## LONG-RANGE FACILITIES PLANNING FACTSHEET

May 2023

The Long-Range Facilities Planning Committee is made up of 24 community members and parents from across the district.

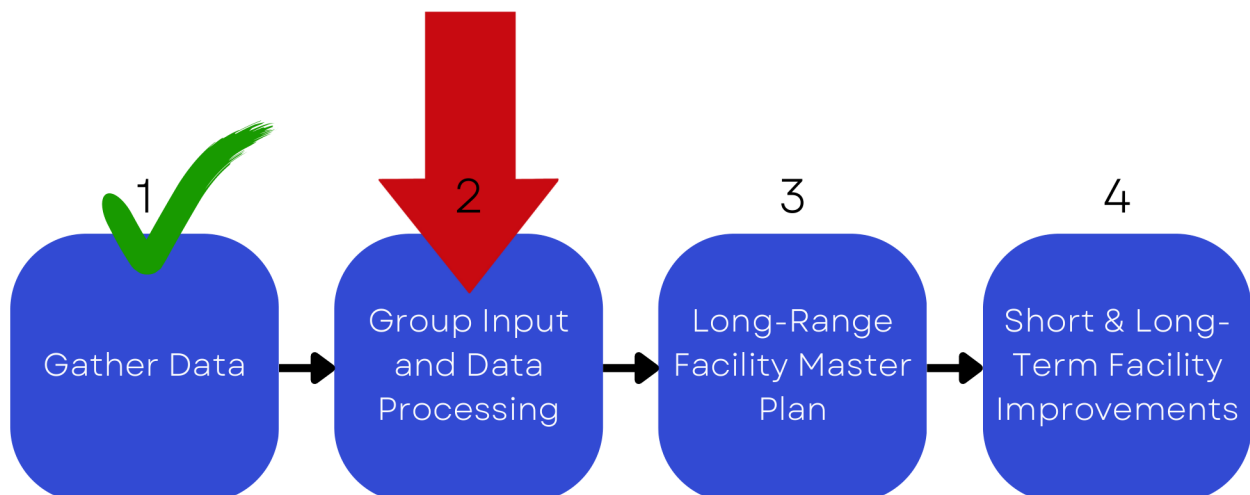

Regions	Parents	Community Members	Total
Airway Heights	5	4	9
Cheney	5	3	8
West Plains	5	2	7

For perspective on the size of the 380 square miles of Cheney Public Schools, the District attendance boundaries can be viewed here:

There are four distinct phases to the committee's work. The first phase was to gather the data. Consultants from Teater Crocker, Inc. compiled the data and presented it to the committee. The committee is now in the second phase of gathering input.

## LONG-RANGE FACILITIES PLANNING FACTSHEET

A portion of the data gathered and shared was the projected growth in student enrollment.

The committee drafted three facility options to collect feedback from the community as a whole. Three community meetings were held to collect feedback on the options, as well as an online Thought Exchange survey. Draft 1 and Draft 2 were created based on three educational assumptions of excellence:

- Classrooms should be permanent spaces
- All teachers should prep in their own spaces
- Schools should be located near high student density areas

### No New Schools

- No additional schools are added to the district in the near future

### Draft 1

- One elementary school added in 2026
- One elementary school added and one secondary school added in 2031
- Land acquisition

### Draft 2

- Two elementary schools added in 2026
- One secondary school added in 2031
- Land acquisition

### Next Steps

Upon review of all feedback, the committee co-chairs will present the Long-Range Facilities Plan to the School Board for consideration.
