

**To:** Parents/guardians of students enrolled in Colorado schools  
**From:** Colorado Department of Public Health and Environment, Immunization Branch  
**Re:** Tdap vaccine required for sixth-grade entry

Dear Parent/Guardian, *(health care providers, please see reverse side).*

Colorado law requires students who are entering sixth grade to receive a tetanus-diphtheria-pertussis (Tdap) vaccine before their first day of school.

The Tdap vaccine can prevent tetanus, diphtheria, and pertussis. Tetanus enters the body through cuts or wounds and cannot be spread from person to person. Diphtheria and pertussis spread from person to person.

- **Tetanus** causes painful stiffening of the muscles. Tetanus can lead to serious health problems, including the inability to open your mouth, difficulty swallowing and breathing, and death.
- **Diphtheria** can lead to difficulty breathing, heart failure, paralysis, and death.
- **Pertussis**, also known as “whooping cough,” can cause uncontrollable, violent coughing that makes it hard to breathe, eat, or drink. Pertussis can be extremely serious, especially in infants and young children, and can cause pneumonia, convulsions, brain damage, or death. In teens and adults, it can cause weight loss, loss of bladder control, passing out, and rib fractures from severe coughing.

While the Tdap vaccine is typically given at age 11 for students who are entering sixth grade, it may also be given as early as 10 years of age. When it is given at age 10, it will: 1) Count as a valid adolescent Tdap dose, and 2) meet Colorado’s sixth grade Tdap school vaccine requirement.

Is your sixth-grader missing their Tdap vaccine? Click [here](#) to find an immunization provider near you.

If your child does not receive Tdap vaccine at sixth-grade entry, regardless of their age, a certificate of medical or nonmedical exemption must be submitted to the school. This will ensure your student is compliant with Colorado school immunization law and able to attend school.
