Gary Kasik	<p>Many city residents are asking for an update on your evaluation and planned actions regarding the high school pool modernization. They are anxious to understand why lower cost options are not being examined in detail. Please take a few minutes and update the public with answers pertaining to options under consideration and key points learned since you approved \$2M for pre-construction work. Specifically, are you considering a smaller less expensive pool given the city decision to not participate?</p> <p>Additionally why was the joint meeting with the city council simply dropped without comment from either group? Involved residents simply want to be kept informed, the optics of you not doing so reflect poorly on the entire board.</p>

Action Item: Approval of Amended Employment Contracts for the Assistant Superintendent, Business Services, Assistant Superintendent, Human Resources, and the Assistant Superintendent, Instructional Services

Name	Comment
Gary Kasik	Please present data used to support the contracts as fair and reasonable for each position. Where do these total compensation amounts fall in comparison to similar positions at other SoCal districts? Voters are concluding these salaries are high given the size of the district, please show the data that corrects this perception.

**Action Item: Approval of Amendment to Superintendent's
Employment Contract**

Name	Comment
Gary Kasik	Please articulate why the board feels it is necessary to have a four year running contract with the superintendent. If "normal practice" please note other districts that deploy a similar strategy and present where the total compensation of this superintendent falls in relation to other SoCal districts
