2020 LTG Teacher Survey Comments
Olean City School District

What are the TOP five technology areas you would like to receive more professional development training or support in?

- As we reopen and possible remote learning again, ways to integrate with Teams. Would like students to only have to learn one platform but would like to use others as supplements. Is there a way to do it all within Teams?
- Castle Learning, Teams
- Creating groups for remote learning on a daily basis
- Google classroom
- I would like to be kept current w/ MO 365 suite, especially Teams.
- Office 365, teams, smart boards, integrating students into teams, utilizing iPads class wide
- Privacy
- remote learning, smart board, assistive technology
- Teams, One Drive, Office 365
- TEAMS, SmartBoard, Zoom, Quizlet, anything that will help with remote learning- for more engaging interactions with students
- TEAMS, Office 365, ELMO, Smartboard, student use of TEAMS

Considering the full school year (in session and remote learning), how would you define a Personalized Learning Plan today?

- A document very similar to an iep with more day today goals in mind
- A fluid document that allows at-risk students and their teachers to create and monitor short- and long-term goals
- A plan created with student needs in mine to help students better succeed.
- A plan that is individualized to meet the unique needs of the learner.
- After getting to know the student, the plan would be tailored to their specific interests to guide them to books they want to read. I would also add their reading strengths and deficits to work on.
- Diagnosis per student, short/long term goals, What success to meet that goal looks like from the student/teacher perspective..daily exercises to meet the goals.
- Individualized similar to IEP
- It is an organized plan to achieve set goals. Steps for achieving said goals are outlined.
- not familiar
- Similar to an IEP with student's goals, interests for day to day use
- students deciding on the goals they would like to achieve based on what they want to do after schooling with support from school personnel.

Looking ahead to next year, which may include remote and/or in-person formats, what would you find helpful or necessary for planning to implement individualized instruction (ex. technology assistance, resources, PD, or other)?

- All of the above
- any and all
- It would be great to have some websites or online resources to gear towards specific skills. I would like to become more proficient using Teams. A subscription to Epic! the kids can use in school and at home to would be very helpful.
- more PD to enhance and improve on what has already been done.
- Organizing groups as per classrooms, scheduled meetings at home, resources for students
- PD with tech tools/programs used by the district; time to explore technology tools
- Technology assistance and resources, PD
- Teams
- Tech assistance, resources, and PD are all important to me. I think having time to collaborate with others is also critical. I much prefer a team approach rather than many doing their own thing devoid of communication with other stakeholders.
- Technology, PD
- Use google classroom as opposed to teams, purchase a subscription to Ed puzzle, more train for students and families pertaining to online instruction

How do you feel the Learning Technology Grant can be the most helpful to you next year?

- Maybe getting access to a smart board in my own classroom in order to integrate more student interaction during lessons.
- more interactive technology for students
- Ongoing training with programs available, time with tech specialists - individually; More interactive tools for students?
- PD
- PD, computers, etc
- Provide more training for all involved provided better computers for teachers if online learning continues, access to Ed puzzle and alternatives to teams
- Supply faculty and students with more training and easier to use platforms such as google classroom.
- The training I mentioned above and access to online resources.
- Update all technology.

Is there anything else you would like us to know?

- Can Class Link be set up 100% asap? It may be available now?
- Faculty laptops need to be upgraded should online learning continue
- Not at this time.
- Teams was difficult for my students to navigate, teacher laptops need improvement, students need access to cameras on laptops
- Thank you for asking.
- Thanks for reaching out
