

What is the Most Cost-Effective Way to Access Care After Hours?

Compare Your Options:

Wellvia Telemedicine

Cost:\$0

Your employer offers you and your family members a Telemedicine service Available 24/7. Board Certified doctors can diagnose, recommend treatment and prescribe medication via phone or video from anywhere – your home, office or while on vacation.

WellVia: 1-855-935-5842 (WELLVIA) or www.wellviasolutions.com

Urgent Care Centers

Average Cost: \$175

At these walk-in medical clinics, doctors and nurses provide *immediate care for non-life-threatening illnesses and injuries (sore throat, ear infections, stomach pains, minor cuts, COVID tests, etc.)* Urgent care centers often cost much less than going to the ER and may provide much faster care. Many offer evening, weekend, and 24-hour services. Appointments may be needed.

Hospital Emergency Rooms

Average Cost: \$2,000

Usually located in a hospital, an ER provides *immediate, emergency care for serious and life-threatening illnesses and injuries (heart attack, major broken bones, allergic reactions, shortness of breath, etc.)*

Free-Standing Emergency Rooms

Average Cost: \$4,000

These centers fulfill the same need as a Hospital ER, but typically do not contract, and are not in network. The cost at these facilities is much higher for both you, and the medical plan.

If the facility is not attached to a hospital, and has "EMERGENCY" in the name, it is a Free-Standing Emergency Room.

COVID Testing

Average Costs:

Urgent Care Center - \$125

Hospital Emergency Room - \$500

Free-Standing Emergency Room - \$2000

When you or someone you know has a life-threatening medical problem, call 911 immediately.
