

A Russian startup created a human-like robot for offices, airports, and banks

Russian startup Promobot built what it calls the world's first android that looks like a real person and could be coming to the workplace in the near future. With life-like movements and speech, it could perform tasks in offices, airports, banks, museums, as well as the home. The company has over ten orders for this latest innovation in artificial intelligence.

New Technology New Chance

New technologies do miracles in medicine and healthcare.

Human life and health are the most important things in the world. Humanism begins with helping disabled. After the necessary medical and psychological assistance disabled person should adapt to his new lifestyle.

I attach great importance to prostheses of human body parts. Prostheses or artificial limbs are used to replace a missing body part which may have been lost due trauma, disease or congenital defect.

Today, new technology with biomedical engineering unlocks a new era in implantation. This is a phenomenal team work of medic, biologist, surgeon, cybernetic, mechanic, designer and etc. Experts say that 50 percent

of the human body is currently replaceable with artificial implants and advanced prostheses. New bionics, robotics let disabled people who don't have legs walk, run, climb, skip and dance.

Humanity will end disability in 21st century. Thanks to humans for changing lives and giving another chance.

.....

Museum of the future in Dubai which designed by architect named Sean Killa is considered as the most beautiful building in the world

This building took six years to build

* This is Museum of the future in Dubai the Emirates.

* This building is unique because it looks like a human eye an eye looking at the future and because its round, there is not a single corner in this building and no columns.

* Seven floors, zero corners.

* This is an engineering marvel.

* The outside is made of 1024 panels exactly representing 1,024 bytes in one kilobyte, and each panel is covered with Arabic quotes.

It's the only building in the world covered with a language but what is hiding inside of it?

- ▶ This is a living museum which means everything inside of it is from the present and the future not the past.
- ▶ Even the elevator is designed like a spaceship it goes all the way up and you feel like you are in space.
- ▶ On the fifth floor there is an actual Nasa approved design of a space station.
- ▶ It's an interactive walkthrough space that shows you our solar system.

The future is not about building.

The future is about science, technology climate and nature.

It's about supporting humans with great ideas.

It's about taking care of our planet and most importantly it's about leaving better world for our kids.

The meaning of the three quotes that are written on this building by the ruler of Dubai Mouhamad Ben Rashed are:

- We will not live for hundreds of years, but we can create something that lasts for hundreds of years.
- The future will be for those who can imagine, design and implement it. The future does not wait, it can be designed and built today.
- The secret of the renewal of life, the development of civilization and the progress of humanity, is one word "innovation".

Thank you

FIRST ROBOT CAFÉ IN DUBAI

Dubai Zero human invention

Technology has taken over humans and
this café is proof.

- ▶ Dubai now also has café that's entirely run by robots
- ▶ Well, that means there is zero human invention
- ▶ So let's find out what Dubai's robot café looks like!
- ▶ The brand -new café is located in festival city mall.
- ▶ The café is entirely run by robots

Customers must be able to pick a seat in one of the futuristic innovation is the furniture and the place to order using tablets installed in the entrance. You can see three robotic arms act as waiters, serving customers.

Sandwiches		ساندويشات			
Bread Choice	عربي Arabic	دكان Dukkan	بانيني Panini	كعك Ka'ek	نوع الخبز
Falafel Asli	6	7	8	10	فلافل أصلي
Falafel Fakher	-	10	11	13	فلافل فاخر
Falafel Ala Kefak	-	8	9	12	فلافل على كيفك
Falafel Bil Foul	-	9	-	12	فلافل بالفاول
Falafel Bil Khoudra	-	7	-	10	فول بالخضرة

Free Beverage
with the purchase of any sandwich and fresh fries

مشروب مجاني
بند شرائك أي ساندويش
بطاطا مقلية

Drinks	مشروبات
Soft Drink	3 مشروبات غازية
Dukkan Tea	3 شاي الدكان
Water	3 ماء

michcafe.blogspot

Once you place the order, the robotic arm will then pick your order & prepare the food. Once the order is ready, one of the smaller arms carefully serves at your table. As for the menu, foodies can gorge a pretty much. Everything you find in a normal café pastry, coffee, chocolate, wraps, they have it all. And that's not all. The robots are also trained to perform dance and musical shows to entertain

diners.

Well for now, it clearly looks like the future of dining has arrived!

So let us know what you think about robot café.
