Negative Space

Less is more. Instead of including as much information as possible in a small space, use negative space to set content apart. Guide the reader toward what is essential and provide a place to go to learn more.

Add Visual Interest

Avoid large chunks of text and highlight important information with **photography**, **icons**, and **clear visuals**. Consider using **ordered lists** for procedures and **bullets** for lists in place of long sentences or paragraphs.

Group Content for Better Understanding with a Logical Heading Structure

The page or document title should be a heading level 1. Break the rest of the document into sections using descriptive subheadings (H2, H3, etc.). Nest headings without skipping levels. For example, H2 under H1, H3 under H2, and so on.
