

Using ClassLink on a Mobile Device

ClassLink can be used on iOS or Android devices. You will need to download the ClassLink app from the Apple App or Google Play store. Once you have downloaded the app, you will need to search for “Pittsford” the first time you launch the app. It will bring up the Pittsford Schools ClassLink sign in page.

The screenshot shows the Pittsford Schools ClassLink sign-in interface. At the top, the text "Pittsford Schools" is displayed in a large, blue, serif font, centered between two horizontal red lines. Below this is a white sign-in form with rounded corners. The form contains two input fields: "Username" with a person icon on the left and "Password" with a key icon on the left and a toggle icon on the right. Below the password field is a "Remember Me" label with a slider switch. A prominent blue button with the text "Sign In" is centered below the form. Underneath the button, the text "Or sign in with:" is followed by a circular icon depicting a hand holding a smartphone. At the bottom of the form, the text "Privacy Policy" is displayed as a blue hyperlink.

Please note, when using the mobile version of ClassLink, you will **not** need to download the browser extension. Also, some applications within ClassLink will load within the web browser, while others will require you to download that application from the app store. It should prompt you to download an app if that is required.
