## First Grade Summer Math Review Calendar June 2024

Dear Families,

Research shows that most students lose about two months worth of skills in mathematics during the summer months. You can help stop this from happening! Attached to this letter are math review calendars for June, July, and August. For each day on the calendar, there is a question, problem, or activity for your child to do at home that will help to review the concepts covered during the school year. These concepts will be built upon as your child enters the next grade level. It is suggested by your child's math teacher that your child will work each day to review and talk about the concept with a family member. Encourage your child to explain to you what they know and to show their thinking using words, numbers, and pictures. Please initial each day of the calendar as your child completes each task. Your initials will indicate that your child not only did the task, but that you also talked about it together and/or looked at their work and that they solved it correctly.

Your child is encouraged to return the math review calendar to his or her new teacher with all of the days initialed. I hope you will enjoy letting your child show you how much they've learned!

Thank you! ☺

Sunday	Monday	Tuesday	Wednesday	Thursday	Friday	Saturday
<b>16</b> Draw 16 circles. How many groups of ten can you make?	<b>17</b> Draw 2 ten frames. Show 15 on the ten frames.	<b>18</b> Add. $3 + 3 + 7 = \underline{\quad}$ Which strategies did you use?	<b>19</b> Show the number combinations that make ten. For example, $1 + 9 = 10$	<b>20</b> Compare the numbers: $17 \underline{\quad} 14$ Explain how you know you are correct.	<b>21</b> Start at 32 and count to 100	<b>22</b> Abigail has 52 markers. How many bundles of ten can she make?
<b>23</b> Use objects in your house to show the number 18.	<b>24</b> Solve. 7 bugs were on a log. Some more bugs crawled there. Then there were 11 bugs. How many bugs crawled on the log?	<b>25</b> Compare using $>, <, =$ $35 \underline{\quad} 53$	<b>26</b> Solve. 14 strawberries were in the basket. I ate some of them. Then there were 7 strawberries. How many strawberries did I eat?	<b>27</b> Use objects or draw a picture to show: $7 + 5 = \underline{\quad}$	<b>28</b> Solve. 12 flowers are in a vase. 8 are pink and the rest are yellow. How many flowers are yellow?	<b>29</b> Solve. Joe has 10 toy cars. Some are red and some are blue. How many could he have of each color?

# First Grade Summer Math Review Calendar July 2024

Sunday	Monday	Tuesday	Wednesday	Thursday	Friday	Saturday
<b>30</b> Write five different "doubles" facts and solve them.	<b>1</b> Solve. Max has 8 books. Aly has 10 books. How many more books does Aly have than Max?	<b>2</b> Write the numbers 58-62.	<b>3</b> What number comes between 39 and 41?	<b>4</b> Solve. Sarah has 7 more bracelets than Emily. Emily has 5 bracelets. How many bracelets does Sarah have?	<b>5</b> Use objects in your house to show the number 62.	<b>6</b> Find the differences: $80 - 10 = \underline{\quad}$ $70 - 20 = \underline{\quad}$ $40 - 30 = \underline{\quad}$
<b>7</b> Joey read 52 pages of his book. Then he read 10 more pages. How many pages did Joey read?	<b>8</b> How many cubes can you find in your house?	<b>9</b> Draw a shape with 3 sides and 3 angles. What shape did you draw? Can you draw another one that is different?	<b>10</b> How many cylinders can you find in your house?	<b>11</b> Write five different doubles addition facts and solve them.	<b>12</b> Draw a circle and a square. Partition each one to show halves.	<b>13</b> Practice your addition facts.
<b>14</b> Use 3 pencils or crayons. Line them up from longest to shortest.	<b>15</b> What number is 10 less than 59? Draw a picture to show your thinking.	<b>16</b> Draw a circle and a square. Partition each one to show fourths.	<b>17</b> What number is shown?       . . .	<b>18</b> Molly has 62 books. She makes groups of ten. How many leftover books will she have?	<b>19</b> Write ten different addition facts with a sum of 10.	<b>20</b> Use paper clips or noodles to measure a toy. How long is it?
<b>21</b> Start at 62 and count to 120.	<b>22</b> Practice your addition facts.	<b>23</b> Partition the square to show fourths. 	<b>24</b> Draw 3 different rectangles.	<b>25</b> Write five different "minus 2" facts and solve them.	<b>26</b> Draw two different shapes that have 4 sides. Tell how they are alike and different.	<b>27</b> Practice your subtraction facts.
<b>28</b> Count to 120.	<b>29</b> Amy has 4 boxes of cookies. Each box has 10 cookies. How many cookies does she have altogether?	<b>30</b> Draw a square, a rectangle and a trapezoid. How are these shapes alike?	<b>31</b> Find an example of a cylinder in your house.	<b>1</b> Find an example of a rectangular prism in your house.	<b>2</b> Write five different "doubles" facts and solve them.	<b>3</b> Use objects in your house to show the number 56.
