Student Growth Trends and Progress

These graphs illustrate trends in student growth over the last three years. Student growth is measured by median student growth percentile. The table below shows how student growth over the last three years compares to the state standard of 40-59.5 and to the statewide median.

Important note for 2020-21: Due to the cancellation of statewide assessments as a result of the COVID-19 pandemic in both 2019-20 and 2020-21, student growth percentiles were not calculated and will not be reported for the 2019-20 and 2020-21 school years.

ELA Median Student Growth Percentile					Math Median Student Growth Percentile			
100					100			
80					80			
60	45 •				60	50		
40					40	•		
20					20			
0					0	0		
	2018-19	2019-20	2020-		2	2018-19	2019-20	2020-
