Asbestos Management Program

In October 1986, the U.S. Congress enacted the Asbestos Hazard Emergency Response Act (AHERA). Under this law, comprehensive regulations were developed to address the issue of asbestos containing building materials in our nation's schools. The regulations require that all Kindergarten through 12th grade educational systems must provide for the inspection of their school facilities for asbestos containing materials. When asbestos containing materials are found, the school must develop a comprehensive asbestos management program to ensure that the school facility is free of any potential health hazards that may be related to the presence of asbestos building materials.

The Gibbsboro School District has contracted **Vanasse Hangen Brustlin, Inc or VHB** to provide AHERA-related Asbestos Management Program administration. **VHB** has completed a surveillance inspection of the asbestos-containing material in the Gibbsboro Elementary School. The AHERA regulation requires that this inspection be conducted every six months.

All Asbestos Management Program documents are available for review during normal business hours at the Gibbsboro Elementary School main office. Copies of the Asbestos Management Plan can be obtained with payment of a normal copying charge.

For additional information regarding the Gibbsboro Elementary School Asbestos Management Program you may contact:
