Description: Earth and Space science is the study of the application of the physical laws that control the earth and the universe. This is an elective course for students who would like to further their understanding of the universe and broaden their science background. This course provides students with an interactive, hands-on, visual tour of the earth and universe. While studying the astronomy unit of the course, students will view distant objects deep within our galaxy with a telescope. Students will study geology through a hands-on approach, ending with a field study of Pennsylvania rocks. Students will also collect and classify fossils. As part of the unit concerning the earth's atmosphere, students will utilize Real-time weather data to develop a three-day forecast.

HONORS EXERCISE/SPORTS PHYSIOLOGY**Course Number: 405****Prerequisite: Honors Anatomy & Physiology;****Recommended: Physics******NCAA Approved Course*****Credit/Term: 1.0/year****Grade Level: 12**

Description: The exercise science class prepares students through the study of human movement to pursue careers in health and fitness, corporate wellness, research, clinical and strength and conditioning industries. While interest in fitness and health has continued to grow, professionals in exercise science serve to optimize exercise, physical activity, and lifestyle management for all people. Exercise Science also prepares students for studies in exercise physiology, physical therapy and occupational therapy as well as for medical school, pharmacy school, chiropractic school, a career as a physician's assistant, and many other opportunities. Topics covered in Honors Anatomy and Physiology will be utilized in this course. Students will also learn new topics/concepts of anatomy and physiology.

WORLD LANGUAGES

| | | | | |
|---|------------------|------------------------------|--------------|---------------------------|
| Spanish I | French I | German I | Latin I | American Sign Language I |
| Spanish II | French II | German II | Latin II | American Sign Language II |
| Spanish III or Honors Spanish III | French III | German III | Latin III | |
| Spanish IV or Honors Spanish IV | Honors French IV | Honors German IV | CHS Latin IV | |
| AP Spanish Language & Culture | CHS French V | AP German Language & Culture | | |

SPANISH I
Course Number: 500
Prerequisite: 70% or better in English/Language Arts
***NCAA Approved Course**

Credit/Term: 1.0/year
Grade Level: 9-12

Description: Spanish I is designed for students to begin a formal study of the Spanish language and culture. Developing world language skills and establishing a solid base for further language study are additional goals of this course. The interactive approach in this course encourages oral proficiency, attentive listening, accurate writing, and reading for comprehension through diverse, proficiency-based classroom activities. Basic conversational vocabulary and grammar are stressed. Authentic materials, digital resources and culture are integral parts of the course as well.

SPANISH II
Course Number: 501
Prerequisite: Teacher Recommendation
***NCAA Approved Course**

Credit/Term: 1.0/year
Grade Level: 9-12

Description: The basic objectives of this course are to help students continue developing their reading, listening, writing, and speaking skills in the language and to prepare for Spanish 3. The course aims to help students develop a functional use of the language so that they may have the communicative skills necessary for surviving in a Spanish speaking country. The course emphasizes vocabulary and grammar taught in real-life contexts. Students can work towards accomplishing the goals of the course by engaging in a variety of interpretive, interpersonal, and presentational classroom activities. Authentic materials, digital resources and culture are integral parts of the course.

SPANISH III
Course Number: 502
Prerequisite: Teacher Recommendation
***NCAA Approved Course**

Credit/Term: 1.0/year
Grade Level: 10-12

Description: The basic objective of this course is to increase oral proficiency, listening skills, and writing accuracy as well as to read for comprehension at a more advanced level. Diverse, proficiency-based classroom activities enhance student performance. Practical and situational vocabulary and the development of functional use of the language in more complex scenarios provide the focus of this course. Advanced grammar, reading for comprehension, and writing are stressed. Authentic materials, digital resources and culture are integral to this course.

HONORS SPANISH III
Course Number: 531
Prerequisite: Teacher Recommendation
***NCAA Approved Course**

Credit/Term: 1.0/year
Grade Level: 10-12

Description: Students who have achieved high success in the Spanish II course should advance to this weighted course. Students will sharpen their existing abilities of utilizing a variety of grammatical structures and vocabulary in both their oral and written work, while simultaneously furthering their studies as they move on to more advanced grammar concepts. Students will learn and grow their language skills through a combination of authentic texts, listening activities/authentic audio, and extemporaneous speaking. The development of functional use of the language in complex scenarios will be one of the main focuses of this course. This class is intended for highly motivated students who want to partake in a more rigorous course, with the intention of eventually pursuing Honors Spanish IV and/or AP Spanish V.

SPANISH IV
Course Number: 532
Prerequisite: Teacher Recommendation
***NCAA Approved Course**

Credit/Term: 1.0/year
Grade Level: 11-12

Description: Spanish IV is a non-weighted course designed for students who wish to advance to a fourth level of a language at a pace appropriate to their readiness level. Spanish IV will assist students in the development of their four language skills--reading, listening, writing, and speaking. This course will cover vocabulary, grammar, and cultural topics. Students will experience authentic materials and take part in a variety of proficiency-based classroom activities. Students will move through the curriculum focusing on new grammar topics. In this course, students will have the opportunity to further their language skills and grow their cultural competence. Authentic materials, digital resources, and culture are integral to this course.

HONORS SPANISH IV
Course Number: 503
Prerequisite: Teacher Recommendation;
Summer work is required
***NCAA Approved Course**

Credit/Term: 1.0/year
Grade Level: 11-12

Description: Spanish IV is a weighted course and includes progressively higher standards in the integral language skills of listening, speaking, reading, and writing. Formal consideration of advanced grammar is presented and vocabulary is expanded. At this level, students are expected to spontaneously and creatively integrate previously learned material into conversation and class activities. More advanced reading selections are incorporated along with an emphasis on higher-level writing skills. Students take part in diverse, proficiency-based classroom activities and projects. Authentic materials, history, and culture are incorporated into the course.

AP SPANISH LANGUAGE AND CULTURE
Course Number: 504
Prerequisite: Teacher Recommendation;
Summer work is required
AP Exam: Optional exam at the end of the course
***NCAA Approved Course**

Credit/Term: 1.0/year
Grade Level: 12

Description: This course will follow a comprehensive curriculum that meets the needs of students who have successfully completed the fourth level honors course. Students will acquire listening proficiency by listening to passages by native speakers from different parts of the Spanish-speaking world. They will continue to increase their vocabulary and enhance their grammar skills through the reading of literature, history, and current events. Students will also be given the opportunity to refine and increase their oral and written proficiency through the interpersonal, interpretive, and presentational modes of communication. *This course requires 100% use of the target language from all students.*

FRENCH I
Course Number: 505
Prerequisite: 70% or better in English/Language Arts
****NCAA Approved Course***

Credit/Term: 1.0/year
Grade Level: 9-12

Description: French I is designed for students to begin a formal study of the French language and culture. Developing world language skills and establishing a solid base for further language study are additional goals of this course. The interactive approach in this course encourages oral proficiency, attentive listening, accurate writing, and reading for comprehension through diverse, proficiency-based activities. Basic conversational vocabulary and grammar are stressed. Authentic materials and culture are integral parts of this course as well.

FRENCH II
Course Number: 506
Prerequisite: Teacher Recommendation
****NCAA Approved Course***

Credit/Term: 1.0/year
Grade Level: 9-12

Description: The basic objective of this course is to increase oral proficiency, develop listening skills, improve writing accuracy and continue to read for comprehension. These goals are accomplished by diverse, proficiency-based activities. Although there is a considerable emphasis on vocabulary at this level, a focus of this course is practical and situational grammar. Development of functional use is stressed to provide students with the communicative skills needed to survive in French-speaking countries. French materials and films provide additional enrichment and variety to this course.

FRENCH III
Course Number: 507
Prerequisite: Teacher Recommendation
****NCAA Approved Course***

Credit/Term: 1.0/year
Grade Level: 10-12

Description: The basic objective of this course is to increase oral proficiency, listening skills, and writing accuracy as well as to read for comprehension at a more advanced level. Diverse, proficiency-based classroom activities enhance student performance. Practical and situational vocabulary and the development of functional use of the language in more complex scenarios provide the focus of this course. Advanced grammar, reading for comprehension, and writing are stressed. Authentic materials and culture are integral to this course. Cultural activities and projects, French films, and field trip opportunities provide additional enrichment and variety to this course.

HONORS FRENCH IV
Course Number: 508
Prerequisite: Teacher Recommendation;
Summer work is required
****NCAA Approved Course***

Credit/Term: 1.0/yr.
Grade Level: 11-12

Description: French IV is a weighted course and includes progressively higher standards in the integral language skills of listening, speaking, reading, and writing. A study of advanced grammar is coupled with the reading of literary selections. At this level, students are expected to spontaneously and creatively integrate previously learned material into conversation and class activities. Students take part in diverse, proficiency-based classroom and computer lab activities, and projects. Authentic materials, history, and culture are integral parts of this course as well. Cultural activities, projects, and field trip opportunities provide additional enrichment and variety to this course.

CHS FRENCH V
Course Number: 509
Prerequisite: Teacher Recommendation;
Summer work is required
****Pending Board approval***

Credit/Term: 1.0/year
Grade Level: 12

Pending Board Approval

Description: CHS French V, offered through the University of Pittsburgh, is a weighted course designed for students who wish to advance to a fifth level of a language (4th year of High School language). CHS French V will assist students in the development and application of the four language skills--reading, listening, writing, and speaking. This course will be centered on cultural customs and norms prevalent throughout the French speaking world, and will incorporate previously learned grammatical structures and vocabulary into daily class lessons. Students will experience authentic materials and take part in a variety of proficiency-based classroom activities. Students will move through the curriculum and make comparisons between cultures and customs in the US and in Francophone countries. They will use high level grammar structures to express opinions and ideas, engage in relevant conversations, and write essays relevant to the course content. This course is taught completely in French, and students will have the opportunity to further their language skills and grow their cultural competencies by conversing daily in the target language. Authentic materials, digital resources, and a willingness to learn are integral to this course.

*Pending NCAA Approval

GERMAN I
Course Number: 510
Prerequisite: 70% or better in English/Language Arts
****NCAA Approved Course***

Credit/Term: 1.0/year
Grade Level: 9-12

Description: German I is designed for students to begin a formal study of the German language and culture. Developing world language skills and establishing a solid base for further language study are the main goals of this course. The interactive approach in this course reaches all four modes of communication in a way that would best establish survival skills in the language. Basic and necessary conversational vocabulary and grammar are stressed, as directed by ACTFL's Novice Low-Mid proficiency guidelines. Talking about oneself, describing daily life, and learning about the (German-speaking) world are the overarching themes of this course.

GERMAN II
Course Number: 511
Prerequisite: Teacher Recommendation
****NCAA Approved Course***

Credit/Term: 1.0/year
Grade Level: 9-12

Description: The basic objectives of this course are to increase oral proficiency, develop listening skills, improve writing accuracy, and begin to read for comprehension. These goals are accomplished by diverse, proficiency-based activities. Although there is a considerable emphasis on grammar at this level, the focus of this course is practical and situational vocabulary including topics such as expressing time, explaining features of homes and cities in German-speaking countries, expressing wants and needs, making future plans, among other topics. The proficiency level aims for Novice Mid-High, with characteristics including discussing familiar topics and beginning to create unique utterances in the language, which is an advancement from repeating memorized phrases. Authentic materials and culture are integral parts of the course.

GERMAN III
Course Number: 512
Prerequisite: Teacher Recommendation

Credit/Term: 1.0/year
Grade Level: 10-12

****NCAA Approved Course***

Description: The objectives of this course continue to be increasing the proficiencies in all four modes of communication, with particular emphasis on conversational, writing, and reading skills. With the addition of daily reading and writing practice, students will begin to build stamina in the language and have more opportunities to create unique utterances, thoughts, and opinions in the language. Diverse, proficiency-based classroom activities incorporated with practical and situational vocabulary lend themselves to complex scenarios in the past, present, and future. Authentic materials and culture are integral parts to this course.

HONORS GERMAN IV

Course Number: 513

Prerequisite: Teacher Recommendation

Summer work is required

****NCAA Approved Course***

Credit/Term: 1.0/year

Grade Level: 11-12

Description: German IV is a weighted course and includes progressively higher standards in the fundamental language skills of listening, speaking, reading, and writing. Formal consideration of grammar is included within larger themed topics. German history (with the scope of European history) is incorporated into many themes throughout this course. History intermixed with current events are incorporated throughout this course. At this level, students are expected to spontaneously and creatively integrate previously learned material into daily or weekly conversations and hold regular presentations. Students take part in diverse, proficiency-based classroom activities and projects. Authentic materials, history, and culture are integral parts to this course.

AP GERMAN LANGUAGE AND CULTURE

Course Number: 514

Prerequisite: Teacher Recommendation

Summer work is required

AP Exam: Optional exam at the end of the course

****NCAA Approved Course***

Credit/Term: 1.0/year

Grade Level: 12

Description: The German V class is an immersion class designed to develop students' strengths in the German language without the need of translation. The culture aspect of the class will afford students the opportunity to study and appreciate German art, music, literature, and theater. The class also examines German history from 1871 to the present day and the German position in world government and finance. Emphasis is also placed on the former GDR, which is a key issue in the emerging new Germany.

LATIN I

Course Number: 515

Prerequisite: No Prerequisite Required

****NCAA Approved Course***

Credit/Term: 1.0/year

Grade Level: 9-12

Description: This course will provide students with a basic understanding of the language, history, and culture of ancient Rome and Pompeii. While emphasizing a literary understanding of the Latin language, this course will enable students to read edited Latin texts, which not only focus upon grammar and syntax but also upon ancient history and culture. Careful vocabulary study within each stage (unit) will facilitate a deeper understanding of both Latin texts and English word origins and derivatives, another focus of this course. Due to the nature of the Latin language, which includes various noun and verb endings, strong emphasis is placed on both English and Latin grammar. Memorization is also a key component of this course.

LATIN II

Course Number: 516

Prerequisite: Teacher Recommendation

****NCAA Approved Course***

Credit/Term: 1.0/year

Grade Level: 10-12

Description: This course builds upon the foundation established in Latin I and provides a deeper understanding of the way words work together in sentences. Students will begin to better understand how the Latin and English languages are connected through syntax and grammar. In addition, Latin II students will continue to focus on vocabulary, derivatives, culture, and history, paying close attention to the Roman influence in both Britain and Egypt. Students taking this course will be expected to use their knowledge of Latin grammar to produce and compose sentences in Latin. This course is faster paced than Latin I, and students will be fully responsible for all concepts covered in the previous course.

LATIN III

Course Number: 517

Prerequisite: Teacher Recommendation

****NCAA Approved Course***

Credit/Term: 1.0/year

Grade Level: 11-12

Description: In addition to building on grammar concepts learned in Latin I and II, Latin III provides students with an understanding of grammar ideas that are abstract in the English language. This course will move at a much faster pace than Latin II and students will be expected to work at an independent level more often. Culture and history will continue to influence our studies, as this level of Latin takes us into the development of Roman colonies, the construction of Hadrian's Wall in England, and the importance of various Roman monuments all over the Roman World.

CHS LATIN IV

Course Number: 518

Prerequisite: Teacher Recommendation

Summer work is required

College Credit: Fee for credits

****NCAA Approved Course***

Credit/Term: 1.0/year

Grade Level: 12

Description: This course is a culmination of knowledge obtained in Latin I, II, and III and serves as an introduction to Latin poetry. In conjunction with the University of Pittsburgh, students will read selections from Books I, II, and IV of Vergil's *Aeneid*, an epic poem written in the 1st century AD. In addition to reading specified selections in Latin, students will study the meter of the poem and read the whole poem in English for in-class discussion. Each student's grade will be based upon his or her performance on three one-hour exams, a final exam, quizzes and in-class readings and discussion. This course is equivalent to Latin 0220 Intermediate Latin Verse at the University of Pittsburgh. At the completion of the course, students may earn college credits by registering and paying the requisite tuition and enrollment fees as required by the university.

AMERICAN SIGN LANGUAGE I

Course Number: 520

Prerequisite: None

****NCAA Approved Course***

Credit/Term: 1.0/year

Grade Level: 9-11

Description: American Sign Language (ASL) 1 is a course that teaches the basic vocabulary, grammar rules, and cultural aspects of the Deaf community. Students will be taught how to communicate in ASL by using both expressive and receptive methods through interactive lessons. This course will lay a strong foundation for those who wish to further explore the language.

AMERICAN SIGN LANGUAGE II**Course Number: 521****Prerequisite: Teacher Recommendation******NCAA Approved Course*****Credit/Term: 1.0/year****Grade Level: 10-12**

Description: This course builds upon the foundation established in ASL I and provides a deeper understanding of grammar structure and vocabulary. Students will begin to develop both their receptive and expressive skills, focusing on conversation and dialogue. Deaf culture will continue to be highlighted throughout the year, learning about the history of the Deaf community. Students will focus on their GLOSSING skills through songs and storytelling.

BUSINESS, COMPUTER SCIENCE, INFORMATION TECHNOLOGY

INTRODUCTION TO COMPUTER SCIENCE

Course Number: 603

Prerequisite: None; This is a required course for all 9th grade students.

Credit/Term: .50/sem.

Grade Level: 9

Description: This course is designed to offer an introduction to computer science. Students will learn the basics of computer programming along with the basics of computer science. The material emphasizes computational thinking and helps develop the ability to solve complex problems.

This course covers the basic building blocks of programming along with other central elements of computer science. It gives a foundation in the tools used in computer science and prepares students for further study in computer science. The technology, software, and digital application skills learned in this course are applicable throughout high school and beyond graduation.

WEB DEVELOPMENT

Course Number: 604

Prerequisite: None

Credit/Term: .50/sem.

Grade Level: 9-12

Description: This course provides students with an overview of HTML coding (the language of the internet) and Web Page imaging. Students will learn the tools necessary to create, design, manage and control a professional quality website. Creativity is strongly encouraged (and welcomed) from students when they are designing and editing websites for target audiences. The assignments and projects in this course step students through the stages of developing websites used in business and industry today. Additionally, the software program enhances the student mock sites so they may gain a more enriched experience of web design without going “live” on the Internet.

SPORTS, ARTS, & ENTERTAINMENT MARKETING

Course Number: 607

Prerequisite: None

Credit/Term: .50/sem.

Grade Level: 9-12

Description: This course is for students who are interested in the dynamic field of sports, entertainment and marketing. More than one-third of the jobs in the country are associated with some form of marketing. In this interdisciplinary course, students apply their knowledge of athletes, venues, sports, musicians, and entertainment to the necessary and profitable field of marketing. Through the completion of hands-on projects and assignments students develop critical thinking, decision-making, and communication skills through authentic marketing applications. Successful sports marketing strategies are researched then applied to mock sports programs. Commercials are analyzed to identify profitable sales techniques, and students work independently and in teams to simulate the desirable soft skills of the industry. This course is for all students considering a career in business, marketing, public relations, or sports and entertainment management.

INTRODUCTION TO BUSINESS**Course Number: 608****Prerequisite: None****Credit/Term: .50/sem.****Grade Level: 9-12**

Description: Today's business environment is more competitive than ever. This course is designed to expose the student to the multitude of career fields in the areas of business. Students will explore the foundation of business operations and learn to be a knowledgeable consumer through this course. Topics covered will include business technology, social responsibility, economic decisions, marketing, advertising, career planning/development, small business management and credit. Integrated academic activities and hands-on research will supplement the course material, build comprehension and reinforce key academic concepts. *(If the class is on student's schedule 2nd or 3rd period period, students will have the opportunity to work in conjunction with the Baldwin Bean)*

PRINCIPLES OF ACCOUNTING I**Course Number: 610****Prerequisite: None****Credit/Term: .50/sem.****Grade Level: 9-12**

Description: Accounting is the Language of Business! The Principles of Accounting I course provides an excellent background in the field of accounting and is highly recommended to anyone interested in a business career or for students who want to learn how to manage their personal finances. This course is an introduction to the basic concepts and standards underlying financial accounting systems. Furthermore, this course emphasizes the construction of the basic financial accounting statements - the income statement, balance sheet, and cash flow statement - as well as their interpretation. Students will have the opportunity to work with Online QuickBooks Accounting Software and complete a simulation where they will learn how to properly record, summarize, and analyze real-world business transactions.

PRINCIPLES OF ACCOUNTING II**Course Number: 611****Prerequisite: Principles of Accounting I****Credit/Term: .50/sem.****Grade Level: 9-12**

Description: This course provides an extensive background in advanced fields of accounting for students seeking a career in business administration, finance, banking, and other areas of business/finance. The topics of specialized accounting, corporate accounting, and departmentalized accounting are covered in detail using computer-generated spreadsheets, QuickBooks Accounting Software, and financial analysis. Principles of Accounting II is for students who want to further their understanding of accounting at a higher level. Furthermore students will learn how to invest in the stock market and to calculate the Time Value of Money (TMV). Assignments include solving accounting cycle problems using real-life simulations and an integrated accounting software to help prepare individuals for both the business and financial world. It is strongly recommended that students electing this course have achieved a final grade of 75% or higher in Principles of Accounting I.

SOCIAL MEDIA MARKETING**Course Number: 612****Prerequisite: None****Credit/Term: .50/sem.****Grade Level: 9-12**

Description: Social media is changing how business is done around the world in almost every industry. As a result, the conventional approaches to marketing communications have become more and more challenging. The marketing and business worlds are changing how consumers interact with brands and each other. This course will be aimed to provide a clear perspective on what's really going on in digital/social/mobile marketing so that students can begin to appreciate its true value as consumers and potentially business owners.

ENTREPRENEURSHIP**Course Number: 619****Prerequisite: Introduction to Business****Credit/Term: .50/sem.****Grade Level: 9-12**

Description: Entrepreneurship is a business/marketing course where students learn what it is to be a successful entrepreneur and to start a business from the ground up. Students will learn how to create, promote, and operate a company. They will also practice effective leadership skills, develop problem solving and decision-making skills and practice public speaking skills. The importance of social media's role in the business world today is an integral component in almost all successful marketing strategies. Topics on the subject will include choosing appropriate platforms, creating effective and engaging social media content, content management, social listening and creating their own social media policy. *(If the class is on student's schedule 2nd or 3rd period, students will have the opportunity to work in conjunction with the Baldwin Bean)*

CONSUMER LAW**Course Number: 620****Prerequisite: None****Credit/Term: .50/sem.****Grade Level: 9-12**

Description: Knowledge of business law is particularly useful because all students eventually assume the role of citizen, worker, and consumer in society. This course provides students with an overview of our legal system, including statutes and regulations that affect businesses, families, and individuals in a variety of ways. This course emphasizes legal concepts that are relevant to business and everyday life. A unit on Forensics will surely excite anyone interested in the law field. Students will learn the history behind the science, review evidence through mystery case studies, take and examine fingerprints and analyze forensic techniques. Guest speakers from various areas of business and law will visit our class to aid students in exploring career options.

AP CSA**Course Number: 625****Prerequisite: Algebra 1 and Intro to CS****Credit/Term: .50/sem.****Grade Level: 9-12**

Description: AP Computer Science A introduces students to computer science through programming. Fundamental topics in this course include the design of solutions to problems, the use of data structures to organize large sets of data, the development and implementation of algorithms to process data and discover new information, the analysis of potential solutions, and the ethical and social implications of computing systems. The course emphasizes object-oriented programming and design using the Java programming language.

INTRODUCTION TO GAME PROGRAMMING**Course Number: 626****Prerequisite: 70% or better in Algebra I****Credit/Term: .50/sem.****Grade Level: 9-12**

Description: Students will learn how to create dynamic, robust, and entertaining 2-D and 3-D games in this game-development course. Students begin with an overview and history of game development and learn different environments used to support the creation of 2-D and 3-D animations. In this programming environment students will make and create animations, build interactive narratives, or program simple games in 3D. This course provides tools and materials for learning computational thinking, problem solving, and computer programming. Students will be introduced to Pygame which will be used to design the games. Topics for this course include creating storyboards for a game, adding animation and visual effects, inserting movie clips and sound files, and applying math and science concepts to make game objects move.

AP COMPUTER SCIENCE PRINCIPLES**Course Number: 627****Prerequisite: 70% or better in Algebra I****AP Exam: Optional exam at the end of the course******NCAA Approved Course*****Credit/Term: 0.5/year****Grade Level: 9-12**

Description: This semester course introduces students to foundational principles of modern computing. The curriculum covers a broad range of computer science topics including fundamental concepts of programming, algorithms, the Internet, digital privacy and security, and the impact that computing has on society. A firm foundation in algebra is imperative for academic success in this course. Students who successfully complete the course will be eligible to take the Advanced Placement exam at the end of the year. Students who are interested in a career associated with computers and programming should take this course!

INTRODUCTION TO PYTHON PROGRAMMING**Course Number: 628****Prerequisite: 70% or better in Algebra I****Credit/Term: .50/sem.****Grade Level: 9-12**

Description: This course introduces students to computer programming using the Python programming language and emphasizes the principles of software development, style, and testing. Topics include procedures and functions, iteration, recursion, arrays and vectors, strings, an operational model of procedure and function calls, algorithms, exceptions, object-oriented programming, and GUIs (graphical user interfaces). Upon completion, students should be able to design, code, test, and debug Python language programs.

PYTHON PROGRAMMING II**Course Number: 629****Prerequisite: Introduction to Python Programming****Credit/Term: .50/sem.****Grade Level: 9-12**

Description: Students who have passed the basics of Python programming can start digging into more intermediate to advanced levels of Python concepts. Having mastered the core concepts of Python from Introduction to Python Programming course, students will perform more advanced Python programming with a focus on enterprise development. Students will use object oriented programming in Python to interact with databases and GUI's and perform Network Programming. This is a practical hands-on course, designed to teach students practical programming for the real business application. This course provides the equivalent of college-level work for computer science majors.

INTRO TO CYBER SECURITY**Course Number: 630****Prerequisite: None****Credit/Term: .50/sem.****Grade Level: 9-12**

Description: The goal of this semester-long course is to introduce students to basic cybersecurity concepts and inspire interest in cybersecurity careers. This course does not require any prerequisite knowledge in computing or cybersecurity. This course is designed for students who are interested in exploring careers in Cybersecurity. The focus of instruction will include the implementation and monitoring of security on network and computer systems. Students will investigate strategies to identify and protect against security threats such as hackers, eavesdropping and network attacks. The basics of cryptography and logic reasoning will be explored.

*Ethics agreement must be signed by all students and parents during the first 2 weeks of class.

ESPORTS FUNDAMENTALS: UNDERSTANDING AND ENGAGING IN COMPETITIVE GAMING (INTRODUCTION TO ESPORTS)**Course Number: 640****Prerequisite: None****Credit/Term: .50/sem.****Grade Level: 9-12****Pending Board Approval**

Description: This semester course offers an engaging and comprehensive introduction to the world of esports, tailored for high school students. This course delves into the various facets of competitive gaming. It aims to equip students with an understanding of the esports ecosystem, career opportunities in the field, and the skills required to participate safely and effectively.

ESPORTS DYNAMICS: STRATEGY, TECHNOLOGY, AND PROFESSIONAL DEVELOPMENT (ADVANCED ESPORTS DYNAMICS)**Course Number: 641****Prerequisite: Esports Fundamentals****Credit/Term: .50/sem.****Grade Level: 10-12****Pending Board Approval**

Description: Building on the foundations established in the introductory course, "Esports Dynamics: Strategy, Technology, and Professional Development" is an advanced course designed to delve deeper into the strategic, technological, and professional aspects of esports. This course aims to offer students a more profound understanding of the tactical intricacies of esports, the latest technological advancements in the field, and the skills necessary for professional growth in this dynamic industry.

DRONES AND AERIAL INNOVATION: TECHNOLOGY, REGULATIONS, AND FAA PART 107 CERTIFICATION**Course Number: 840****Prerequisite: None****Credit/Term: .50/sem.****Grade Level: 9-12****Pending Board Approval**

Description: This course is designed to introduce high school students to the exciting world of drones and aerial technology. In alignment with the Baldwin-Whitehall School District's mission of fostering a future-focused and innovative educational environment, this course provides foundational knowledge in drone technology, practical flying skills, and prepares students for the Federal Aviation Administration (FAA) Part 107 exam, a crucial step for those interested in commercial drone operations.

**DRONE MASTERY: ADVANCED OPERATIONS,
APPLICATIONS, AND ENTREPRENEURSHIP**

Course Number: 841

Prerequisite: Drones and Aerial Innovation

Credit/Term: .50/sem.

Grade Level: 10-12

Pending Board Approval

Description: "Drone Mastery: Advanced Operations, Applications, and Entrepreneurship" is a second-level course designed for students who have successfully completed the introductory drone course and hold the FAA Part 107 certification. This course delves deeper into advanced drone operations, specialized applications, and entrepreneurial opportunities in the drone industry.

FINE ARTS AND CRAFTS

STUDIO ART I
Course Number: 700
Prerequisite: None

Credit/Term: 1.0/year
Grade Level: 9-12

Description: Studio Art I is an introductory course wherein students improve drawing skills through observation and imagination. Students learn how to use a variety of materials to produce original works of art. Students also learn painting, printmaking, and sculptural skills.

STUDIO ART II
Course Number: 701
Prerequisite: Studio Art I

Credit/Term: 1.0/year
Grade Level: 10-12

Description: Students in Studio Art II develop a mastery of skills in the areas of drawing, painting, printmaking, and two-and three-dimensional design. Using their knowledge of the elements and principles of design, students continue their growth as artists as they work on interpretation of original ideas through various media and techniques. Students will work to expand their artistic concepts, as well as progress toward an individual style.

STUDIO ART III
Course Number: 702
Prerequisite: Studio Art II

Credit/Term: 1.0/year
Grade Level: 11-12

Description: Studio Art III focuses on the continual development of the student artist while addressing concerns related to the quality of work through more in-depth experiences in areas such as drawing, painting, printmaking, sculpture, and two-and three-dimensional design. The students incorporate the study of art history as a resource and continue to use critical, analytical, and evaluative thinking skills.

STUDIO ART IV
Course Number: 703
Prerequisite: Studio Art III

Credit/Term: 1.0/year
Grade Level: 12

Description: Studio Art IV is an advanced course intended for those students who plan to specialize in some aspect of the visual arts upon graduation from high school, as well as those who wish to pursue their continued development as artists. Emphasis is placed on the expansion of the student's portfolio for the purpose of gaining acceptance to a college, university, or professional art school. Individual units are planned and developed in cooperation with the instructor based upon specific concepts, media and techniques, and exploration of personal expression. Students are expected to work beyond the scheduled class periods in order to complete their assignments.

CRAFTS I
Course Number: 706
Prerequisite: None

Credit/Term: .50/sem.
Grade Level: 9-12

Description: Crafts I, an introductory course, offers an exploration into various aspects of crafting. Students are instructed in the use of various materials, which may include glass, metal, wood, clay, fibers, paper, and mixed media. Students learn how to adapt designs from a variety of resources as well as create their own designs. Students must demonstrate and/or pass a safety procedures test prior to using hand tools and machines.

CRAFTS II
Course Number: 707
Prerequisite: Crafts I

Credit/Term: .50/sem.
Grade Level: 9-12

Description: This is an intermediate course designed to expand upon techniques, media, and project design learned in Crafts I. Students continue developing proficiencies in glass, metal, wood, clay, fibers, paper, and mixed media. Students must demonstrate and/or pass a safety procedures test prior to using hand tools and machines.

CERAMICS I
Course Number: 709
Prerequisite: None

Credit/Term: .50/sem.
Grade Level: 9-12

Description: This is an introductory course in ceramic processes. Ceramics I provides an opportunity for students to experience methods of working with clay. Areas explored include various hand-building techniques, wheel thrown pieces, ceramic sculpture, and various decoration techniques.

CERAMICS II
Course Number: 710
Prerequisite: Ceramics I

Credit/Term: .50/sem.
Grade Level: 9-12

Description: This is an intermediate course in the ceramics processes built on knowledge gained in Ceramics I. Emphasis is placed on perfecting hand-building methods, craftsmanship, wheel throwing, and producing matched forms in sets. Processes are expanded by size, surface treatments, trimming, and decoration. Students will incorporate investigation of cultural designs and artists as a resource.

ADVANCED CERAMIC TECHNIQUES
Course Number: 712
Prerequisite: Ceramics II

Credit/Term: .50/sem.
Grade Level: 10-12

Description: Advanced Ceramics Techniques is an advanced-level course in the ceramics processes. This course is an independent study, designed to allow the ceramic student to expand and build upon the skills and knowledge acquired in Ceramics I and II. Students are expected to produce ceramic pieces of superior levels of quality and competency. This course may be elected for one or more semesters; therefore, it is advised that the student meet with the instructor prior to scheduling. In order to repeat the course for additional credit, the student must maintain an 80 percent average or higher.

CHS DIGITAL ILLUSTRATION
Course Number: 714
Prerequisite: None

Credit/Term: .50/sem.
Grade Level: 9-12

Description: This course is intended to provide an opportunity to explore digital illustration and computer art. The students will experience the computer studio process of creating art using current software. The effect of styles, techniques, and art movements on computer images will be explored. Attention will be given to vector illustration and the relevance of digital art in today's job market. Three college credits can be obtained with a B average or better. This course is the equivalent of GCDN2005 Digital Fine Arts at La Roche University. At the completion of the course, students in grades 10-12 may earn college credits by registering and paying the requisite tuition and enrollment fees as required by the university.

CHS DIGITAL PHOTOGRAPHY
Course Number: 715
Prerequisite: None
College Credits: Fee for credits

Credit/Term: .50/sem.
Grade Level: 9-12

Description: An introduction to basic concepts, processes, and techniques of photography, including camera usage, digital editing, composition, lighting, and the application of these techniques. Three college credits can be obtained with a B average or better. This course is the equivalent of GCDN2016 Digital Photography at La Roche University. At the completion of the course, students in grades 10-12 may earn college credits by registering and paying the requisite tuition and enrollment fees as required by the university.

DIGITAL PHOTOGRAPHY II
Course Number: 724
Prerequisite: CHS Digital Photography

Credit/Term: .50/sem.
Grade Level: 9-12

Description: An expansion of the processes and techniques of photography, including camera usage, digital editing, composition, lighting, and the application of these techniques. Students will produce photography work for the District and School when photography is needed for school publications, web design, and more.

METALSMITHING I
Course Number: 716
Prerequisite: None

Credit/Term: .50/sem.
Grade Level: 9-12

Description: Metalsmithing I is an introductory course. Students will demonstrate the basic skills and techniques used in production, along with safe and proper use of hand tools, machinery, and equipment. Metalsmithing skills/processes may include etching, piercing, casting, sawing metal, soldering, finishing techniques and decorative surface treatments.

METALSMITHING II
Course: 717
Prerequisite: Metalsmithing I

Credit/Term: .50/sem.
Grade Level: 9-12

Description: Metalsmithing II is an intermediate course exploring advanced metalsmithing techniques using materials and tools introduced in Metalsmithing I. Students will study cultural developments in metal as a functional art form. Materials explored may include sterling silver, copper, brass, nickel silver, glass cast pewter, enameling, and soldered metal. Emphasis in the Metalsmithing II course is to create metal based and mixed media projects with an emphasis on functionality (versus decoration).

WOOD CRAFTS I
Course Number: 719
Prerequisite: None

Credit/Term: .50/sem.
Grade Level: 9-12

Description: Wood Crafts I is an introductory course designed to teach the fundamentals of wood crafting. Students explore the functional and ornamental use of wood. Basic woodworking skills and techniques used in production are emphasized, along with safe and proper use of hand tools, power tools, and equipment. Projects developed for the course concentrate on basic cutting, carving, sculpture, and finishing processes. Students must demonstrate and/or pass a safety procedures test prior to using hand tools and machines.

WOOD CRAFTS II
Course Number: 721
Prerequisite: Wood Crafts I

Credit/Term: .50/sem.
Grade Level: 9-12

Description: Wood Crafts II is an intermediate course designed to expand the student's skill and knowledge of wood crafting. Additional processes may include laminating, fabrication, carving, and expanded decorations. Basic skills and techniques acquired in Wood Crafts I are used as a foundation for the students to create their own design. Students must demonstrate and/or pass a safety procedures test prior to using hand tools and machines.

CHS GRAPHIC DESIGN I
Course Number: 722
Prerequisite: None
College Credit: Fee for credit

Credit/Term: .50/sem.
Grade Level: 9-12

Description: This is an introductory course in graphic design. Students create advertisements, posters, billboard designs, and a variety of other practical applications. Students create digital projects using current graphic design software while developing skills needed to pass the Adobe Certified Professional certification exam. Three college credits can be obtained with a B average or better. This course is the equivalent of GCDN1025 Fundamentals of Electronic Publishing at La Roche University. At the completion of the course, students in grades 10-12 may earn college credits by registering and paying the requisite tuition and enrollment fees as required by the university.

CHS GRAPHIC DESIGN II
Course Number: 723
Prerequisite: CHS Graphic Design I
College Credit: Fee for credit

Credit/Term: .50/sem.
Grade Level: 9-12

Description: Graphic Design II is an intermediate course designed to expand the knowledge and skills acquired in Graphic Design I. Students gain valuable and practical experience by completing projects such as logo design, brochures, and package design, while expanding on techniques and skills needed to pass the Adobe Certified Professional certification exam. Three college credits may be obtained with a B average or better. This course is the equivalent of GCDN2008 Digital Publishing at La Roche University. At the completion of the course, students in grades 10-12 may earn college credits by registering and paying the requisite tuition and enrollment fees as required by the university.

PARTNERS STUDIO ART
Course Number: 725
Prerequisite: Application to the course

Credit/Term: .50/sem.
Grade Level: 9-12

Description : This course is designed for students to work together to fulfill the needs of all individuals with various ability levels within Studio Arts activities. Students in this class who may have any physical or cognitive difficulties can also benefit from the added art production taking place. Every attempt is made to design activities so that every student with varying ability levels has a partner working alongside him/her to complete a common goal or project. Students enrolling in Partners Studio Art should develop partnerships that transcend this class. This course may be repeated for credit.

MUSIC

SYMPHONIC BAND
Course Number: 726
Prerequisite: None

Credit/Term: 1.0/year
Grade Level: 9-12

Description: This performing ensemble is open to all instrumental students in 9th - 12th grade. In this class, students will work on improving the foundational skills of music while preparing for multiple formal performances. Students will perform a wide variety of instrumental music.

HONORS WIND ENSEMBLE
Course Number: 727
Prerequisite: Audition Required

Credit/Term: 1.0/year
Grade Level: 9-12

Description: Wind Ensemble is the competitive, audition-based performing group. Members of this group have advanced playing abilities, and will work on refining their musicianship skills. Students will perform a more advanced repertoire of music.

HONORS STAGE BAND
Course Number: 728
Prerequisite: Audition Required

Credit/Term: 1.0/year
Grade Level: 9-12

Description: This auditioned performing ensemble is open to students in 9th - 12th grade. In this class, students will work on improving the foundational skills of music while preparing for multiple formal performances. Students will perform a wide variety of jazz music.

ORCHESTRA
Course Number: 730
Prerequisite: None

Credit/Term: 1.0/year
Grade Level: 9-12

Description: All students who play the accepted string instruments of the symphony orchestra may schedule this class as an elective. This daily string class provides an opportunity for students to increase their knowledge of fundamentals of music, to further develop their instrumental techniques, and to become acquainted with and perform the highest level of music within their capabilities.

BALDWIN CHORUS
Course Number: 736
Prerequisite: None

Credit/Term: 1.0/year
Grade Level: 9-12

Description: This course is designed for beginner, intermediate, or advanced students who would like to develop singing and musicianship skills. There is no homework for this class. This course may be retaken. Participants may opt to perform at the biennial Disney World Performance Tour. For more details, please visit <http://bhsmusicislife.weebly.com/>.

HONORS HIGHLANDER CHOIR
Course Number: 738
Prerequisite: Audition & Application

Credit/Term: 1.0/year
Grade Level: 10-12

Description: This course is designed for advanced singers who would like to pursue a deeper exploration of musicianship and vocal skills and singers who may be interested in pursuing a minor, major, or career in music. Students will receive honors credit for this course, therefore an audition is required. This course may be retaken. Participants may opt to perform at the biennial Disney World Performance Tour. Students will engage in a choral emphasis in music theory, vocal repertoire, and conducting. For more details, please visit <http://bhsmusicislife.weebly.com/>.

CHS ELECTRONIC BEAT MAKING
Course Number: 739
Prerequisite: None

Credit/Term: 0.5/year
Grade Level: 9-12

Description: Music skills are not needed for this half-year course. Students will use music software to create their own music in styles like Hip-Hop, House, Techno, Dub, Reggae, Heavy Metal, Dubstep, and more. This course will be offered as a CHS course through The University of Pittsburgh. To learn more, please visit <http://bhsmusicislife.weebly.com/>.

GUITAR
Course Number: 740
Prerequisite: None

Credit/Term: 0.5/year
Grade Level: 9-12

Description: This course is designed for beginning guitar students; no prior musical knowledge is necessary. Students need not own their own guitar. Popular music is used as a vehicle to teach guitar techniques. Lead/Chord Sheets and Guitar Tab are both used extensively. The history of Rock 'n Roll is also interwoven into the course.

MUSIC for FILM: An Exploration of Film Scoring
Course Number: 744
Prerequisite: None

Credit/Term: 0.5/year
Grade Level: 9-12

Description: This half-year course introduces all students to the art and craft of composing music for epic movies such as Star Wars, Indiana Jones, Back to the Future, and more. No musical experience is required. Explore the wonders of film scoring, including the role of music in storytelling, collaboration with filmmakers, and the technical aspects of creating and synchronizing music to visual media. Using hands-on projects and music composition software, students will gain a deep insight into the relationship between music and film. To learn more, please visit <http://bhsmusicislife.weebly.com/>.

PIANO CLASS I
Course Number: 750
Prerequisite: None

Credit/Term: 0.5/sem
Grade Level: 9-12

Description: This course is perfect for any beginner who would like to learn to play the piano as well as create and produce their own music using beat maker, auto editing, loops, and more. No prior music experience is required. There is no homework for this class, and there is no need to have a piano at home. Participants learn popular songs such as Billy Joel's "Piano Man" and John Lennon's "Imagine" ultimately working to create their own composition. For more details, please visit <http://bhsmusicislife.weebly.com/>.

PIANO CLASS II
Course Number: 751
Prerequisite: Piano Class I

Credit/Term: 0.5/sem
Grade Level: 10-12

Description: This course transforms the beginner piano player into a more independent Level II player. There is no homework for this class and there is no need to have a piano at home. Each student has their own workstation that includes a piano keyboard, headphones, and a computer. Participants learn popular songs such as Journey's "Don't Stop Believing", Train's "Drops of Jupiter," and songs by Kelly Clarkson, Sara Bareilles, and more. For more details, please visit <http://bhsmusicislife.weebly.com/>.

PIANO CLASS III
Course Number: 752
Prerequisite: Piano Class II

Credit/Term: 0.5/sem
Grade Level: 10-12

Description: Students who have successfully completed Piano 1 and 2 will continue to advance into stronger piano players with the ultimate goal to be able to learn independently. There is no homework for this course and there is no need to have a piano at home. This course runs concurrently with Piano 2 and 3 courses. To learn more, please visit <http://bhsmusicislife.weebly.com/>.

PIANO CLASS IV
Course Number: 753
Prerequisite: Piano Class III

Credit/Term: 0.5/sem
Grade Level: 10-12

Description: Students who have successfully completed Piano 1, 2, and 3 will learn more challenging songs and versions of songs, scales, and accompaniments. It is highly recommended that students interested in pursuing music education work toward this course. Upon completion of this course, students will be able to continue learning piano independently. This course runs concurrently with Piano 2 and 3 courses. To learn more, please visit <http://bhsmusicislife.weebly.com/>.

MUSIC THEORY AND TECHNOLOGY
Course Number: 745
Prerequisite: Experience on an instrument or voice is recommended

Credit/Term: .5/sem
Grade Level: 9-12

Description: The purpose of this course is to enhance students' understanding of the underlying principles of music. The course curriculum covers topics ranging from basic rhythm to modes and scales, and includes the use of software and online resources associated with a theoretical purpose in music. Students also explore technology resources that are used to create, evaluate, arrange, and perform music. Real-world applications of music technology are discussed including: sound systems and recording, film scoring, radio commercials and jingles just to name a few. Students will develop the ability to recognize, understand, and describe the approaches to the development of aural, sight-singing, written, analytic and composition skills.

TECHNOLOGY AND ENGINEERING

ENGINEERING AND FABRICATION

Course Number: 800

Prerequisite: None

Credit/Term.: .50/sem.

Grade Level: 9-12

Description: This course exposes students to entry-level, DIY-inspired opportunities, and the use of fabrication, engineering, and design equipment to build your ideas. Students will learn basic skills of identifying a “problem/need,” working in a team, brainstorming ideas, designing a plan, and fabricating a solution. Students will learn the fundamental operation of equipment and fabrication processes including, but not limited to, computer- design, layout, hand tools, metal/woodworking machinery, laser printing, and basic welding. Additionally, this course is an introduction to enterprise including estimating the material, overhead, and production costs of engineering and fabricating a product. Any student who is interested in a hands-on designing, creating, or construction career should take this course!

HONORS FAB LAB

Course Number: 807

Prerequisite: At least one other Tech/Eng course

Credit/Term: .50/sem.

Grade Level: 9-12

Description: This course is similar to the Fabrication and Engineering course, but is designed for students who are familiar with basic design and fabrication processes and equipment. Students may choose to work in teams or independently to identify a “problem/need,” then design and produce a solution. All of the BHS Fabrication and Engineering labs are at the disposal of the students throughout the course including the CAD-CAM, Electronics, Robotics, Graphics, and Materials and Production areas. This course requires students to estimate the material, overhead, marketing, production, and packaging costs to engineer and fabricate their product(s). All students who are interested in engineering, design, manufacturing, building, construction, and business careers should take this course!

VIDEO PRODUCTION I

Course Number: 822

Prerequisite: None

Credit/Term: .50/sem.

Grade Level: 9-12

Description: This introductory course provides students with foundational skills in video editing, sound editing, basic animation, lighting design, menu production, HD, and image editing techniques. Students will explore the initial steps to create basic videos with a focus on the use of proper sets, studios, sound, light, and equipment necessary for a “professional-grade” final product. Students interested in a career associated with video or audio production, or a desire to explore digital creativity and storytelling should take this course.

VIDEO PRODUCTION II
Course Number: 823
Prerequisite: Video Production I

Credit/Term: .50/sem.
Grade Level: 9-12

Description: The assignments and activities in this course build on the foundational skills learned in Video Production I including editing, animation design, sound mixing, narrative script writing, Chroma-key operation, lighting design, and high definition video. Course projects may include the creation of music videos, audio or video commercials, highlight videos, historical documentaries, Adobe After Effects, or instructor approved independent projects that enhance the skills of the student or class. Students are required to perform concentrated fieldwork outside of the classroom to complete some of the assignments, then use high-tech software and equipment within the studio to create the final product. Any student interested in communications, theater, videography, directing, or producing should take this course! "Do you have what it takes to be a director?"

PRODUCTION STUDIOS
Course Number: 824
Prerequisite: Audition; Director recommendation

Credit/Term: 1.0/year
Grade Level: 10-12

Description: Students enrolled in this course produce the live daily broadcast of our school morning announcements. Student-led teams within the class rotate throughout the year to gain the skills of identifying and gathering current events, writing scripts, and producing video programs aired through our closed-circuit television system. The course assignments and activities exemplify a true "behind the scenes" experience of a modern television studio. Additionally, this course includes exposure to developing proper skills in sound, lighting, broadcast communication, Chroma-key operation, teleprompting, and camcorder methodology. Any student interested in the field of communications should take this course because, "We bring the news!"

DO IT YOURSELF 101 (DIY 101)
Course Number: 801
Prerequisite: None

Credit/Term: .50/sem
Grade Level: 9-12

Description: The Do It Yourself 101 course (DIY101) aims to empower high school students with essential skills in basic home and auto maintenance. Covering a broad range of practical topics, the curriculum offers hands-on experience in tasks commonly encountered in everyday life. It places a strong emphasis on empowering independence, where students acquire the ability to troubleshoot common household issues and perform routine vehicle maintenance.

**ESPORTS FUNDAMENTALS:
UNDERSTANDING AND ENGAGING IN
COMPETITIVE GAMING (INTRODUCTION
TO ESPORTS)**
Course Number: 640
Prerequisite: None

Credit/Term: .50/sem
Grade Level: 9-12

Pending Board Approval

Description: This semester course offers an engaging and comprehensive introduction to the world of esports, tailored for high school students. This course delves into the various facets of competitive gaming. It aims to equip students with an understanding of the esports ecosystem, career opportunities in the field, and the skills required to participate safely and effectively.

**ESPORTS DYNAMICS: STRATEGY,
TECHNOLOGY, AND PROFESSIONAL
DEVELOPMENT (ADVANCED ESPORTS
DYNAMICS)**

Course Number: 641

Prerequisite: Esports Fundamentals

Credit/Term: .50/sem

Grade Level: 9-12

Pending Board Approval

Description: Building on the foundations established in the introductory course, "Esports Dynamics: Strategy, Technology, and Professional Development" is an advanced course designed to delve deeper into the strategic, technological, and professional aspects of esports. This course aims to offer students a more profound understanding of the tactical intricacies of esports, the latest technological advancements in the field, and the skills necessary for professional growth in this dynamic industry.

**DRONES AND AERIAL INNOVATION:
TECHNOLOGY, REGULATIONS, AND FAA
PART 107 CERTIFICATION**

Course Number: 840

Prerequisite: None

Credit/Term: .50/sem

Grade Level: 9-12

Pending Board Approval

Description: This course is designed to introduce high school students to the exciting world of drones and aerial technology. In alignment with the Baldwin-Whitehall School District's mission of fostering a future-focused and innovative educational environment, this course provides foundational knowledge in drone technology, practical flying skills, and prepares students for the Federal Aviation Administration (FAA) Part 107 exam, a crucial step for those interested in commercial drone operations.

**DRONE MASTERY: ADVANCED
OPERATIONS, APPLICATIONS, AND
ENTREPRENEURSHIP**

Course Number: 841

Prerequisite: Drones and Aerial Innovation

Credit/Term: .50/sem

Grade Level: 9-12

Pending Board Approval

Description: "Drone Mastery: Advanced Operations, Applications, and Entrepreneurship" is a second-level course designed for students who have successfully completed the introductory drone course and hold the FAA Part 107 certification. This course delves deeper into advanced drone operations, specialized applications, and entrepreneurial opportunities in the drone industry.

FAMILY AND CONSUMER SCIENCES

FASHION DESIGN I
Course Number: 825
Prerequisite: None

Credit/Term: .50/sem.
Grade Level: 9-12

Description: This course is for students who enjoy fashion and being creative. Students will study the principles and elements of design and apply their knowledge to original fashion drawings (Croquis). Students will also construct garments following a pattern. Additionally, students will acquire a working knowledge of fabrics and textiles. Students will complete a career exploration unit including careers in design, textiles development, and fashion.

ADVANCED FASHION DESIGN
Course Number: 829
Prerequisite: Fashion Design I

Credit/Term: .50/sem.
Grade Level: 9-12

Description: This course is for students who would like to enhance their knowledge of fashion design, clothing construction, and textiles. Students will create a portfolio of construction skills including zipper placements, buttonholes, and French seams, to name just a few, and also be given the opportunity to work with technologically advanced sewing equipment. Students will explore the history of fashion and fashion designers. Students will also research past and current textiles trends and their influences on fashion. Finally, students will select patterns and construct clothing projects. This course may be repeated for credit.

INTERIOR DESIGN
Course Number: 837
Prerequisite: None

Credit/Term: .50/sem.
Grade Level: 9-12

Description: Interior Design is for those students who enjoy interior decorating or are considering it as a career choice. Projects include developing floor plans, selecting furniture styles, applying design basics, choosing color schemes, and creating unity within rooms of a home. Elements and principles of design are studied as an integral part in selecting furnishings and accessories.

INTERIOR DESIGN II
Course Number: 838
Prerequisite: Interior Design

Credit/Term: .50/sem.
Grade Level: 9-12

Description: If you loved Interior Design I, then this is the class for you! We will build on the knowledge gained in Interior Design I as we continue to explore the wonderful world of design for residential and commercial spaces. Students will learn about sustainable design practices for indoor and outdoor spaces, including an upcycling furniture project. Finally, students will ultimately create their own sustainably designed home or business.

COOKING BASICS
Course Number: 827
Prerequisite: None

Credit/Term: .50/sem.
Grade Level: 9-12

Description: Welcome to this dynamic learning environment where cooking comes alive. The course begins with the basics of baking by exploring options from savory rolls to sweet treats; from baking soda to yeast, what makes it happen? The journey continues as students master their knife skills. From dicing to chopping to julienne, students will create some great veggie recipes. Next, students will be exploring pastas and traditional sauces. Additionally, students may compete for the “Best Sauce” title! This course is perfect for any student who desires to learn how to navigate around the kitchen.

COOKING MASTERS
Course Number: 831
Prerequisite: Cooking Basics

Credit/Term: .50/sem.
Grade Level: 10-12

Description: This course is for students who consider themselves a real foodie - those who love all aspects of food and the latest cooking trends. Students will practice unique cooking techniques and participate in individual and group cooking competitions similar to shows on the Food Channel such as Cupcake Wars, Top Chef, and a variety of Cook Offs. Additionally, students will explore a variety of meals associated with heritages and international recipes including some from their own family’s kitchen. Students interested in honing their culinary skills or developing creative gastronomical abilities should take this course! Who will be the next Top Fighting Highlander Chef?

HONORS NUTRITION AND FOODS
Course Number: 830
Prerequisite: None

Credit/Term: .50/sem.
Grade Level: 9-12

Description: The objective of this course is to introduce students to healthy eating habits by studying current food issues such as fats in the diet, food fads, supplements, and eating disorders. Units of study include fruits and vegetables, meats and meat alternatives, grains, and dairy products. During the course of the semester, students have the opportunity to plan, prepare, taste, and evaluate traditional and international foods. This course is strongly recommended for students pursuing healthy food choices that last a lifetime.

CHS CHILD DEVELOPMENT
Course Number: 828
Prerequisite: None
College Credit: Fee for Credit

Credit/Term: .50/sem.
Grade Level: 10-12

Description: In this class, students will explore the development of children from conception through adolescence. The course will focus on developmental stages in areas of physical, social, emotional, and cognitive development. Students will discover how parents and caregivers can impact the positive development of a child. Students considering careers in teaching, nursing, and health and human services should consider taking this class. The course is highly recommended for students who would like to take Preschool Education. Three college credits from Robert Morris University can be obtained with a C average or better. At the completion of the course, students in grades 10-12 may earn college credits by registering and paying the requisite tuition and enrollment fees as required by the university.

CHS INTRO TO SPECIAL EDUCATION: K-12
Course Number: 850
Prerequisite: Students will need to be enrolled or have had a Partners' elective (PE, Art, Music)
College Credit: Fee for Credit

Credit/Term: .50/Sem.
Grade Level: 10-12

Description: This course is designed to provide an aspiring teacher or related service provider (occupational therapist, physical therapist, speech/language pathologist) with an exposure to the diverse learning needs of students across differentiated settings. Disability classifications, common characteristics related to areas of disability, modifications in teaching methods, and classroom management techniques for academic, social, emotional, and cognitive differences will be addressed. Students will become familiar with assessment techniques, inclusive practices, accommodations to meet students' special needs, and will be introduced to technological devices available for use in the classroom setting. Individualized Education Program's (IEPs), relevant legislation, staff collaboration, support services, and will be addressed. Reading materials will be used to link and make connections to course concepts. Three college credits from Robert Morris University can be obtained with a C average or better. At the completion of the course, students in grades 10-12 may earn college credits by registering and paying the requisite tuition and enrollment fees as required by the university.

PRESCHOOL EDUCATION
Course Number: 833
Prerequisite: Child Development is highly recommended;
Application Required

Credit/Term: 2.0/year
Grade Level: 11 and 12

Description: This is an advanced level course that requires students to demonstrate a genuine commitment to helping foster the physical, intellectual, social, and emotional development of preschool aged children. Students are expected to plan and teach developmentally appropriate lessons and apply higher level communication skills when interacting with preschool students and their families.

It prepares students for careers in education, pediatric nursing, social work, speech pathology, psychology, physical and occupational therapy, and other types of health and human services careers. The students will work with teams of other students to run an onsite preschool for four-year-olds. The students will learn positive guidance techniques, how to write lesson plans, management, and presentation skills. Students are expected to maintain professional attitudes and appearances at all times and to uphold the values of our community. GOOD ATTENDANCE is imperative in this class to achieve success.

Additionally, students are required to take regular anecdotal observations of their students and complete observation reports. It is highly recommended that students take Child Development prior to enrolling in Preschool Education. All students are required to fill out an application and get two teacher recommendations. You must see Mrs. Malone or Mrs. Pfatteicher to receive the application.

PRESCHOOL EDUCATION II
Course Number: 833
Prerequisite: Preschool Education;
Application Required

Credit/Term: 2.0/year
Grade Level: 12

Description: This course is available only to senior students who have successfully completed (90% or above) the Preschool Education class as juniors. Course participants will be partnered with an elementary school teacher and will work in the classroom to provide assistance to that teacher as needed. Students will be learning hands-on classroom management, lesson planning and general skills of working within a school environment.

HEALTH AND PHYSICAL EDUCATION

PHYSICAL EDUCATION 9

Course Number: 900

Prerequisite: None

Credit/Term: .50/sem.

Grade Level: 9

Description: The varied activities included in the physical education program contribute to the physical, mental, and social well-being of the student. These activities are not only concerned with the present development of the students' skills but they are designed to promote leisure-time activities and an awareness of the importance of personal fitness in adult life. The ninth grade students' will compete in a variety of team and individual sports. This class includes a required swimming unit.

PHYSICAL EDUCATION WITH BASIC SWIMMING/AQUATICS

Course Number: 902

Prerequisite: None

Credit/Term: .50/sem.

Grade Level: 9-12

Description: This course is an alternative to the traditional Physical Education course placing special emphasis on developing swimming skills. This course is designed for a non-swimmer, student with weak swimming skills or someone who enjoys swimming. Other varied activities included in this course contribute to the physical, mental, and social well-being of the student. These activities are not only concerned with the present development of the students' skills, but are designed to promote leisure-time activities and an awareness of the importance of good personal fitness for their adult lives. These activities will be a variety of team and individual sports. A student in this class will swim on average 2-3 times per week.

FRESHMEN STRENGTH TRAINING

Course Number: 903

Prerequisite: None

Credit/Term: .50/sem.

Grade Level: 9-12

Description: *The class will take place in the weight room.* This introductory strength training course is designed to provide 9th-grade students with a comprehensive understanding of fundamental principles, techniques, and benefits associated with strength training. The curriculum focuses on promoting overall physical wellness, developing muscular strength, enhancing body awareness, and fostering a positive attitude towards fitness. This class includes a required swimming unit.

WELLNESS 9

Course Number: 908

Prerequisite: None

Credit/Term: .50/sem.

Grade Level: 9

Description: This course is an alternative course to traditional physical education, placing special emphasis on improving and enhancing the students' wellness and fitness level. Students aspiring to lose weight with body toning, and improve or enhance personal wellness are encouraged to enroll in this course. Activities may also include: yoga, Pilates, mindfulness, cardiovascular fitness, individual sports and instructional swimming/water aerobics. Wellness is a state of optimal well-being that is oriented toward maximizing an individual's potential. As students cultivate through the semester, they will obtain the benefits of flexibility, core strength, improved posture, decreased stress levels, and muscle definition. This class includes a required swimming unit.

HEALTH
Course Number: 904
Prerequisite: None

Credit/Term: .50/sem.
Grade Level: 10

Description: Health Education is a required subject for all students in Grade 10. The program focuses on the physical, mental, and social wellness of the individual and strives to create lifetime awareness. All units taught are self-esteem, decision-making skills, sexuality, tobacco, nutrition, and CPR training. In addition, drug and alcohol abuse education will be taught.

TEAM SPORTS
Course Number: 922
Prerequisite: Successful completion of 900, 902, 908

Credit/Term: .50/sem.
Grade Level: 10-12

Description: Students will experience a variety of team activities that help improve personal fitness levels and may be played at any age. These activities are not only concerned with the present development of the students but also are designed to promote leisure-time activities and an awareness of the importance of good personal fitness for students into their adult lives. The course will promote competitive tournament-style game play. Intense game play will take place during this class during most of the activities.

PHYSICAL EDUCATION WITH LIFE GUARDING/STANDARD FIRST AID/CPR
Course Number: 923
Prerequisite: Successful completion of 900, 902, 908

Credit/Term: .50/sem.
Grade Level: 10-12

Description: The purpose of the American Red Cross Lifeguarding course is to provide entry-level lifeguard participants with the knowledge and skills to prevent, recognize, and respond to aquatic emergencies and to provide care for breathing and cardiac emergencies, injuries, and sudden illnesses until emergency medical services personnel take over. To enroll in the Lifeguarding course, students must be at least 15 years old before the last scheduled class session in order to be certified. There is a \$50 fee for this course.

ADVENTURE OUTDOOR EDUCATION
Course Number: 924
Prerequisite: Successful completion of 900, 902, 908

Credit/Term: .50/sem.
Grade Level: 10-12

Description: This course is designed for students who may have an interest in the Outdoor Recreation/Education Industry, one of the fastest-growing industries in America. This class will include knowledge about archery, biking, fly fishing, camping, kayaking, group management, risk management, policy and procedure development for the activities and the area, land-management awareness, and environmental ethics. Outdoor Leadership students are expected to teach/introduce the particular area/activity.

STRENGTH TRAINING 10-12**Course Number: 925****Prerequisite: Successful completion of 900, 902, 908****Credit/Term: .50/sem.****Grade Level: 9-12****Description: The class will take place in the weight room.**

This course is an alternative course to the traditional physical education course placing an intensive emphasis on developing, improving, and enhancing the students' performance-based fitness level. At the completion of strength training, students will increase their strength, improve their flexibility and agility, and improve upon the efficiency of their cardiovascular system. They will gain an understanding of the muscle groups and exercise physiology. This class is a muscle building and conditioning class focusing on weight lifting. Exercises will utilize a mixture of dumbbells, resistance bands, and body weight to sculpt and define arms, back, legs, abdominal muscles, and glutes. The major focus is strength training and challenging muscular endurance.

WELLNESS 10-12**Course Number: 909****Prerequisite: Successful completion of 900, 902, 908****Credit/Term: .50/sem.****Grade Level: 10-12**

Description: This course is an alternative course to traditional physical education, placing special emphasis on improving and enhancing the students' wellness and fitness level. Students aspiring to lose weight with body toning, and improve or enhance personal wellness are encouraged to enroll in this course. This course is designed for those who have a good understanding of the basic yoga postures and alignment, and have explored a variety of poses and sequences. Activities may also include: yoga, Pilates, mindfulness, cardiovascular fitness, individual sports and water aerobics. Wellness is a state of optimal well-being that is oriented toward maximizing an individual's potential. As students cultivate through the semester, they will obtain the benefits of flexibility, core strength, improved posture, decreased stress levels, and muscle definition and confidence.

PARTNER'S PHYSICAL EDUCATION**Course Number: 910****Prerequisite: Application; Teacher recommendation****Credit/Term: .50/sem.****Grade Level: 10-12**

Description: This course is designed for students to work together to fulfill the needs of all individuals with various ability levels within all typical physical education class activities including but not limited to individual sports, team sports, and swimming. In addition to physical activities, students will engage in social and team building activities. Students in this class who may have any physical or cognitive difficulties can also benefit from the added physical activity taking place in a less restrictive class. Every attempt is made to design activities so that every student with varying ability levels has a partner working alongside him/her to complete a common goal or project. Students enrolling in Partners P.E. should develop partnerships that transcend this class.

HONORS EXERCISE/SPORTS PHYSIOLOGY**Course Number: 405****Prerequisite: Honors Anatomy & Physiology****Credit/Term: .50/sem.****Grade Level: 12**

Description: The exercise science class prepares students through the study of human movement to pursue careers in health and fitness, corporate wellness, research, clinical and strength and conditioning industries. While interest in fitness and health has continued to grow, professionals in exercise science serve to optimize exercise, physical activity, and lifestyle management for all people. Exercise Science also prepares students for studies in exercise physiology, physical therapy and occupational therapy as well as for medical school, pharmacy school, chiropractic school, a career as a physician's assistant, and many other opportunities. Topics covered in Honors Anatomy and Physiology will be utilized in this course. Students will also learn new topics/concepts of anatomy and physiology.

SPECIAL EDUCATION

VISION SUPPORT

Course Number: 003

Prerequisite: Recommendation

Credit/Term: 0

Grade Level: 9-12

Description: This course provides specially-designed instruction to students whose visual impairment adversely affects their educational performance. Teaching activities, including orientation instruction, mobility instruction, and Braille instruction, focus on the acquisition of specific competencies from the Expanded Core Curriculum. These skills aid the student in compensating for vision loss. Specialized materials, technical assistance, technology support, assessment, acquisition and training in the use of assistive devices for the visually impaired are provided. This support enhances the student's opportunities for academic success in an inclusive educational program.

HEARING SUPPORT

Course Number: 007

Prerequisite: Recommendation

Credit/Term: 0

Grade Level: 9-12

Description: Hearing Support empowers students with varying degrees of hearing loss or deafness through targeted self-advocacy skills. Collaborating with a Teacher of the Deaf, students address individualized goals outlined in their IEP, with communication options available in either Spoken English or American Sign Language. This course fosters an inclusive environment and equips students to confidently navigate academic challenges

GOODWILL PROJECT LIFE

Course Number: 030

Prerequisite: Recommendation

Credit/Term: 0

Grade Level: 9-12

Description: Goodwill Project LIFE is a comprehensive, multi-year transition-to-adulthood program in which individuals (ages 16+) with varying learning abilities can develop, practice, and strengthen skills that are high predictors for increased adult independence and successful, integrated community employment. Project LIFE offers a targeted course of study in combination with participation in experiential life skills education and authentic work-based learning experiences in the local community. Utilizing evidence-based transition education concepts, Project LIFE is a proven program model that supports our student interns on their journey to adulthood and greater independence. This course is a full-day, 3-5 days a week course that is located at Goodwill's Workforce Development Center in Lawrenceville.

ACADEMIC SKILLS DEVELOPMENT**Course Number: 052****Prerequisite: Recommendation****Credit/Term: 1.0****Grade Level: 9-12**

Description: This course is tailored to provide students with essential tools and strategies crucial for academic success via their individualized education plan goals. Through dynamic and interactive learning experiences, students engage in activities and discussions aimed at cultivating key skills necessary for effective learning and achievement in academic settings. Topics covered include individualized academic intervention, time management, organization, test preparation, test-taking strategies, goal setting, and self-advocacy in a special education setting.

EMOTIONAL SKILLS DEVELOPMENT**Course Number: 052e****Prerequisite: Recommendation****Credit/Term: 1.0****Grade Level: 9-12**

Description: This course is designed to assist students with the ability to develop self-awareness, self-regulation, and interpersonal skills essential for navigating the complexities of both academic and social environments. Students will engage in a range of activities that integrate academic support with Social-Emotional Learning (SEL) principles. This course will include activities, group discussions, and real-life strategies focusing on communication skills, empathy, relationship building, self-regulation, stress management, and conflict resolution. In addition to SEL, students will also participate in activities that support their individual academic program. Topics covered include individualized academic intervention, time management, organization, test preparation, test-taking strategies, goal setting, and self-advocacy in a special education setting.

TRANSITION**Course Number: 094****Prerequisite: Recommendation****Credit/Term: 0****Grade Level: 9-12**

Description: This course is designed to support individuals with differing learning abilities in developing essential skills for successful entry into the workforce. Through a tailored and inclusive approach, students will engage in a variety of hands-on activities, interactive lessons, and real-world simulations to enhance their vocational readiness and transferable skills. An emphasis will be placed on the development of fundamental workplace skills, including effective communication, time management, teamwork, problem-solving, and professionalism. Practical exercises and role-playing scenarios will be employed to reinforce these skills.

PREVOCATIONAL**Course Number: 095****Prerequisite: Recommendation****Credit/Term: 0****Grade Level: 9-12**

Description: This course is designed to support individuals with differing learning abilities in developing essential skills for successful entry into the workforce. Through a tailored and inclusive approach, students will engage in a variety of hands-on activities, interactive lessons, and real-world simulations to enhance their vocational readiness and transferable skills. An emphasis will be placed on the development of fundamental workplace skills, including effective communication, time management, teamwork, problem-solving, and professionalism. Practical exercises and role-playing scenarios will be employed to reinforce these skills.

STEEL CENTER FOR CAREER AND TECHNICAL EDUCATION

Steel Center Opportunities

Students must apply for the opportunity to enroll in programs at Steel Center. Admission is not guaranteed. Students who are enrolled are expected to maintain an average 2.0 GPA at Baldwin High School. Failure to maintain this GPA will result in a review of a student's participation in Steel Center courses and could result in removal from Steel Center.

STEEL CENTER GRADING

BHS Steel Center students will be given a percentage on their report card and transcript that is equivalent to the BHS grading scale based upon what they have earned in their program of study at Steel Center. Please note that the Steel Center grading scale differs from BHS.

| Baldwin High School | | Steel Center for Career and Technical Education | |
|----------------------------|--|--|------------|
| A | 90% - 100% | A | 90% - 100% |
| B | 80% - 89% | B | 80% - 89% |
| C | 70% - 79% | C | 70% - 79% |
| D | 60% - 69% | D | 60% - 69% |
| F | 0% - 59% | F | 0% - 59% |
| I | This will become an F if not made up within two weeks. | | |

STEEL CENTER CAREER MAJORS (CIP CODES)

Steel Center offers 18 career majors. Each major is based on state and/or locally approved curricula, inclusive of written (theoretical) activities, performance tasks, demonstration of work ethic, and professionalism. For each major, students may earn three (3) or more Carnegie Units (credits) per year, depending on local sending school district policies for credit acquisition. Students may also earn industry certifications in respective programs. Steel Center's career majors are as follows, listed alphabetically by local title and accompanied by Pennsylvania Classification of Instructional Program (CIP) codes:

Advertising & Design (Program of Study)**Grades 10-12*****CIP Code: 50.0402, 3 or more credits/year.*****Industry Certifications Available:** Adobe Certified Associate CS6 Photoshop, InDesign, Illustrator, & Pennsylvania Skills Certification

An instructional program in the applied visual arts that prepares individuals to use artistic techniques to effectively communicate ideas and information to business and consumer audiences via illustrations and other forms of printed media. This program includes instruction in concept design, layout, paste-up and techniques such as engraving, etching, silkscreen, lithography, offset, drawing and cartooning, painting, collage and computer graphics.

Automotive Technology (Program of Study)**Grades 10-12*****CIP Code: 47.0604, 3 or more credits/year.*****Industry Certifications Available:** Pennsylvania State Automotive Safety Inspection, Pennsylvania State Emissions Inspection and EPA, & Pennsylvania Skills Certification

An instructional program that prepares individuals to apply technical knowledge and skills to engage in the servicing and maintenance of all types of automobiles and light trucks. This program includes instruction in the diagnosis and testing, including computer analysis, of malfunctions in and repair of engines, fuel, electrical, cooling and brake systems and drive train and suspension systems. Instruction is also given in the adjustment and repair of individual components and systems such as cooling systems, drive trains, fuel system components and air conditioning and includes the use of technical repair information and the state inspection procedures.

Baking/Pastry Chef (Program of Study)**Grades 10-12*****CIP Code: 12.0501, 3 or more credits/year.*****Industry Certifications Available:** ServSafe Manager Food Safety, ServSafe Food Handler, S/P2 Culinary Safety and Pollution Prevention, & Pennsylvania Skills Certification

Specialized classroom and practical work experiences associated with the preparation of breads, crackers, cakes, pies, pastries and other bakery products for retail distribution, for consumption in a commercial food service establishment or for special functions. Instruction includes making, freezing and handling of bake products; decorating; counter display; and packaging of merchandise. This is a comprehensive program to prepare individuals for employment in a variety of occupations in the baking industry.

Building Trades Maintenance (Program of Study)**Grades 10-12*****CIP Code: 46.0401, 3 or more credits/year.*****Industry Certifications Available:** Pennsylvania Builders Association Certification (PBA), OSHA-10 Hour Training CareerSafe, & Pennsylvania Skills Certification

An instructional program that prepares individuals to apply technical knowledge and skills to keep a building functioning, and to serve a variety of structures including commercial and industrial buildings and mobile homes. Instruction includes the basics of carpentry, millwork, plumbing, painting, glazing, electricity, plastering, welding, minor sheet metal, concreting, bricklaying, tile setting, hardware usage, heating, ventilation, waterproofing, roofing and record keeping.

Carpentry (Program of Study)

Grades 10-12

CIP Code: 46.0201, 3 or more credits/year.

Industry Certifications Available: Pennsylvania Builders Association Certification (PBA), OSHA 10 Hour Training CareerSafe, & Pennsylvania Skills Certification

An instructional program that prepares individuals to apply technical knowledge and skills to lay out, fabricate, erect, install and repair structures and fixtures using hand and power tools. This program includes instruction in common systems of framing, construction materials, estimating, blueprint reading and finish carpentry techniques.

Collision Repair and Refinishing (Program of Study)

Grades 10-12

CIP Code: 47.0603, 3 or more credits/year.

Industry Certifications Available: S/P2 Collision Safety and Pollution Prevention, & Pennsylvania Skills Certification

An instructional program that prepares individuals to apply technical knowledge and skills to repair damaged automotive vehicles such as automobiles and light trucks. Students learn to examine damaged vehicles and estimate cost of repairs; remove, repair and replace upholstery, accessories, electrical and hydraulic window and seat operating equipment and trim to gain access to vehicle body and fenders; remove and replace glass; repair dented areas; replace excessively damaged fenders, panels and grills; straighten bent frames or unibody structures using hydraulic jacks and pulling devices; and file, grind and sand repaired surfaces using power tools and hand tools. Students refinish repaired surfaces by painting with primer and finish coat.

Computer Technology (Program of Study)

Grades 10-12

CIP Code: 15.1202, 3 or more credits/year.

Industry Certifications Available: A+ Certification, Network+ Certification, & Pennsylvania Skills Certification

An instructional program that prepares individuals to apply basic engineering principles and technical skills in support of professionals who use computer systems. This program includes instruction in basic computer design and architecture, programming, problems of specific computer application, component and system maintenance and inspection procedures, hardware and software problem diagnosis and repair and report preparation.

Cosmetology

Grades 10-12

(Tech Prep Articulation Agreement with Douglas Education Center)

CIP Code: 12.0401, 3 or more credits/year.

Industry Certifications Available: Cosmetology License, Manicurist, Esthetician, & Pennsylvania Skills Certification

An instructional program that prepares individuals to apply technical knowledge and skills related to experiences in a variety of beauty treatments including the care and beautification of the hair, complexion and hands. Instruction includes training in giving shampoos, rinses and scalp treatments; hair styling, setting, cutting, dyeing, tinting and bleaching; permanent waving; facials; manicuring; and hand and arm massaging. Bacteriology, anatomy, hygiene, sanitation, salon management including record keeping and customer relations are also emphasized. Instruction is designed to qualify pupils for the licensing examination.

Culinary Arts (Program of Study)

Grades 10-12

CIP Code: 12.0508, 3 or more credits/year.

Industry Certifications Available: ServSafe Manager Food Safety, ServSafe Food Handler, S/P2 Culinary Safety and Pollution Prevention, & Pennsylvania Skills Certification

An instructional program that prepares students for employment related to institutional, commercial or self-owned food establishments or other food industry occupations. Instruction and specialized learning experiences include theory, laboratory and work experience related to planning, selecting, preparing and serving of quantity food and food products; nutritive values; use and care of commercial equipment; safety; and sanitation precautions. Instruction skills are provided to individuals desiring to become employed in all areas of the food service industry at entry level.

Electrical Construction (Program of Study)

Grades 10-12

CIP Code: 46.0399, 3 or more credit/year.

Industry Certifications Available: Pennsylvania Builders Association Certification (PBA) & Pennsylvania Skills Certification

An instructional program that prepares individuals to apply technical knowledge and skills necessary to install, operate, maintain and repair electrically-energized residential, commercial and industrial systems, and DC and AC motors, controls and electrical distribution panels. Instruction emphasizes practical application of mathematics, science, circuit diagrams and use of electrical codes and includes blueprint reading, sketching and other subjects essential for employment in the electrical occupations. Reading and interpretation of commercial and residential construction wiring codes and specifications, installation and maintenance of wiring, service and distribution networks within large construction complexes are also critical components of the program.

Exercise Science and Rehabilitation Services (Tech Prep)

Grades 10-12

CIP Code: 51.2604, 3 or more credits/year.

Industry Certifications Available: To be determined, but may include the following: American Heart Association (AHA) Heartsaver First Aid, AHA CPR, HIPAA Certification, American Medication Certification Association (AMCA) Physical Therapy Aide, & Pennsylvania Skills Certification

A program that prepares individuals to assist in rehabilitation services under the supervision of physical therapists, occupational therapists, speech-language pathologists, and other therapeutic professionals, and to perform routine functions in support of rehabilitation. Includes instruction in roles and responsibilities of rehabilitation providers, basic function of the human body, disabling conditions, therapeutic skills, client management, and communication skills.

Health Assistants (Program of Study)

Grades 10-12

CIP Code: 51.0899, 3 or more credits/year.

Industry Certifications Available: Patient Care Technician/PCT, Basic Life Support Health Care Providers, & Pennsylvania Skills Certification

A cluster program with a combination of subject matter and experiences designed to prepare individuals for entry-level employment in a minimum of three related health occupations under the supervision of a licensed healthcare professional. Instruction consists of core course content with clinical experiences in one or two health related occupations. The core curriculum consists of planned courses for introduction of health careers, basic anatomy and physiology, medical terminology, legal and ethical aspects of health care and communications and at least three planned courses for the knowledge and skills for the occupational area such as medical assisting, ward clerk, nursing assisting, etc.

Heating, Ventilation, Air Conditioning & Refrigeration (Program of Study)

Grades 10-12

CIP Code: 47.0201, 3 or more credits/year.

Industry Certifications Available: EPA 608 Technician Certification, Pennsylvania Builders Association Certification (PBA), & Pennsylvania Skills Certification

An instructional program that prepares individuals to apply technical knowledge and skills to install, repair and maintain commercial and domestic heating, air conditioning and refrigeration systems. Instruction includes theory and application of basic principles involved in conditioning of air (cooling and heating); filtering and controlling humidity; operating characteristics of various units and parts; blueprint reading; use of technical reference manuals; the diagnosis of malfunctions; overhaul, repair and adjustment of units and parts such as pumps, compressors, valves, springs and connections; and repair of electric/electronic and pneumatic control systems.

Medical Professions (Program of Study)

Grades 10-12

CIP Code: 51.9999, 3 or more credits/year.

Industry Certifications Available: To be determined, but may include the following: Basic Life Support (BLS), Pharmacy Technician (CPhT), EKG Technician (CET), Phlebotomy Technician (CPT), Nurse Technician (CNT), & Pennsylvania Skills Certification

An instructional program that prepares individuals to apply knowledge and skills in the health occupations. Instruction is provided in the basic skills in a variety of areas associated with health occupations such as health and medical services, pharmaceutical and medical instruments and supplies. Instruction includes but is not limited to foundations of health (medical terminology); anatomy and physiology; legal, ethical and economic aspects of health care; clinical laboratory procedures; basic health occupational skills; aseptic techniques; OSHA regulations; and infection control. Clinical education is an integral part of the program. Science and math taught by certificated science and math teachers will be coordinated and deemed essential for students to successfully reach their career objectives.

Public Safety (Tech Prep)

Grades 10-12

CIP Code: 51.0904, 3 or more credits/year.

Industry Certifications Available: Emergency Medication Technician, National Incident Management System, Basic Life Support Health Care Providers, Hazardous Materials Response Awareness, & Pennsylvania Skills Certification

A program that prepares individuals, under the remote supervision of physicians, to recognize, assess, and manage medical emergencies in prehospital settings and to supervise ambulance personnel. Students will learn about basic, intermediate, and advanced EMT procedures; emergency surgical procedures; medical triage; rescue operations; crisis scene management and personnel supervision; equipment operation and maintenance; patient stabilization, monitoring, and care; drug administration; identification and preliminary diagnosis of diseases and injuries; communication and computer operations; basic anatomy, physiology, pathology, and toxicology; and professional standards and regulations. Students will also learn fundamentals of police operations and fire protection, as well as technical and vehicle rescue. Physical development and self-confidence are emphasized due to the nature of the specific occupation(s) associated with public safety.

Veterinary Assistant (Program of Study)

Grades 10-12

CIP Code: 51.0808, 3 or more credits/year.

Industry Certifications Available: To be determined, but may include the following: OSHA-10 Health Careers, CPR, Pet Tech First Aid, Purina Weight Coach, & Pennsylvania Skills Certification

An instructional program that prepares individuals to support veterinarians by providing assistance during animal examinations, treatment administration and monitoring; by keeping animal and related health record information; and by performing a range of selected practice-related duties. This program is designed to provide instruction in preparing the animal for examination and treatment, sterilizing equipment and performing selected routine laboratory procedures under direct supervision of the veterinarian. Instruction also includes maintaining medical and business records, charting and scheduling activities and a wide range of practice-related duties as applied to animal health care, the biomedical field and the pet industry. The health occupational planned courses include the study of life sciences with emphasis on animal anatomy, physiology, diseases, reproduction, genetics, nutrition, animal laboratory procedures, aseptic technique, OSHA regulations, infection control and procedures. Clinical education is an integral part of the program. Science and math taught by certificated science and math teachers will be coordinated and deemed essential for students to successfully reach their career objectives.

Welding (Program of Study)

Grades 10-12

CIP Code: 48.0508, 3 or more credits/year.

Industry Certifications Available: AWS Certification, SP/2 Welding Safety Pollution and Prevention, & Pennsylvania Skills Certification

An instructional program that prepares individuals to apply technical knowledge and skills in gas, arc, shielded and non-shielded metal arc, brazing, flame cutting and plastic welding. Hand, semi-automatic and automatic welding processes are also included in the instruction. Students learn safety practices and types and uses of electrodes and welding rods; properties of metals; blueprint reading; electrical principles; welding symbols and mechanical drawing; use of equipment for testing welds by ultrasonic methods and destruction and hardness testing; use of manuals and specification charts; use of portable grinders and chemical baths for surface cleaning; positioning and clamping; and welding standards established by the American Welding Society, American Society of Mechanical Engineers and American Bureau of Ships.
