Liberal Arts

University	Major	Required Math: (Calc, Stats, Both)	Recommended Math (if only ONE can be taken)	Generic Degree Path
Abilene Christian University	English	Neither	"I used Statistics as my required math class. Stats is most helpful in both humanities and medicine. I've never seen calculus required for a medical program or Humanities program (especially graduate programs like Masters, PHDs, PA Programs, and MD/DO programs). Stats is almost always required for medicine."	Liberal Arts
Austin College	Theatre Major, Education Minor	One math credit, none specifically recommended	"AP Statistics!! It really helps in psychology which most students take!!"	Liberal Arts
Baylor University	Elementary Education	Statistics	"I recommend taking statistics! I was able to use my AP credit as the college credit."	Liberal Arts
Florida State University	Music Education	Neither... only lower level maths were required	"Statistics, because we do talk about basic statistics in my Education classes regarding observation and research in the field!"	Liberal Arts
McMurry University	Criminology and History	Neither... only College Algebra	"Take AP Statistics and apply yourself on the test day and you can get out of math if your degree is in Liberal Arts."	Liberal Arts
Missouri State University	Musical Theatre	Neither	"Take statistics. It's very useful for all types of situations you will encounter in life. It also will most likely be covered in the general education math course you will be required to take, for any major, if you're pursuing a bachelor's degree in music."	Liberal Arts
Northwestern University	M.S. Journalism, Data Journalism	Both	"If you plan on pursuing anything other than a science degree, take statistics. If you plan on a science degree, take both (but if you absolutely can't, take calculus."	Liberal Arts
Oklahoma State University	Music Education	Neither, but AP Stats did count as my math credit.	"Statistics because there's so much I learned that I can apply to the real world. Aka polls, data information, etc."	Liberal Arts
Tarleton State University	Criminal Justice	Criminal Justice Stats	"I recommend Statistics because I was able to get credit for it as my basic math and overall it did help me some in criminal justice stats even though college stats was mostly computer software."	Liberal Arts
TCU & UT	BA History/Political Science; Law School	Neither	"I recommend stats. I don't necessarily "do math" in law school, but stats has been helpful recently in some specific client work I've been doing. So, if you are interested in Liberal Arts or Law School, I say statistics is the way to go."	Liberal Arts

University	Major	Required Math: (Calc, Stats, Both)	Recommended Math (if only ONE can be taken)	Generic Degree Path
Texas Christian University	Film, Television, Digital Media	Neither	"Whichever that student's planned major requires. I find myself using Statistics more often, though."	Liberal Arts
Texas Christian University	BA in Writing	Neither, any math accepted	"Statistics popped up more in my general non-math classes than Calculus did, so unless you're going into something more math based, I think Statistics is the way to go!"	Liberal Arts
Texas Tech University	Political Science	Neither	"Definitely Statistics! Even though my major doesn't really involve math, statistics is more useful with my classes and everyday usage! Both of the required math classes I took for my major involved statistics and probability."	Liberal Arts
University of North Texas	Political Science	Both.	"Definitely recommend Stats for any Liberal Arts Major."	Liberal Arts
University of North Texas	BA English Lit / MA English	Neither	"If someone is going more the humanities route like I did, I think statistics is great because I find that I still use the skills I learned when looking at surveys of polls that have to do with my field of study!"	Liberal Arts
University of Oklahoma	Political Science	Business Pre-Calculus	"AP Statistics! Even though my degree did not require statistics, it helped so much with statistical analysis within the major. I would recommend to any arts & science degree at OU!"	Liberal Arts
University of Oklahoma	Political Science	Neither, but statistics was recommended	"Probability statistics for political analysis purposes. The degree requires a lot of data interpretation!"	Liberal Arts
University of Oklahoma	BA political science, Law School	Statistics	"Data and Analytical courses and Social Statistics are the courses required for my math credits. I definitely recommend statistics for anyone interested in social sciences and/or liberal arts/politics. Having a basic understanding of the different types of social researching and the different biases, has continued to be very beneficial in both school and the real world."	Liberal Arts
University of Texas, Austin	English, Linguistics, and German	any math class needed for Liberal Arts	"I would recommend Statistics, especially for Liberal Arts majors! I fulfilled my math requirement with my AP Stats credit. A lot of majors (like psychology, which I know is pretty common) prefer that you have an AP Stats credity, since stats is pretty widely applicable. Side note, unrelated to the questions: I'll be taking a linguyistics statistics class soon! The class focuses on applying statistics to the analysis of the language."	Liberal Arts
University of Texas, Austin	English	Statistics	"If you're going into liberal arts (business, law, teaching) stats is the way to go!"	Liberal Arts
	Integrative Studies in Music, Psychology, and Sciences	1 upper level math	"Statistics. Abbbsolutely statistics over calculus. Absolutely."	Liberal Arts
