

**Billings School District 2**

**NONINSTRUCTIONAL OPERATIONS**

Property Damage

As determined by the Board, the District will maintain a comprehensive insurance program to provide adequate coverage for loss of or damage to school buildings or equipment, including motor vehicles.

The Board requires that a comprehensive insurance program provide maximum protection and coverage at the most reasonable cost. The program may include alternatives for sharing risks between the District and an insurance carrier and through self-insurance plans.

Privately Owned Property

Except as provided in negotiated agreements or individual employment contracts, the District will not assume responsibility for maintenance, repair, or replacement of any privately owned property brought to a school or to a District function, unless the use or presence of such property has been specifically requested in writing by an administrator.
