

**COST SAVINGS AND EFFICIENCIES  
FOR FISCAL YEAR 2015-2016**

---

**TOTAL ANNUAL SAVINGS TO-DATE OF:     \$125,911**

---

**\$63,500:** The Director of Pupil Services combined special education transportation runs by sharing transportation with Orange and Woodbridge.

**\$7,661:** The Director of Finance and Administration coordinated the negotiations of the STAR (Standardized Test for the Assessment of Reading) for Amity and the member towns' elementary school districts. Our District saved money with the lower prices.

**\$3,800:** The Assistant Director of Finance and Administration and Network Coordinator worked together to review all phone and fax lines throughout the District. The Network Coordinator identified lines that could be disconnected (old construction modules); fax lines settings that could be changed to the dial 9 for an outside line; and several reserve numbers that could be eliminated. In addition, all lines have been properly labeled.

**In-Kind:** An administrative assistant at Amity Middle School – Orange Campus obtained two new sets of the Town of Orange maps with street numbers. The maps can be used in a number of ways (e.g., Emergency Preparedness Plan; Transportation Review/Issues). These maps were laminated in the Media Center. In return for providing these maps, the school laminated a set of maps for the Town at no cost.

**\$4,000:** The Director of Technology decided not to hire two part-time summer interns. The new Technician is handling the work, which would have been done by the interns.

**\$2,150:** The blinds in the Amity Regional High School library atrium windows are battery operated. All of the batteries had failed. The cost of each battery was over \$100, and we needed 24 of them. Dino Gizzi, Building Maintainer, and Jim Saisa, Facilities Director, decided to purchase transformers and hard wire the blinds to building power, eliminating the need for batteries. We paid \$250 for materials and installed the transformers. We saved \$2,150 and never need to replace batteries again, saving labor and battery costs in the future.

**\$10,000:** Jim Saisa, Facilities Director, and Tracy Daigle, Facilities Coordinator, carefully reviews every invoice for the Facilities Department. Many companies bill us at the wrong State Contract amount or charge for trip or vehicle charges we should not pay. In addition, sales tax is frequently added to invoices, which should not be the case since we are tax exempt. Based on our audit of invoices, the Facilities Department saves a considerable amount of money every year.

**\$300:** All of the auto scrubbers, along with other cleaning equipment, run on batteries that need frequent distilled water additions. We used to buy cases of distilled water, but this took trips to the store (time) and the cost of the water. We purchased a water distiller for \$30. We now take normal tap water and distill it and no longer have to travel to purchase distilled water.

**\$17,000:** Our talented and properly trained Facilities staff prepares and refinishes our gym floors in-house. Most districts contract this service. We achieve excellent quality and do not pay a contractor to do this. We have trained a travelling gym floor crew to apply the finish in all of the gyms. We have four gyms.

**\$7,500:** The bridge on the fitness trail at Amity Middle School, Orange Campus, had deteriorated and become unsafe. Rather than hire a contractor, Director of Facilities, Jim Saisa, worked with the Industrial Education Department at Amity Regional High School to make this a student project. The Facilities Department purchased the materials and the bridge was constructed in sections in the shop class. The bridge sections were then transported to Orange and assembled on-site. The project was a complete success. Not only were students involved in a real-life construction project, the District saved an estimated \$7,500 over hiring a contractor.

**\$10,000:** The Director of Curriculum and Staff Development negotiated with the textbook company for Grade 7 math texts and on-line licenses for the 2016-2017 budget.
