Visual Hierarchy

Negative Space
Less is more. Instead of including as much information as possible in a small space, use negative space to set content apart. Guide the reader toward what is essential and provide a place to go to learn more.

Add Visual Interest
Avoid large chunks of text and highlight important information with photography, icons, and clear visuals. Consider using ordered lists for procedures and bullets for lists in place of long sentences or paragraphs.

Group Content for Better Understanding with a Logical Heading Structure
The page or document title should be a heading level 1. Break the rest of the document into sections using descriptive subheadings (H2, H3, etc.). Nest headings without skipping levels. For example, H2 under H1, H3 under H2, and so on.

Formatting Considerations
• Keep sentences less than 20 words.
• Keep paragraphs to 2-3 sentences.
• Do not justify text. Avoid centering multiple lines of text.
• Use a single space after a sentence.
• Keep line height at least 1.5 times the font size.
• Maintain spacing between paragraphs at least 2 times the font size.

General Media Concepts

Typeface Considerations
✔ Start with the Lexend typeface.
  tsd.org/accessible-type

⚠ Try to use typefaces without mirroring, ambiguous characters, or tight letter spacing.

Avoid typefaces like Comic Sans with abnormal word shapes that are more difficult to decode.

Color Contrast
Ensure a sufficient color contrast ratio between text and background color.

4.5:1 for normal text
3:1 for large text
14 pt / 19 px bold or 18 pt / 24 px
3:1 for graphics and user interface components

Emphasize without Barriers
✔ Size
✔ Varying weights
✔ Spacing

⚠ Italics
⚠ SHOUTING

Avoid underlined text in digital media, unless it is a hyperlink.

Digital Media Concepts

Meaningful Links
Ensure hyperlinks describe the linked resource.

Alternative Text
Avoid images of text and use descriptive alternative text for screen readers.

Tables
Only use tables for displaying data with proper headings and no merged cells.
