Countywide School Closures To Extend Through Rest Of Academic Year

County Schools has made available portals on its [website](#) to share resources and tools for school districts, families and students, in the areas of distance learning, nutrition, and well-being.

Following the guidance of Gov. Gavin Newsom and State Superintendent Tony Thurmond, all 33 school districts in San Bernardino County announced on April 1 that they will extend the closures of school campuses through the end of this academic year for the health and well-being of students and staff.

Even with the physical closure of school sites, learning and nutrition for students will continue for the rest of the school year as districts ramp up distance learning capabilities and continue to offer nutritious meals during weekdays for students.

In March, County Schools made portals available on its website at www.sbcss.net to share resources and tools for school districts, families and students, in the areas of distance learning and school meals.

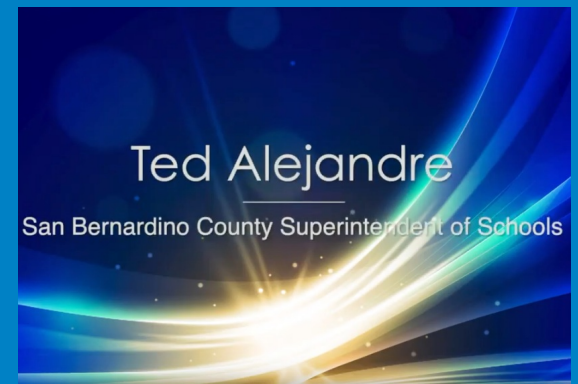

Our [Digital Learning Services](#) team has provided training webinars for more than 1,000 teachers on how to connect with their students

A CALIFORNIA PUBLIC EDUCATION PARTNERSHIP

KVCR is broadcasting California State Standards-

Learning Services and Content Support in Education Support Services and Innovation and Engagement will continue to offer trainings and be available to districts, schools and teachers to provide distance learning support.

County Schools also has [partnered with KVCR](#) - the Inland Empire's Public Broadcasting Station - to provide weekday [educational programming](#) in collaboration with the Riverside County Office of Education. Daily programs during the week run from 9 a.m. to 9 p.m. with three-hour blocks that are dedicated to grade levels of our school populations from kindergarten through adult learners.

In addition, through our County Schools' website and social media platforms, we have shared up-to-date information on the state and county's COVID-19 response from the governor's office and California Department of Education, as well as the departments of Public Health, with data, directives, protocols and best practices to keep our communities safe and healthy.

I want to thank all of our school districts and our education partners for their resiliency and strength through these difficult circumstances. For our school families, be sure to check local websites for updates and guidance as details unfold in all our efforts to combat the coronavirus. Be safe and be well!
