School Based Budgets

School Based Budgets

Annual School-Based Budgeting Process

- Site-Based and Title I Budgets are built using Enrollment Projections from the DREA Department.
- Schools receive these in January, with the completed budgets going into effect in July for the following school year.
- For the Site-Based Budget, each school receives a Per-Student Allocation. This is a starting point and is compared against the minimum standards as dictated by the district's Service Delivery Model to ensure it can meet these thresholds with their Per-Student Allocation. All schools below these thresholds are funded so that they can meet these standards.
- In order to account for this additional amount, all schools that have an allocation that exceeds their allocation must contribute a portion of their overage, though they are permitted to keep the remainder.

Annual Budgeting Process

- Schools have approximately one month to review and complete these budgets and submit them to the Budget Office and their Assistant Superintendent for review and approval.
- Human Resources begins the staffing process based off of these submitted budgets in early March.
- Schools are responsible for budgeting for the necessary staffing and non-staff needs for their school
 - This does not include Special Education and ELL staff.
 - Literacy and Math Coaches are also provided from Central budgets
 - School-based Employees from the Food Service, Nursing, Custodial, School Safety, and Early Childhood departments are not part of these budgets, either. These are staffed according to the direction of the central departments that oversee them.
