

MISS CHEEK

Vision & Mission

Serving ALL students, wherever and whenever

VISION

Miss Cheek's students transition into the world with value for themselves and others, strive for academic excellence, emotional well-being, and a strong, positive character. Our students are respectful, responsible, and life-long learners who give their best effort regardless of the environment. Our students implement problem solving and critical thinking skills with resilience, empathy, compassion, and open-mindedness, ensuring they achieve postsecondary and career goals and thrive as successful and productive members of our diverse community and world.

MISSION

Miss Cheek's School Counseling Program provides equitable access to a data-driven, developmentally appropriate, and culturally sensitive comprehensive school counseling program and inspires all students to maximize their unique potential. The school counseling program is dedicated to recognizing each student as a unique individual and preparing every student socially, academically, and emotionally for present and future challenges. We advocate for every student and work in collaborative partnerships to empower students to become lifelong learners who are responsible, strong-willed, productive citizens. As School Counselors we are the bridge builders and the gap-closers our students deserve.
