

GROW OUR OWN

Our vision: “To grow garden and food-based education in the cafeteria, classroom, and community.”

Since 2017, SPPS Nutrition Services has been encouraging the use of school gardens as a tool for nutrition education through Grow Our Own. We see garden education as an empowering way for kids to learn about food and make connections to the cafeteria staff who support their education through good nutrition.

Grow Our Own is funded through a generous grant from the Cargill Foundation with additional support from the USDA, Renewing the Countryside, Minnesota State Horticultural Society, Allina, and individual donors.
