Re: Environmental Water Sampling – Medina Elementary School

Dear Mr. Leuer,

Envoy Environmental was contracted on September 27, 2016 to perform Environmental Water Sampling at Medina Elementary School located at 335 West Oak Orchard Street in Medina, New York. We understand the Medina Central School District is evaluating the data based on the NYS Department of Health (“NYSDOH”) Emergency Regulation, Lead Testing in School Drinking Water (Subpart 67-4) as well as the EPA’s 3T’s for Reducing Lead in Drinking Water in Schools Guidance Document. All sampling conducted was done in accordance with the NYSDOH regulations as it pertains to testing schools for lead in the drinking water.

Samples taken were based on both the direction of the client, and areas designated as high priority as outlined by the NYSDOH regulations. All water samples collected were 250 mL and taken as a “first draw” from each testing location. First draw samples are defined as a sample of tap water, collected in accordance with the NYSDOH regulations, that has been standing in plumbing pipes at least 8 hours and not more than 18 hours and is collected without prior flushing of the tap. The NYSDOH regulations identifies the Action Level at 15 ppb.

Water sampling analysis was contracted through Con-Test Analytical Laboratory located in Richmond, Virginia, a NYS ELAP approved laboratory. The sampling and analytical testing was conducted in compliance with the USEPA Requirements for Lead Sampling and Testing Protocols. The following USEPA Methodologies were used to prepare and analyze the drinking water samples for Lead:

Drinking Water Sample Preparation	USEPA Method 200.2
Lead by ICP-MS	USEPA Method 200.8

Each sample was preserved, at Con-Test Analytical Laboratory, with nitric acid to reduce the pH to less than 2 as per USEPA Method 200.2.

Chain of Custody (“COC”) forms are used to document the history of sample possession from the time the sample containers leave their point of origin to the time the samples are received by the laboratory.

In Table 1 of this report we have listed water samples that are above 15 ppb.

TABLE 1

Medina Elementary School			
Sample ID	Water Source	Level Detected (PPB)	Remedial Suggestions
ES-1-CS-020	Classroom Sink	240	1. Take outlet out of service. 2. Do not use for drinking water purposes – adequate signage. 3. Clean aerator, re-test “first draw” and “flush” samples to identify if the problem is at the outlet or interior plumbing; and/or, 4. Replace outlet with NSF-approved devices and re-test.
ES-1-CS-030	Classroom Sink	72	
ES-1-CS-031	Classroom Sink	28	
ES-1-DW-46	Drinking Water Bubbler	18	
ES-1-DW-069	Drinking Water Bubbler	61	
ES-1-CS-071	Classroom Sink	16	
ES-2-CS-095	Classroom Sink	39	
ES-2-CS-111	Classroom Sink	21	

Solutions to lead problems need to be made on both a short-term and a permanent basis. Short-term measures could include flushing the pipes to bring fresh water to the source, removing the outlet from service or providing bottled water until the source of contamination is resolved. Permanent remedies can be implemented in order to eliminate the contaminant source. These options, outlined in the 3Ts guidance document include:

- Install corrosion control devices for individual buildings, known as point-of-entry devices.
- Install point-of-use devices that control lead at the tap.
- Find alternate grounding for electrical wires that are grounded to water pipes.
- Replace lead service lines and other lead pipes.
- Replace outlets where there is localized contamination with new, certified components. EPA recognizes NSF Standard 61, Section 9 as a performance standard. It limits leaching of lead into the drinking water. The standard regulates devices that dispense water for human ingestion.¹

Routine control measures can also be implemented by Medina Central School District to properly address each situation, such as cleaning aerators regularly and placard sinks with notices that water should not be consumed, until appropriate permanent actions can be implemented, such as removing/replacing a fixture.

The remedial options are based on the 3Ts guidance document as referenced in the NYSDOH Emergency Regulation:

“The Environmental Protection Agency’s 3Ts for Reducing Lead in Drinking Water in Schools, Revised Technical Guidance will be used as a technical reference for implementation of the regulation.”

Please refer to the attached laboratory reports for specific analytical data and sample locations throughout the school. If you have any questions, please contact me at (585) 454-1060. We appreciate the opportunity to provide you with our professional services.

CASE NARRATIVE SUMMARY

All reported results are within defined laboratory quality control objectives unless listed below or otherwise qualified in this report.

REVISED REPORT - 11/16/2016 - Project location revised.

The results of analyses reported only relate to samples submitted to the Con-Test Analytical Laboratory for testing.

I certify that the analyses listed above, unless specifically listed as subcontracted, if any, were performed under my direction according to the approved methodologies listed in this document, and that based upon my inquiry of those individuals immediately responsible for obtaining the information, the material contained in this report is, to the best of my knowledge and belief, accurate and complete.

A handwritten signature in black ink, reading "Meghan E. Kelley". The signature is written in a cursive, flowing style.

CASE NARRATIVE SUMMARY

All reported results are within defined laboratory quality control objectives unless listed below or otherwise qualified in this report.

REVISED REPORT - 10/25/2016 - 16J0615-09 & -86 IDs revised.

The results of analyses reported only relate to samples submitted to the Con-Test Analytical Laboratory for testing.

I certify that the analyses listed above, unless specifically listed as subcontracted, if any, were performed under my direction according to the approved methodologies listed in this document, and that based upon my inquiry of those individuals immediately responsible for obtaining the information, the material contained in this report is, to the best of my knowledge and belief, accurate and complete.

A handwritten signature in black ink, reading "Meghan E. Kelley". The signature is written in a cursive, flowing style.

Meghan E. Kelley
Project Manager

FLAG/QUALIFIER SUMMARY

*	QC result is outside of established limits.
†	Wide recovery limits established for difficult compound.
‡	Wide RPD limits established for difficult compound.
#	Data exceeded client recommended or regulatory level
ND	Not Detected
RL	Reporting Limit
DL	Method Detection Limit
MCL	Maximum Contaminant Level

Percent recoveries and relative percent differences (RPDs) are determined by the software using values in the calculation which have not been rounded.

No results have been blank subtracted unless specified in the case narrative section.

Sample Receipt Checklist

CLIENT NAME: EHS RECEIVED BY: RF DATE: 10/12/10

1) Was the chain(s) of custody relinquished and signed? Yes ☐ No ☒ No COC Incl.

2) Does the chain agree with the samples?

Yes ☒ No ☐

If not, explain:

3) Are all the samples in good condition?

Yes ☒ No ☐

If not, explain:

4) How were the samples received:

On Ice ☐ Direct from Sampling ☐ Ambient ☒ In Cooler(s) ☐

Were the samples received in Temperature Compliance of (2-6°C)? Yes ☐ No ☒ N/A ☐

Temperature °C by Temp blank ☐ Temperature °C by Temp gun 16.8°C

5) Are there Dissolved samples for the lab to filter?

Yes ☐ No ☒

Who was notified ☐ Date ☐ Time ☐

6) Are there any RUSH or SHORT HOLDING TIME samples?

Yes ☐ No ☒

Who was notified ☐ Date ☐ Time ☐

7) Location where samples are stored:

Permission to subcontract samples? Yes ☐ No ☐
(Walk-in clients only) if not already approved
Client Signature: ☐

8) Do all samples have the proper Acid pH: Yes ☐ No ☐ N/A ☒

9) Do all samples have the proper Base pH: Yes ☐ No ☐ N/A ☒

10) Was the PC notified of any discrepancies with the CoC vs the samples: Yes ☐ N/A ☒

Login Sample Receipt Checklist

(Rejection Criteria Listing - Using Sample Acceptance Policy)

Any False statement will be brought to the attention of Client

Question	Answer (True/False)	Comment
	T/F/NA	
1) The cooler's custody seal, if present, is intact.	NA	
2) The cooler or samples do not appear to have been compromised or tampered with.	T	
3) Samples were received on ice.	F	received in boxes via UPS
4) Cooler Temperature is acceptable.	T	drinking water
5) Cooler Temperature is recorded.	T	
6) COC is filled out in ink and legible.	T	
7) COC is filled out with all pertinent information.	T	
8) Field Sampler's name present on COC.	T	
9) There are no discrepancies between the sample IDs on the container and the COC.	T	
10) Samples are received within Holding Time.	T	
11) Sample containers have legible labels.	T	
12) Containers are not broken or leaking.	T	
13) Air Cassettes are not broken/open.	NA	
14) Sample collection date/times are provided.	T	
15) Appropriate sample containers are used.	T	
16) Proper collection media used.	T	
17) No headspace sample bottles are completely filled.	NA	
18) There is sufficient volume for all requested analyses, including any requested MS/MSDs.	F	did not receive 8 samples
19) Trip blanks provided if applicable.	NA	
20) VOA sample vials do not have head space or bubble is <6mm (1/4") in diameter.	NA	
21) Samples do not require splitting or compositing.	T

CASE NARRATIVE SUMMARY

All reported results are within defined laboratory quality control objectives unless listed below or otherwise qualified in this report.

REVISED REPORT - 10/24/2016 - 16J0616-20 sample description revised.

The results of analyses reported only relate to samples submitted to the Con-Test Analytical Laboratory for testing.

I certify that the analyses listed above, unless specifically listed as subcontracted, if any, were performed under my direction according to the approved methodologies listed in this document, and that based upon my inquiry of those individuals immediately responsible for obtaining the information, the material contained in this report is, to the best of my knowledge and belief, accurate and complete.

A handwritten signature in black ink, reading "Meghan E. Kelley". The signature is written in a cursive, flowing style.

Meghan E. Kelley

FLAG/QUALIFIER SUMMARY

*	QC result is outside of established limits.
†	Wide recovery limits established for difficult compound.
‡	Wide RPD limits established for difficult compound.
#	Data exceeded client recommended or regulatory level
ND	Not Detected
RL	Reporting Limit
DL	Method Detection Limit
MCL	Maximum Contaminant Level
Percent recoveries and relative percent differences (RPDs) are determined by the software using values in the calculation which have not been rounded.	
No results have been blank subtracted unless specified in the case narrative section.	

39 Spruce Street * East Longmeadow, MA 01028 * FAX 413/525-6405 * TEL. 413/525-2332

Sample Receipt Checklist

CLIENT NAME: EHS RECEIVED BY: PLF DATE: 10/12/16

1) Was the chain(s) of custody relinquished and signed? Yes No X No COC Incl.

2) Does the chain agree with the samples?

Yes X No

If not, explain:

3) Are all the samples in good condition?

Yes X No

If not, explain:

4) How were the samples received:

On Ice Direct from Sampling Ambient X In Cooler(s)

Were the samples received in Temperature Compliance of (2-6°C)? Yes No X N/A

Temperature °C by Temp blank Temperature °C by Temp gun 16.8°C

5) Are there Dissolved samples for the lab to filter?

Yes No X

Who was notified Date Time

6) Are there any RUSH or SHORT HOLDING TIME samples?

Yes No X

Who was notified Date Time

7) Location where samples are stored:

Permission to subcontract samples? Yes No

(Walk-in clients only) if not already approved

Client Signature:

8) Do all samples have the proper Acid pH: Yes No N/A X

9) Do all samples have the proper Base pH: Yes No N/A X

10) Was the PC notified of any discrepancies with the CoC vs the samples: Yes N/A X

Containers received at Con-Test

	# of containers		# of containers
1 Liter Amber		16 oz amber	
500 mL Amber		8 oz amber/clear jar	
250 mL Amber (8oz amber)		4 oz amber/clear jar	
1 Liter Plastic		2 oz amber/clear jar	
500 mL Plastic		Plastic Bag / Ziploc	
250 mL plastic	<u>25</u>	SOC Kit	
40 mL Vial - type listed below		Perchlorate Kit	
Colisure / bacteria bottle		Flashpoint bottle	
Dissolved Oxygen bottle		Other glass jar	
Encore		Other	

did not receive ES-2-CS-091

40 mL vials: # HCl <u> </u>	# Methanol <u> </u>	Time and Date Frozen:
Doc# 277 # Bisulfate <u> </u>	# DI Water <u> </u>	
Rev. 4 August 2013 # Thiosulfate <u> </u>	Unpreserved <u> </u>	

Login Sample Receipt Checklist**(Rejection Criteria Listing - Using Sample Acceptance Policy)****Any False statement will be brought to the attention of Client**

<u>Question</u>	<u>Answer (True/False)</u>	<u>Comment</u>
	T/F/NA	
1) The cooler's custody seal, if present, is intact.	NA	
2) The cooler or samples do not appear to have been compromised or tampered with.	T	
3) Samples were received on ice.	F	received in box via UPS
4) Cooler Temperature is acceptable.	T	drinking water
5) Cooler Temperature is recorded.	T	
6) COC is filled out in ink and legible.	T	
7) COC is filled out with all pertinent information.	T	
8) Field Sampler's name present on COC.	T	
9) There are no discrepancies between the sample IDs on the container and the COC.	T	
10) Samples are received within Holding Time.	T	
11) Sample containers have legible labels.	T	
12) Containers are not broken or leaking.	T	
13) Air Cassettes are not broken/open.	NA	
14) Sample collection date/times are provided.	T	
15) Appropriate sample containers are used.	T	
16) Proper collection media used.	T	
17) No headspace sample bottles are completely filled.	NA	
18) There is sufficient volume for all requested analyses, including any requested MS/MSDs.	F	no ES-2-CS-091
19) Trip blanks provided if applicable.	NA	
20) VOA sample vials do not have head space or bubble is <6mm (1/4") in diameter.	NA	
21) Samples do not require splitting or compositing.	T
