**2.5 Motor Skill Development - All students will utilize safe, efficient, and effective movement to develop and maintain a healthy, active lifestyle.**

**Strand: A. Movement Skills and Concepts**

**NJCCCS:**

- 2.5.2.A.1 Explain and perform movement skills with developmentally appropriate control in isolated settings (i.e., skill practice) and applied settings (i.e., games, sports, dance, and recreational activities).
- 2.5.2.A.2 Demonstrate changes in time, force, and flow while moving in personal and general space at different levels, directions, ranges, and pathways.
- 2.5.2.A.3 Respond in movement to changes in tempo, beat, rhythm, or musical style.
- 2.5.2.A.4 Correct movement errors in response to feedback.

**Big Ideas:**

Individuals who learn to move safely, effectively and efficiently and feel comfortable and confident in the performance of motor skills are more likely to participate in health-enhancing forms of physical activity throughout life.

**Essential Questions:**

- How does effective and appropriate movement affect wellness?
- Why do I have to understand concepts of movement when I can already perform the movement?

**Enduring Understandings:**

- Performing movement skills in a technically correct manner improves overall performance and increases the likelihood of participation in lifelong physical activity.
- Knowing and understanding concepts of movement will improve performance in a specific skill and provide the foundation for transfer of skills in a variety of sports and activities.

**Knowledge, Skills, and Instructional Objectives:**

By the end of Grade 2, all students will be able to . . .

- Describe and perform movement skills with developmentally appropriate control in isolated and applied settings.
- Demonstrate changes in time, force, and flow while moving in personal and general space at different levels, directions, ranges, and pathways.
- Respond with movement to changes in tempo, beat, rhythm or musical style.

**2.5.2.B.4** Demonstrate strategies that enable team members to achieve goals.

**Big Ideas:**

Individuals who learn to move safely, effectively and efficiently and feel comfortable and confident in the performance of motor skills are more likely to participate in health-enhancing forms of physical activity throughout life.

**Essential Questions:**

To what extent does strategy influence performance in competitive games and activities?

**Enduring Understandings:**

Implementing effective offensive, defensive and cooperative strategies is necessary for all players to be successful in game situations.

**Knowledge, Skills, and Instructional Objectives:**

By the end of Grade 2, all students will be able to . . .

- Differentiate between competitive and cooperative strategies in game, sports, and other movement activities.
- Compare and contrast offence and defense and the roles within.

## **Modifications for SpEd/ESL/students at Risk/Gifted**

**Supports, Accommodations, and Modifications must be provided as stated in IEP,504 Plan, or I-Team Intervention Plan , and may include (but not limited to) the following:**

### **Presentation accommodations:**

- Listen to audio recordings instead of reading text
- Learn content from audio books, movies, videos and digital media instead of reading print versions
- Use alternate texts at lower readability level
- Work with fewer items per page or line and/or materials in a larger print size
- Use magnification device, screen reader, or Braille/Nemeth Code
- Use audio amplification device (e.g., hearing aid (s) , auditory trainer, sound-field system (which may require teacher use of microphone)
- Be given a written list of instructions
- Record a lesson, instead of taking notes
- Have another student share class notes with him
- Be given an outline of a lesson
- Be given a copy of teachers' lecture notes
- Be given a study guide to assist in preparing for assessments
- Use visual presentations of verbal material, such as word webs and visual organizers
- Use manipulatives to teach or demonstrate concepts
- Have curriculum materials translated into native language

### **Response accommodations:**

- Use sign language, a communication device, Braille, other technology, or native language other than English
- Dictate answers to scribe
- Capture responses on an audio recorder
- Use a spelling dictionary or electronic spell-checker
- Use a word processor to type notes or give responses in class
- Use a calculator or table of "math facts"
- Respond directly in the test booklet rather than on an answer sheet.

### **Setting accommodations:**

- Work or take a test in a different setting, such as a quiet room with few distractions
- Sit where he learns best ( for example, near the teacher, away from distractions)
- Use special lighting or acoustics
- Take a test in a small group setting
- Use sensory tools such as an exercise band that can be looped around a chair's legs (so fidgety kids can kick it and quietly get their energy out)
- Use noise buffers such as headphones, earphones, or earplugs

**Timing accommodations:**

- Take more time to complete a task or a test
- Have extra time to process oral information and directions
- Take frequent breaks, such as after completing task

**Scheduling accommodations:**

- Take more time to complete a project
- Take a test in several timed sessions or over several days
- Take sections of a test in a different order
- Take a test at a specific time of day

**Organization skills accommodations:**

- Use an alarm to help with time management
- Mark texts with a highlighter
- Have help coordination assignments in a book or planner
- Receive study skills instruction

**Assignment modifications:**

- Complete fewer or different homework problems than peers
- Write shorter papers
- Answer fewer or different test questions
- Create alternate projects or assignments
