RE: Children with Special Dietary Needs

Dear Parent/Guardian:

Menu modifications are made for students with food allergies/intolerances. Please have your doctor fill out the attached Special Diet Request Form when substitutions or alterations to the menu are required to meet your child's health condition. The completed form must be returned to the Food Service.

USDA Regulations require that we have the attached form fully completed and signed by a licensed physician in order for the Food Service to comply with any special diet requests or needs. We can no longer accept just a note on a prescription stating that a child cannot have a certain food or requires other alterations in their diet.

We encourage parents/guardians to update this form each year due to changes in dietary needs. Cafeteria managers must follow the most recent form on file from the Doctor.

Sincerely,

Jessica Conner
