Building a
Foundation for
Lifelong Learning!

About Our Program

We provide Tier One instruction to all students. We use research-based curriculum that uses teaching methodologies from early childhood experts in math, science, literacy, and social-emotional learning.

We believe students learn best in self-directed environments enriched with opportunities for discovery and play-based learning.

Mission Statement

Building a strong foundation for life-long learners through research supported play-based learning. Guiding students on an adventure of self-discovery knowledge, developmentally appropriate academia, and social skills. Supported by state certified teachers who create a safe, healthy, and inviting learning environment for all students.

Special Education

Special education is specially designed instruction, at no cost to the parents, to meet the unique needs of children with disabilities.

The Individualized Education Plan (IEP) team may determine a student needs related services to benefit from his/her early intervention program which may include transportation, speech therapy, physical and occupational therapy, assistive technology, or vision support.

Parents, legal guardians, and educators may refer a child for a screening and/or an evaluation. If it is determined a child has a disability as defined under Individuals with Disabilities Education Act (IDEA) and would benefit from specialized instruction, an IEP is developed and placement is determined.

IEP Referral Process

- The parent or legal guardian may initiate a referral by visiting the preschool page at tooeleschools.org or by phoning our preschool offices at 435-833-1966.
- The preschool team will schedule a screening to identify areas of delay.
- After the screening the team will discuss areas of concern and may discuss additional areas to be assessed.
- After assessments, the team will schedule a day/time to review the results and discuss eligibility for special education with consideration to the following:

- 1) Does the child have a disability as defined under Individuals with Disabilities Education Act (IDEA)?
- 2) Does the disability adversely affect their education?
- 3) Does the child require specialized instruction in order to access the general education?

- If the team determines the student is eligible, they will develop an IEP.
- Services are provided by appointment and/or in a preschool setting.

Prior to Assessment

- Register your student online at: www.tooeleschools.org
- Provide birth certificate, immunizations and proof of residency.
