By 4 years can match some objects / colors, can count up to 10 (may use blocks, spoons), can point to numbers is using past tense (rolled, handed), can speak clearly (be understood by others), knows 4-8 actions will smile/laugh at funny pictures, can play well with other children, realizes when a person is hurt or needs help can lace shoes, can buckle a belt, can use a fork

By 4 1/2 years

can run, can balance on 1 foot, can cut along a line

(holds it with her fingers)

My child... can repeat 4 numbers, matches things that are related, can pick out which group has "more balls, more cups" can tell you why, or can say what made something happen, is using 5-6 word sentences, can name 4 colors can share, can take turns, calls attention to what he can do can help to serve self, can clean up spills, can dress with no help can swing self on swing, can hop well on each foot, can kick large ball with success, can connect dots on paper

By 5 years

My child...

My child...

can name 3 coins, can define 5 words, can count 4 or more things and answer "how many?"

can talk with others, can match a spoken word to a picture, can tell you what is the same or different (between shapes, toys, pictures on cards)

can tell you her birthday, can name 2 feelings (happy, sad), can tell you the difference between "real" and "make-believe"

can put on t-shirt, knows front from back of clothing, can brush his teeth

can catch a bounced ball, can skip, can march in time to music, can copy a cross (+), can draw a person (stick figure with 3-6 parts such as lines & circles for arms, legs, head, fingers)

If you didn't have a <a> on each line in your child's age group...or if you have any concerns...call your local

EI programs or CONNECT 1-800-692-7288 and talk with one of our child specialists!

Ten Tips

for raising happier, healthier children

When children receive warm, loving care, they are more likely to feel safe and secure with the adults who take care of them.

Be warm,

loving and responsive

the child's cues and

Talk, sing and read to

your child

Establish

rituals and

routines

Encourage

safe new

experiences

and play

discipline

as an

pportunity

to teach

Recognize

that each

child is

Choose

quality child

care and stay

involved

Take care

of yourself

Make

television watching selective

Recognize and respond to sounds, movements and expressions that your child makes. This will help your child feel secure and attached.

All of these things help your child's brain make connections it needs for growing and learning now and for learning later on.

Teach your child to know when it's time for bed by developing routines such as singing a song and pulling the curtains—daily routines and rituals associated with pleasurable feelings are reassuring for children.

As infants grow, they begin to explore the world beyond their caregivers. Encourage this exploration. While we may think of learning as simply acquiring facts, children actually learn through play.

Watch television with your child, and talk about what you are viewing. Don't use TV as a baby-sitter.

In addition to consistent and loving supervision, teach your child limits. Never hit or shake a child.

Children grow at different rates. Their needs and feelings about themselves reflect, in large measure, parents' and caregivers' attitudes toward them.

Visit your child care provider often, and seek someone who responds warmly and understands your baby's needs.

Parents need care too. When you are exhausted, irritable, depressed or overwhelmed, you may have a harder time meeting the needs of young children.

"Ten Tips" was developed by the national I Am Your Child campaign. Their goal is to make early childhood development a top priority for our nation.

For more information on what parents and caregivers can do to promote young children's healthy development, visit the I Am Your Child website (www.iamyourchild.org), or write to: I Am Your Child, P.O. 15605, Beverly Hills, CA 90209

"Watch Me Grow" brochure was developed in Philadelphia through the collaboration of: Public Health Management Corporation/ChildLink (PHMC), Philadelphia Mental Retardation Services (MRS), Philadelphia Department of Public Health (PDPH), and the Philadelphia Interagency Coordinating Council (PICC). Milestones for Birth—5 were drawn from a number of standardized developmental tests for infants, toddlers and young children. Graphic design by Trinh Loi.

Look inside and see what your child can do!

Every child grows and learns new things at his or her own pace. Children may vary by as much as 6 months in some of the things that they are able to do. If you have any concerns about your child's development, call Early Intervention (EI).

Funding for Early Intervention is provided through Pennsylvania OCDEL (Office of Child Development and Early Learning), your local county OMR offices of developmental services, Intermediate Units, and state/local contracted EI agencies.
