NATIONAL ENERGY CONSERVATION DAY

December 14, 2024

Go Green for our Future

**For Dusty,
Conservation Matters.**

The theme for National Energy Conservation Day 2024 is "Go Green for Our Future." This theme is intended to highlight the importance of using energy efficiently and transitioning to renewable sources of energy. The day is a great opportunity for individuals, businesses, and organizations to learn about how energy is used in their daily lives and discover ways to reduce energy consumption.
